Chromopeptide with antibiotic activity. Contains 2 cyclic peptides bound to the chromophoric phenoxazone ring. Binds specifically to the minor groove of the DNA double helix, and thus prevents it from being a template for RNA synthesis. Antineoplastic agent which inhibits the growth of rapidly dividing cells. Induces apoptosis in cancer cells. Used as a selective agent in cell culture.

### ■ Agarose SERVA 3:1 molecular biology grade

CAS [9012-36-6]

EINECS 232-731-8 ♦ HS 39139000

Unique mixture of agarose formulated for high resolution of small (10 bp - 1000 bp) DNA, RNA and PCR fragments. High purity for low background even at high gel concentrations (up to 6 % in 1x TAE buffer). Optimized gel strength for easy-to-handle gels. Special quality tested for applications in molecular biology. Manufactured using an innovative organic solvent-free manufacturing process.

Gelling temperature (1.5 %) max. 36 °C  
Gel strength (1.5 %) min. 650 g/cm<sup>2</sup>  
Electro endosmosis (EEO) ≤ 0.1

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|

**Agarose SERVA Premium** molecular biology grade

CAS [9012-36-6]

EINECS 232-731-8 ♦ WGK 1 ♦ HS 39139000

For analytical and preparative gel electrophoresis of DNA/RNA fragments > 500 bp, recovery of DNA fragments for further modifications (restriction analysis, ligation reactions), blotting of nucleic acids. Special quality tested for applications in molecular biology.

Gelling temperature (1.5 %) 34 - 38 °C  
Gel strength (1.5 %) > 1100 g/cm<sup>2</sup>  
Electro endosmosis (EEO) 0.05 - 0.13

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 11381.02 | 100 g | 152,00 |
| 11381.03 | 250 g | 327,00 |

**Agarose SERVA Premium Low Melting**

molecular biology grade

CAS [9012-36-6]

EINECS 232-731-8 ♦ WGK 1 ♦ HS 39139000

For efficient separation of DNA/RNA fragments > 500 bp, best for in-gel enzymatic processing like restriction analysis, ligation reactions, PCR and others. Ideal for digestion by agarase enzymes, making it very easy to recover or to analyse large DNA fragments by cloning or other enzymatic applications. Special tested quality for applications in molecular biology.

Gelling temperature (1.5 %) 24 - 28 °C  
Gel strength (1.5 %) > 500 g/cm<sup>2</sup>  
Electro endosmosis (EEO) ≤ 0.12

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 11382.01 | 25 g  | 201,00 |
| 11382.02 | 100 g | 521,00 |

**Agarose SERVA for PCR** molecular biology grade

CAS [9012-36-6]

EINECS 232-731-8 ♦ WGK 1 ♦ HS 39139000

For analytical and preparative electrophoresis of PCR and DNA fragments > 40 bp and < 1000 bp; special quality tested for applications in molecular biology. High gel strength for better handling and enhanced visibility due to improved clarity of the gel.

Gelling temperature (1.5 %) 28 - 34 °C  
Gel strength (1.5 %) > 600 g/cm<sup>2</sup>  
Electro endosmosis (EEO) ≤ 0.12

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 11383.02 | 100 g | 374,00 |

**Agarose SERVA for PCR Low Melting** molecular biology grade

CAS [9012-36-6]

EINECS 232-731-8 ♦ WGK 1 ♦ HS 39139000

For analytical and preparative electrophoresis of PCR and DNA fragments > 40 bp and < 1000 bp. Special quality tested for applications in molecular biology. Best for fine resolution at agarose concentrations ranging from 1.8 % up to 4.5 %. Best for in-gel enzymatic processing. Ideal for digestion by agarase enzymes. Easy to recover small DNA fragments for subsequent analysis or for enzymatic modifications.

Gelling temperature (1.5 %) ca. 26 °C  
Gel strength (1.5 %) > 200 g/cm<sup>2</sup>  
Electro endosmosis (EEO) ≤ 0.10

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 11384.01 | 25 g  | 160,00 |
| 11384.02 | 100 g | 544,00 |

**Agarose SERVA High EEO**

CAS [9012-36-6]

EINECS 232-731-8 ♦ WGK 1 ♦ HS 39139000

Special preparation for immunoelectrophoresis (esp. precipitation) with relatively high electroendosmosis and low gelling point.

Gelling temperature (1.5 %) 34 - 39 °C  
Gel strength (1.5 %) > 1300 g/cm<sup>2</sup>  
Electro endosmosis (EEO) 0.23 - 0.27

**Agarose SERVA Neutral for IEF**

CAS [9012-36-6]

EINECS 232-731-8 ♦ WGK 1 ♦ HS 39139000

Premium grade for isoelectric focusing. Chemically treated agarose to neutralize residual negative charge sites, virtually eliminating electroendosmosis.

Gel strength (1.5 %) > 800 g/cm<sup>2</sup>  
Electro endosmosis (EEO) 0

| Cat.No.  | Size | EUR    |
|----------|------|--------|
| 11402.02 | 5 g  | 225,00 |

**Agarose SERVA Tablets, 0.5 g/Tablet** molecular biology grade

CAS [9012-36-6]

EINECS 232-731-8 ♦ HS 39139000

Agarose pressed into tablets of 0.5 g each. For analytical and preparative electrophoresis of DNA fragments between 200 and 20,000 bp. Special quality tested for applications in molecular biology.

