## 3 Composition/information on ingredients

- · Chemical characterization: Mixtures
- · Description: aqueous solution
- · Dangerous components:

111-30-8 glutaral

30-50%

#### Additional information:

the product contains no further substances which shall be indicated according to REACH-Regulation (Regulation (EC) No. 1907/2006).

For the wording of the listed hazard phrases refer to section 16.

# 4 First-aid measures

#### · Description of first aid measures

#### · General information:

Immediately remove any clothing soiled by the product.

Remove breathing apparatus only after contaminated clothing have been completely removed.

In case of irregular breathing or respiratory arrest provide artificial respiration.

· After inhalation: Provide fresh air. Call for doctor immediately.

• After skin contact:

Immediate wash with copious amounts of water and soap; rinse thoroughly; seek medical advice.

· After eye contact:

Rinse opened eye for several minutes under running water. Remove present contact lenses, if easy to do, and continue rinsing. Consult ophthalmologist immediately.

## Trade name: Glutaraldehyde 50 % solution in water

• After swallowing:

Wash out mouth. Call a doctor immediately.

- Do not induce vomitting risc of chemical burns!
- Most important symptoms and effects, both acute and delayed No further relevant information available.
- Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

#### **5** Fire-fighting measures

- · Extinguishing media
- · Suitable extinguishing agents:
- $CO_{2}$  extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. • Special hazards arising from the substance or mixture
- Formation of dangerous gases or vapours is possible in case of fire. In case of fire, the following can be released:
- Carbon monoxide and carbon dioxide
- Advice for firefighters
- · Protective equipment: Wear self-contained respiratory protective device.
- · Additional information

Collect contaminated fire fighting water separately. It must not enter the sewage system. Dispose of fire debris and contaminated fire fighting media in accordance with official regulations.

#### 6 Accidental release measures

- *Personal precautions, protective equipment and emergency procedures Wear protective clothing.*
- Ensure adequate ventilation

Avoid contact with the eyes and skin.

· Environmental precautions:

Inform respective authorities in case of seepage into water course or sewage system.

- Do not allow to enter sewers/ surface or ground water.
- *Methods and material for containment and cleaning up* Dispose contaminated material as waste according to item 13.
- Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
- · Protective Action Criteria for Chemicals

· PAC-1:	
111-30-8 glutaral	0.2 ppm
· PAC-2:	
111-30-8 glutaral	1 ppm
· PAC-3:	
111-30-8 glutaral	5 ppm
Performance to other sections	· · · · · ·

• Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

### 7 Handling and storage

• Precautions for safe handling:

Ensure good ventilation/exhaustion at the workplace. Open and handle receptacle with care.

• Information about protection against explosions and fires: Keep ignition sources away - Do not smoke.

## Trade name: Glutaraldehyde 50 % solution in water

Keep respiratory protective device available.

- $\cdot$  Conditions for safe storage, including any incompatibilities
- · Storage:
- Requirements to be met by storerooms and receptacles: Store at +2 to +8 °C
- Store only in the original receptacle.
- · Information about storage in one common storage facility: Store away from oxidizing agents.
- Further information about storage conditions: Store under lock and key and with access restricted to technical experts or their assistants only. Keep receptacle tightly sealed and store in dry conditions.
- *Specific end use(s):* No further relevant information available.

8 Exposure controls/personal protection

#### · Control parameters

· Components with limit values that require monitoring at the workplace:

111-30-8 glutaral (30-50%)

REL Ceiling limit value: 0.8 mg/m³, 0.2 ppm

- See Pocket Guide App. C TLV Ceiling limit value: 0.05 ppm
- DSEN;RSEN ;activated or inactivated, A4

• Additional information: The lists that were valid during the creation were used as basis.

#### · Exposure controls

- Additional information about design of technical systems: No further data; see item 7.
- · Personal protective equipment:
- General protective and hygienic measures:

Keep away from foodstuffs, beverages and feed.

Store protective clothing separately.

Immediately remove all soiled and contaminated clothing.

Avoid contact with the eyes and skin.

Wash hands before breaks and at the end of work.

• Breathing equipment:

Short term filter device: Filter A/P3

#### • Protection of hands:

Neoprene gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Protective gloves

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

• Material of gloves:

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material:

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

For the permanent contact of a maximum of 15 minutes gloves made of the following materials are suitable:

Neoprene gloves