There is no need to weigh the agarose. Just simply disperse the requested number of tablets in running buffer for 5 minutes at room temperature and then heat the suspension in a microwave until the material is dissolved.

The achieved gel volume per tablet for different agarose concentrations is listed below:

| % agarose                | gel volume/tablet        |
|--------------------------|--------------------------|
| 0.5 %                    | 100.0 ml                 |
| 0.75 %                   | 66.7 ml                  |
| 1.0 %                    | 50.0 ml                  |
| 1.5 %                    | 33.3 ml                  |
| 2.0 %                    | 25.0 ml                  |
| Gel. temp. (1.5 %)       | 34 - 39 °C               |
| Gel strength (1.5 %)     | > 1000 g/cm <sup>2</sup> |
| Electro endosmosis (EEO) | ≤ 0.13                   |

**Albumin Bovine** cryst. lyophil.

(BSA)

M<sub>r</sub> ca. 67 000 ♦ CAS [9048-46-8]

EINECS 232-936-2 ♦ WGK 1 ♦ HS 35029020

Storage temperature +2 °C to +8 °C

The purest form of our bovine albumins. Manufacturing includes a proprietary heat-shock fractionation process, ion exchange treatment and triple sequential crystallization, resulting in an extremely pure product. Best suited for use in highly sensitive systems requiring consistent protein background and as standard for protein quantification and molecular weight determination.

As well used as hapten carrier for antibody production, as stabilizer of enzymes and other sensitive biopolymers and in diverse molecular biology applications. Crystal form simplifies handling and weighing.

**Albumin Bovine Fraction V, pH 7.0** Life Science grade, lyophil.

(BSA)  
 M<sub>r</sub> ca. 67 000 ♦ CAS [9048-46-8]  
 EINECS 232-936-2 ♦ WGK 1 ♦ HS 35029020  
 Storage temperature +2 °C to +8 °C

Highly purified albumin ideal for use in biotechnology, cell culture, diagnostics, research and other Life Science applications. First isolated by a proprietary heat shock/organic solvent process and further purified by non-solvent based methodologies to reduce IgG and endotoxins to very low levels. Contains > 90 % monomeric albumin that retains many of the binding, transfer and physical properties of native albumin.

Purity (CAF) ≥ 98.0 %  
 pH (1 % in 0.15 NaCl) 6.8 - 7.2  
 Moisture (Lod) ≤ 5.0 %  
 Heavy metals ≤ 20 ppm  
 IgG ≤ 50 µg/g  
 Mycoplasma none detected  
 Viral agents none detected

### ■ Albumin Bovine Fraction V, Very Low Endotoxin lyophil.

(BSA)

M<sub>r</sub> ca. 67 000 ♦ CAS [9048-46-8]

EINECS 232-936-2 ♦ WGK 1 ♦ HS 35029020

Storage temperature -15 °C to -25 °C

Manufactured by a proprietary heat-shock fractionation process, using caprylic acid as an albumin stabilizer. The production process includes steps to ensure low endotoxin and IgG levels. Tested negative for mycoplasma and the bovine viruses BVD, IBR, P13, Adeno, Parvo, Rabies, Reo and Bluetongue, in accordance with 9 CFR 113.

Especially designed as nutrient in serum-free cell culture media. Suitable in perfusion media for hormone response studies and as hapten carrier for antibody production.

### ■ Albumin Bovine, 30 % Solution, Polymer Enhanced

(BSA)

M<sub>r</sub> ca. 67 000

WGK 1 ♦ HS 35029020

Storage temperature +2 °C to +8 °C

Higher avidity exclusively controlled through pure albumin polymerisation. Does not contain artificial avidity enhancers or high molecular weight agglutination potentiators (e.g. PVP, gum acacia, or dextran). Does not contain caprylic acid or other stabilizers. IgG not detectable. Suitable as diluent/stabilizer in various RIA and EIA test systems, for various serological reagents, and for cross-matching procedures and antibody screening or titration.

Storage temperature +2 °C to +8 °C

Ampicillin sodium salt is a semi-synthetic derivative of penicillin used to select for ampicillin resistance in mutated and transformed cells. Ampicillin is a β-lactam antibiotic that inhibits bacterial cell wall synthesis by inactivating transpeptidases on the inner surface of the bacterial cell membrane. The antimicrobial spectrum includes gram-positive and gram-negative bacteria. Recommended for antibacterial use in cell culture media at 100 µg/ml and in ampicillin-resistance studies at 20 - 125 µg/ml.

Solubility in water: 1 part in 2 parts H<sub>2</sub>O. A stock solution should not be autoclaved but sterilized through filtration and stored frozen where it will be stable for months. Stability of ampicillin in solution is a function of pH, temperature and the identity of the buffer. Optimal storage conditions are 2 - 8 °C and pH 3.8 - 5 where its activity is retained at >90 % for a week.

Assay 91.0 - 102.0 %

A stock solution should not be autoclaved but sterilized through filtration and stored frozen where it will be stable for months. Stability of ampicillin in solution is a function of pH, temperature and the identity of the buffer. Optimal storage conditions are 2 - 8 °C and pH 3.8 - 5 where its activity is retained at >90 % for a week.

Assay 91.0 - 102.0 %

### Ampicillin trihydrate research grade, Ph. Eur.

(6-[D(-)-α-aminophenylacetamido]penicillanic acid;  
D(-)-α-aminobenzylpenicillin)  
C<sub>16</sub>H<sub>19</sub>N<sub>3</sub>O<sub>4</sub>S·3H<sub>2</sub>O ♦ M<sub>r</sub> 403.5 ♦ CAS [7177-48-2]

**DANGER**  
H317-H334 ♦ EINECS 200-709-7 ♦ WGK 1 ♦ HS 29411000

Ampicillin is a semi-synthetic derivative of penicillin used to select for ampicillin resistance in mutated and transformed cells. β-lactam antibiotic that inhibits bacterial cell wall synthesis by inactivating transpeptidases on the inner surface of the bacterial cell membrane. The antimicrobial spectrum includes gram-positive and gram-negative bacteria. Soluble 1 part in 150 parts H<sub>2</sub>O as well as in diluted acids and bases. Insoluble in alcohol.

Assay (titr.) 96.0 - 100.5 %

### Aneurin

see 36020 Thiamine-HCl, page 135

### Annexin V-APC Apoptosis Detection Kit 100 reactions

HS 38220000

Storage temperature +2 °C to +8 °C

Annexins are a family of calcium-dependent phospholipid-binding proteins, which bind to phosphatidylserine (PS). Externalization of phosphatidylserine residues in the outer plasma membrane of apoptotic cells allows detection via Annexin V. Once the apoptotic cells are bound with labelled Annexin V, they can be visualized with fluorescent microscopy or cytometry.

Since loss of membrane integrity is a pathognomonic feature of necrotic cell death, necrotic cells will stain with specific membrane-impermeant nucleic acid dyes such as propidium iodide. The membrane integrity of apoptotic cells can be demonstrated by the exclusion of these dyes.

**Content:** 500 µl Annexin V-APC (Allophycocyanin), 50 ml 10x Binding Buffer, 1 ml propidium iodide

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|

### ■ AquaSpark™ Alkaline Phosphatase Substrate

2 mM in DMSO

M, 474.38

HS 38220000

Storage temperature +2 °C to +8 °C

AquaSpark™ Alkaline Phosphatase Substrate is an optimized, cost-effective chemiluminescent substrate for alkaline phosphatase detection in ELISA and Western and Southern Blots.

AquaSpark™ substrates offer unique advantages over the existing products as they can work as single agents without the need for enhancers, they have a higher efficiency and sensitivity over currently existing probes. Very high light levels are reached immediately after activation by phosphatase enzyme and a green light emission persists for 30 min or even hours.

AquaSpark™ Alkaline Phosphatase Substrate shows significantly higher signal intensities and very low background compared to other luminogenic alkaline phosphatase substrates.

100 µl will give 20 ml working solution.

Patent pending.

- ◆ No expensive additional enhancer necessary
- ◆ Use of significantly less substrate (1/5 or less)
- ◆ Strongest signal on the market
- ◆ Best signal-to-noise ratio – for highest sensitivity
- ◆ Long lasting signal on highest niveau

### ■ BIO-5000 Plus VIS Gel Scanner

HS 90278017

The BIO-5000 Plus VIS Gel Scanner is a dual platform scanner specially designed for scanning of electrophoresis gels and blots by visual detection. It is equipped with energy-saving LEDs and an optical CCD whose resolution is up to 4,800 dpi. The range of the optical density is between 0.05 and 3.77 OD providing a smarter way to capture differences among each layer of scanned electrophoresis gels.

With a built-in auto-focus function, BIO-5000 Plus is capable of shifting the focal length to the best position automatically for images of top quality. By the design of the Emulsion Direct Image Technology (E.D.I.T.) and holders for electrophoresis gels, it is convenient to put your BIO-5000 Plus in operation and lowers the risk of mutual infection in experiments. Therefore, BIO-5000 Plus is the best choice of scanning electrophoresis gels.

- ◆ Leak-free holder for scanning wet electrophoresis gels in transmission mode
- ◆ Scanning of stained blot membranes in reflection mode
- ◆ Energy-saving LEDs as light source
- ◆ Short warm-up times
- ◆ CCD image sensor
- ◆ Resolution up to 4,800 dpi
- ◆ Dynamic range over approx. 3.7 O.D. units
- ◆ Auto-focus for highest image quality
- ◆ Easy-to-use scanning software
- ◆ Scanning area up to 216 mm x 254 mm
- ◆ IQ/OQ/PQ and FDA CFR Part 11 ready with LabImage Software

#### Specifications:

(Bis(2-hydroxyethyl)imino-tris(hydroxy methyl) methane; BISTRIS)

C<sub>8</sub>H<sub>19</sub>NO<sub>5</sub> ♦ M, 209.24 ♦ CAS [6976-37-0]

EINECS 230-237-7 ♦ WGK 1 ♦ HS 29221985

Zwitterionic buffering substance for a pH range of 5.8 – 7.2

(1). Bis-Tris is used in biochemistry and molecular biology and is a common component of many buffer systems for electrophoresis. Since it may form a complex with some common metals, such as Cu(II) and Pb(II), formation constants should be taken into account when using this buffer in a solution containing metal ions. Bis-Tris is a substitute for the highly toxic buffer cacodylate.

**Blank PRECOTES™ PAG layer 300 µm, Size 125 x 125 mm**

DANGER

H340-H350 ♦ HS 38220000

Storage temperature +2 °C to +8 °C

Blank PRECOTES™ were developed by SERVA to provide a versatile solution to perform isoelectric focusing (IEF) of any pH range. Blank PRECOTES™ are thin (0.3 mm) polyacrylamide gels cast onto GEL-FIX™ support film that contain only BisTris buffer pH 6.5. They are given the prefix »blank« to indicate that they are (almost) »empty« gels with a matrix that can be adapted to anything the user wants it to be.

Blank PRECOTES™ are equilibrated in the ampholyte mixture of choice prior to electrophoresis. Shelf-life of Blank PRECOTES™ is at least 12 months, either as blank gels (without ampholyte) or in the equilibrated form (with ampholyte, without urea).

PRECOTES is a registered trademark of SERVA.

**BlueBlock PF (10x) for Blotting and ELISA**

HS 38220000

Protein-free, polymer-based blocking reagent, delivered as a 10x concentrate. To achieve a good signal-to-noise ratio in blotting, ELISA or other immuno assays, it is important to block nonspecific antibody binding sites on the transfer membrane. Protein based blocking solutions like skim milk or BSA solutions may not only block unspecific binding sites, but mask as well specific binding sites. With BlueBlock, the specific binding sites remain accessible while nonspecific reactions are suppressed, thus leading to an increase in signal intensity. It is suitable for colorimetric and chemiluminescence detection systems.

**BlueBlot Semi-Dry Blotter SD11**

HS 90272000

For fast and gentle electrotransfer of proteins in Western Blots.

The BlueBlot semi-dry blotter forms a homogeneous electrical field that guarantees fast and efficient transfer of proteins from gel to membrane.

As associated with semi-dry blotting compared to tank blotting less heat is generated for gentle protein transfer. It is fast and requires less buffer.

By applying the Xpress Blotting Buffer (cat. no. 42661) semi-dry transfer of high and low molecular weight proteins is done fast and efficient within 15 minutes. Moreover, all common continuous and discontinuous buffer systems can be applied without any limitation.

Anode is made from platinum-covered steel net, cathode is made from a stainless steel plate. The spring-mounted anode allows blotting of thicker gels and gel stacks. To avoid air bubbles within the blotting system the cathode carries drill holes to transport gas generated by the electro-chemically blotting process from inside to outside. The electrodes are built into a stable acrylic housing that is resistant to 10 % ethanol and easy to clean. The long-lasting electrodes can be dismantled and cleaned separately.

The BlueBlot semi-dry blotter has a blotting area of 11 cm x 11 cm. The electrode sets BB-E11 (11 cm x 11 cm) and BB-E17 (17 cm x 17 cm) are obtainable separately and fit into the same base unit. With the 17 cm x 17 cm electrode set up to 8 mini gels can be blotted simultaneously.

- ◆ Platinum-covered steel net as anode
- ◆ Spring-mounted anode for blotting stacks
- ◆ Stainless steel plate as cathode
- ◆ Blotting area: 11 cm x 11 cm
- ◆ Deployable for thicker gels and blotting stacks
- ◆ Dimensions: 31 cm x 23 cm x 11 cm
- ◆ Weight: 3 kg

| Cat.No. | Size    | EUR      |
|---------|---------|----------|
| BB-SD11 | 1 piece | 2.550,00 |

**BlueBlot Semi-Dry Blotter SD17**

HS 90272000

For fast and gentle electrotransfer of proteins in Western Blots. For more information please refer to BlueBlot Semi-Dry Blotter SD11.

The electrode sets BB-E11 (11 cm x 11 cm) and BB-E17 (17 cm x 17 cm) are obtainable separately and fit into the same base unit.

- ◆ Platinum-covered steel net as anode
- ◆ Spring-mounted anode for blotting stacks
- ◆ Stainless steel plate as cathode
- ◆ Blotting area: 17 cm x 17 cm
- ◆ Deployable for thicker gels and blotting stacks
- ◆ Dimensions: 31 cm x 23 cm x 11 cm
- ◆ Weight: 3 kg

| Cat.No. | Size    | EUR      |

### BlueClear SB for antibody stripping

HS 38220000

Storage temperature +15 °C to +30 °C

Ready-to-use buffer for efficient stripping of high-affinity antibodies from Western blot membranes after chemiluminescence detection.

Easy-to-use - Just incubate the membrane in the stripping buffer for 30-60 mins at room temperature. Hard-to-remove antibodies are efficiently stripped by incubation in heated buffer. After washing in PBST or TBST, the membrane may be blocked and probed again..

- ◆ Fast, simple and highly efficient
- ◆ Gentle
- ◆ Without  $\beta$ -mercaptoethanol or DTT
- ◆ Suitable for nitrocellulose and PVDF membranes

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 42599.01 | 250 ml | 45,00  |

| Maximum operating voltage:     | 500 V / 500 V       |
| Maximum operating current:     | 300 mA / 300 mA     |
| Approx. gel volume (5 mm gel): | 115 ml / 150 ml     |
| Possible comb positions:       | 2 / 4               |
| Maximum of loadable samples:   | 62 / 124            |
| Electrode separation:          | 28.5 cm / 28.5 cm   |
| Recommended volts per cm:      | 20 - 200 / 20 - 200 |

| Cat.No. | Size    | EUR      |
|---------|---------|----------|
| BM-200  | 1 piece | 1.200,00 |

### BlueMarine™ HTS

HS 90272000

Gel format 17.5 cm x 19.2 cm for high resolution long runs of single samples or analysis of complete 96-well microtiter plates. By changing the left/right orientation of the comb you can position the sample wells one upon the other or shifted to each other.

Contains main unit, 1 removable UV transparent gel tray, 6 aluminum combs with 17 sample wells.

#### Operational Data:

|                                |                   |
|--------------------------------|-------------------|

| Maximum operating current:     | 300 mA            |
| Approx. gel volume (5 mm gel): | 160 ml            |
| Possible comb positions:       | 6                 |
| Maximum of loadable samples:   | 102               |
| Electrode separation:          | 28.5 cm           |
| Recommended volts per cm:      | 20 - 200 V        |
| Dimensions (W x L x H):        | 19.5 x 38 x 80 cm |

| Cat.No. | Size    | EUR      |
|---------|---------|----------|
| BM-HTS  | 1 piece | 1.510,00 |

### BlueMarine™ HTS Casting Adaptor

HS 90272000

Casting stand to hand cast agarose gels for BlueMarine™ HTS electrophoresis chamber (cat. no. BM-HTS).

| Cat.No.   | Size    | EUR    |
|-----------|---------|--------|
| BM-HTS-CA | 1 piece | 495,00 |

**BlueMarine™ HTS Replacement Tray**

HS 90272000

Replacement tray for BlueMarine™ HTS .

| Cat.No.   | Size    | EUR    |
|-----------|---------|--------|
| BM-HTS-RT | 1 piece | 450,00 |

**BluePower™ 300 BLOT Power Supply**

HS 90272000

The BluePower™ 300 BLOT Power Supply (300 V, 2 A, 300 W) is suited for applications requiring high current like tank blotting or semi-dry blotting of larger protein gels. It is also compatible with separation of nucleic acids. 4 x 2 outlets, programmable.

All SERVA BluePower™ power supplies are easy-to-use, safe and reliable. They are fully overload-protected including short-circuit of outputs: an automatic power-off function stops the voltage when ground leakage is detected.

- ◆ Automatic cross-over function with constant voltage, current and power
- ◆ Programmable power supplies (9 x 9 steps)
- ◆ Free data logging, transfer and remote control via USB
- ◆ Timer function (h/Vh)
- ◆ Voltage ramp mode

| Cat.No.    | Size    | EUR      |
|------------|---------|----------|
| BP-300-BLO | 1 piece | 1.800,00 |

**BluePower™ 3000 HPE™ Power Supply**

HS 90272000

The BluePower™ 3000 HPE™ Power Supply (3000 V, 200 mA, 300 W) is designed for high voltage applications like isoelectric focusing, horizontal 2D electrophoresis. It comes with a special mode for low current applications such as IEF: the power supply can measure currents as low as 10 microAmps and keep its voltage constant at even 0 current. Other applications like SDS PAGE and submarine electrophoresis can be performed as well. 4 x 2 outlets, programmable.

All SERVA BluePower™ power supplies are easy-to-use, safe and reliable. They are fully overload-protected including short-circuit of outputs: an automatic power-off function stops the voltage when ground leakage is detected.

- ◆ Automatic cross-over function with constant voltage, current and power
- ◆ Programmable power supplies (9 x 9 steps)
- ◆ Free data logging, transfer and remote control via USB
- ◆ Timer function (h/Vh)
- ◆ Voltage ramp mode.

| Cat.No.     | Size    | EUR      |
|-------------|---------|----------|
| BP-3000-HPE | 1 piece | 2.450,00 |

**BluePower™ 600 PRiME™ Power Supply**

HS 90272000

The BluePower™ 600 PRiME™ Power Supply (600 V, 1000 mA, 300 W) is an allround instrument serving many applications, e.g. SDS PAGE, blotting and submarine electrophoresis. It is particularly advised for operation of up to four vertical slab gel units run at high voltage, also resulting in shorter running times and for blotting applications (tank blot, semi-dry blot). 4 x 2 outlets, programmable.

All SERVA BluePower™ power supplies are easy-to-use, safe and reliable. They are fully overload-protected including short-circuit of outputs: an automatic power-off function stops the voltage when ground leakage is detected.

- ◆ Automatic cross-over function with constant voltage, current and power
- ◆ Programmable power supplies (9 x 9 steps)
- ◆ Free data logging, transfer and remote control via USB
- ◆ Timer function (h/Vh)
- ◆ Voltage ramp mode.

| Cat.No.    | Size    | EUR      |
|------------|---------|----------|
| BP-600-PRI | 1 piece | 1.800,00 |

**BluePower™ 6000 IPG Power Supply**

HS 90272000

The BluePower™ 6000 IPG Power Supply (6000 V, 150 mA, 300 W) is designed for high voltage applications like isoelectric focusing in IPG strips. It comes with a special mode for low current applications such as IEF: the power supply can measure currents as low as 10 microAmps and keep its voltage constant at even 0 current. Other applications like SDS PAGE and submarine electrophoresis can be performed as well. 4 x 2 outlets, programmable.

All SERVA BluePower™ power supplies are easy-to-use, safe and reliable. They are fully overload-protected including short-circuit of outputs: an automatic power-off function stops the voltage when ground leakage is detected.

- ◆ Automatic cross-over function with constant voltage, current and power
- ◆ Programmable power supplies (9 x 9 steps)
- ◆ Free data logging, transfer and remote control via USB
- ◆ Timer function (h/Vh)
- ◆ Voltage ramp mode.

### BlueSlick™

**DANGER**  
H225-H319-H336 ♦ MAK/TRK 500 mg/m<sup>3</sup>; 200 ml/m<sup>3</sup> for isopropanol ♦ GGVSE/ADR 3 II UN1993 ♦ IATA 3 II UN1993  
♦ WGK 1 ♦ HS 38220000

Non-toxic BlueSlick™ is the alternative to silane-containing products and is non-irritant to eyes. It can be handled outside of a fume-hood. Suitable to all applications in electrophoresis (DNA sequencing, SDS PAGE, IEF PAGE). It does not affect the separation.

Supplied in a safety spray bottle made from PE, free of propellant (CFC). One spray dose dispenses a quantity of 0.7 ml BlueSlick™ reagent. BlueSlick™ coating will last for 3 to 4 electrophoresis applications.

Ready-to-use reagent for treatment of glass plates; non-toxic, prevents adhesion of gels to glass.

BlueSlick is a trademark of SERVA.

### BlueVertical™ PRiME™ Mini Slab Gel Unit

HS 90272000

The BlueVertical™ PRiME™ is a dual mini tank system to operate one or two precast gels. It accommodates SERVAGel™ TG PRiME™, all other types of SERVAGel™ and all other commercially available precast gels with an outer cassette dimension of 10 x 10 x 0.7 cm. The fixture of the inner core unit has been re-engineered to provide four robust clamps (two on both sides) that fix two precast gel cassettes properly and tightly in their correct position. This ensures that the inner buffer chamber is leak-free separated from the outer buffer compartment.

Separation of proteins by SDS PAGE, native PAGE and IEF can be carried out as well as separation of nucleic acids. The outer buffer tank works as heat sink (passive cooling by buffer), sufficient for most applications mentioned above. You may run two SERVAGel™ TG PRiME™ simultaneously at 300 Volt. The run will be completed in about 35 minutes without warming up the buffer significantly. If additional cooling is required (e. g. for IEF applications), a magnetic stirrer can be applied to help circulation of buffer fluid.

The unit consists of an outer buffer tank and the inner core running unit. Mounting of precast gels does not require any tedious clamping but is a matter of seconds. The outer buffer tank is made from rugged transparent acrylic – watch your gel while running! A safety lid closes the top, giving the unit a very compact and robust design. Little bench space is required. The unit is, of course, in accordance with the European safety guidelines (CE mark). When quality becomes an issue – choose BlueVertical™ PRiME™.

#### Specifications:

### BlueVertical™ PRiME™ Tank Blotter

HS 90272000

The BlueVertical™ PRiME™ tank blotter for vertical minigel blots combines highest quality, durability and ease of use. You can use it to blot up to two self-casted gels, SERVAGel™ pre-cast gels and commercially available ready-to-use gels.

The BlueVertical™ PRiME™ Tank Blotter is made of durable acrylic and the electrode material is tear resistant. The innovative and unique insert cassettes do not require screws or clamps. Between their base and lid, you assemble your blot and simply slide the cassettes into the inner blot unit. The device is compliant with European safety regulations (CE mark).

HS 38220000  
Storage temperature +2 °C to +8 °C

BlueZol is a ready-to-use reagent for the isolation of total RNA from various biological materials such as animal and plant tissues, cell culture and bacterial cells.

Homogenisation or lysis of a biological sample in BlueZol leads to a separation into three phases: an aqueous upper phase, an organic lower phase and an interphase. The RNA remains in the aqueous phase and its purification is followed by precipitation in isopropyl alcohol. The highly effective RNase inhibitory property of BlueZol protects the integrity of the RNA during lysis and results in the isolation of high-quality RNA. The purified RNA is ideal for any downstream applications such as RT-PCR, *in vitro* translation, Northern Blotting, RNase protection assays or dot blot hybridization.

BlueZol can be used for the simultaneous isolation of RNA, DNA and protein from one sample. The DNA remains in the interphase and the proteins in the organic phase. After purification DNA can be used for PCR and Southern Blotting and the proteins for Western Blotting.

### 5-Bromo-4-chloro-3-indolyl-phosphate-p-toluidine-salt research grade

(BCIPT)

$C_8H_6NO_2BrClP \cdot C_7H_9N$  or  $C_{15}H_{15}BrClN_2O_4P$   $\blacklozenge$  M<sub>r</sub> 433.6  
 $\blacklozenge$  CAS [6578-06-9]

EINECS 229-506-1  $\blacklozenge$  HS 29339980  
Storage temperature -15 °C to -25 °C

5-bromo-4-chloro-3-indolyl phosphate (BCIP) is a histochemical substrate for phosphatase. BCIP is used in conjunction with Nitro Blue Tetrazolium (NBT, cat. no. 30550) for the colorimetric detection of alkaline phosphatase-labelled molecules in Northern, Southern, and Western blotting, in situ hybridization, and immunohistochemistry. When incubated with alkaline phosphatase the BCIP/NBT substrate produces an insoluble, purple coloured NBT diformazan precipitate that is easily detected on membranes or tissue sections. BCIP p-toluidine salt and NBT should be solved in dimethylformamide for preparation of a stock solution.

**Stock solution:** 50 mg/ml in 100 % DMF. Store at 4 °C or -20 °C.

Staining solution for Western blots: 66  $\mu$ l NBT stock solution and 33  $\mu$ l BCIP stock solution in 10 ml staining buffer (100 mM NaCl, 5 mM MgCl<sub>2</sub>, 100 mM Tris; pH 9.5).

For added convenience ready-to-use BCIP/NBT solutions are provided: SERVAColor BCIP/NBT Blot Solution, cat. no. 15245 and BCIP/NBT Ready-To-Use Substrate for Immunohistochemistry and Blotting, cat. no. 15246.

Assay (HPLC) min. 99.0 %

**References:**

1. Wolf, P.L. et al. (1973) Clin. Chem. **19**, 1248-9

| Cat.No.  | Size   | EUR   |
|----------|--------|-------|
| 15247.03 | 500 mg | 93,00 |

### 5-Bromo-4-chloro-3-indolyl- $\beta$ -D-galactoside (X-Gal) research grade

(X-Gal)

$C_{14}H_{15}BrClNO_6$   $\blacklozenge$  M<sub>r</sub> 408.6  $\blacklozenge$  CAS [7240-90-6]

EINECS 230-640-8  $\blacklozenge$  WGK 1  $\blacklozenge$  HS 29389090

Storage temperature +2 °C to +8 °C

X-Gal is a well known histochemical substrate used to detect the  $\beta$ -galactosidase enzyme (1, 2, 3, 4, 9, 10). Identification of lac<sup>c</sup>-colonies (8). X-gal is used to distinguish recombinant plasmids from parental vectors in cloning experiments using vectors containing the lacZ or lacZ [DMvP1](-)-peptide gene (2, 3, 5). Upon hydrolysis, X-Gal yields a localized, insoluble blue precipitate making it exceptionally useful in blotting, immunocytochemical, and ELISA assays. X-Gal has been used for the detection of coliforms (*E. coli*) in municipal water supplies (6) and food products (7). X-Gal is often used in conjunction with IPTG (Isopropyl- $\beta$ -D-thiogalactopyranoside, cat. no. 26600) which binds and inhibits the lac repressor thus inducing  $\beta$ -galactosidase activity.

**Stock solution:** 20 mg/ml in DMF. Store in aliquots at -20 °C in the dark. For detection of transformants, use in final concentration of 40  $\mu$ g/ml.

Assay (HPLC) min. 99.0 %

### Bromophenol Blue-Na-salt

(3'-3''-5''-5''-Tetrabromophenol sulfonphthalein)  
 $C_{19}H_9Br_4O_5S \cdot Na$   $\blacklozenge$  M<sub>r</sub> 692.0  $\blacklozenge$  CAS [34725-61-6]

EINECS 252-170-2  $\blacklozenge$  WGK 2L  $\blacklozenge$  HS 32049000

Bromophenol Blue is a pH indicator (pH 3.4 yellow - 4.6 purple) and a tracking dye for nucleic acid or protein electrophoresis in agarose or polyacrylamide gels. Due to the slightly negative charge, the dye will migrate to the anode during electrophoresis, which allows monitoring of the movement of the molecules through the gel.

### ■ Carbonic anhydrase from bovine erythrocytes ca. 1.5 U/mg lyophil.

(Carbonate dehydratase; Carbonate hydrolyase)  
EC 4.2.1.1. ♦ M<sub>1</sub> ca. 29 000 ♦ CAS [9001-03-0]

DANGER  
H334 ♦ EINECS 232-576-6 ♦ WGK 1 ♦ HS 35079090  
Storage temperature -15 °C to -25 °C

Carbonic anhydrase preparation, which is homogeneous in SDS-PAGE. The enzyme preparation can therefore be used as a marker in protein gel electrophoresis and as a bioreagent in gel filtration chromatography, protein chromatography and plasma and blood proteins. Contains carbonic anhydrases A and B; both forms have similar high specific activities and therefore belong to the C-group of mammalian carbonic anhydrases (1). Carbonic Anhydrase is a zinc-containing enzyme that catalyzes the reversible conversion of carbon dioxide to bicarbonate. It plays a main role in physiological processes like respiration, ion transport, acid-base balance, lipid and carbohydrate metabolic pathways.

**Unit definition:** 1 U catalyzes the hydrolysis of 1 μmole 4-nitrophenyl acetate per minute at 25 °C, pH 7.6 (2).

**Activity in other units:** ca. 4000 Wilbur-Anderson units/mg (3).

H334 ♦ EINECS 232-577-1 ♦ WGK 1L ♦ HS 35079090  
Storage temperature -15 °C to -25 °C

Catalase is used for the removal of peroxides, the generation of oxygen and, in coupled systems, for the determination of metabolites e.g., uric acid (1). A very stable preparation particularly suitable for immobilization.

**Unit definition:** 1 U catalyzes the cleavage of 1 μmole hydrogen peroxide per minute to water and oxygen at 25 °C, pH 7. The decrease in hydrogen peroxide concentration can be followed spectrophotometrically at 240 nm (1).

Chloramphenicol is an antibiotic, isolated from strains of *Streptomyces venezuelae*. It blocks bacterial protein synthesis by inhibiting the peptidyl transferase activity of the 50S ribosomal subunit. The antibiotic has a broad application range against gram positive and gram negative bacteria. Chloramphenicol is used for bacterial selection and plasmid amplification in molecular biology applications and as a selection agent for transformed cells containing chloramphenicol resistance genes. A stock solution of 50 mg/ml in ethanol yield a clear, very faint yellow solution. For selection of chloramphenicol-resistant *Escherichia coli* a concentration of 30 - 50 µg/ml are typically used.

Assay (UV) 98.0 - 102.0 %

WARNING

H315-H319-H335 ♦ WGK 1 ♦ HS 29239000

3-[(3-Cholamidopropyl)dimethylammonio]-1-propanesulfonate or CHAPS is a mild, zwitterionic sulfobetaine detergent, which is non-denaturing to membrane proteins, can solubilize proteins, and disaggregate protein-protein interactions (1 - 5). Due to its zwitterionic nature, CHAPS does not exhibit a net charge between pH 2 to 12, making it also useful in ion exchange chromatography and isoelectric focusing.

CHAPS is as well suitable for enzyme immunoassay (6) and as a component of lysis buffer for tissue homogenization, in denaturing buffer in enzyme characterization and of 2D sample buffer in 2D electrophoresis. Its small micellar molecular weight and high critical micellar concentration allowing it to be removed from samples by dialysis. CMC (25 °C) 4.2 - 6.5 mM, Na (25 °C) 9 - 10

Assay (from HPLC) min. 97.0 %

Ciprofloxacin HCl is a second generation fluoroquinolone antibiotic. Fluoroquinolone antibiotics target bacterial DNA gyrase, an enzyme which reduces DNA strain during replication. Because DNA gyrase is required during DNA replication, subsequent DNA synthesis and cell division is inhibited.

Ciprofloxacin is a broad spectrum antibiotic targeting a wide variety of gram positive and gram negative bacteria. Many mycoplasma strains, inclusive *A. laidlawii*, *M. orale*, *M. hyorhinis*, *M. fermentas*, and *M. arginine*, react sensitive to ciprofloxacin. Since these strains are responsible for most of the contaminations in cell culture, it can be used for removal of mycoplasma contamination. At the recommended concentration of ca. 1 µg/ml no cytotoxic effects occur.

Ciprofloxacin HCl is freely soluble at 35 mg/ml.

Colchicine inhibits microtubule polymerization by binding to tubulin, which disrupts spindle formation during mitosis. Since increased rate of mitosis is associated with cancer cell proliferation, blocking microtubule function with colchicine has been used as an approach to anti-cancer therapy. Its mitosis-inhibiting function is also utilized to perform karyotypes in genetic studies.

Colchicine blocks chromosome segregation during meiosis. Therefore it is used to induce polyploidy (tetraploid) in plant cells.

Colchicine inhibits microtubule polymerization by binding to tubulin, which disrupts spindle formation during mitosis. Since increased rate of mitosis is associated with cancer cell proliferation, blocking microtubule function with colchicine has been used as an approach to anti-cancer therapy. Its mitosis-inhibiting function is also utilized to perform karyotypes in genetic studies. Colchicine blocks chromosome segregation during meiosis. Therefore it is used to induce polyploidy (tetraploid) in plant cells.

Assay (HPLC) 94.0 - 101.0 %

Storage temperature -15 °C to -25 °C

Collagenase catalyzes the hydrolysis of the chromo-peptide Phenylazobenzoyloxycarbonyl-Pro-Leu-Gly-Pro-D-Arg. The resulting fragment Phenylazobenzoyloxycarbonyl-Pro-Leu can be spectrophotometrically detected.

Purity (HPLC) > 97.0 %

Congo red is a benzidine-based anionic diazo dye, which binds to many amyloid proteins and also interacts with β-D-glucans, polysaccharides containing continuous β-(1→4)-linked D-glucopyranosyl units and some hemicellulosic galactoglucomannans. Tested for use in histology. Indicator pH 3.0 - 5.2 blue-reddish orange.

CAS [6104-58-1]

EINECS 228-058-4 ♦ WGK 2L ♦ HS 32041200

Coomassie® Brilliant Blue G 250 is a triphenylmethane dye used in protein gel electrophoresis for detection of proteins and with the Bradford Method to determine protein concentration. G 250 is differentiated from the R 250 Coomassie stain by the addition of two methyl groups and the slightly greenish tint to its blue color. The dye may exist as a cation (red form) at a pH below 0 with an absorbance peak at 470 nm, an anion (blue form) at a pH above 2 with an absorbance peak at 595 nm, and a neutral, green form at a pH around 1 with an absorbance peak around 650 nm. The blue, anionic form is what binds with amino acid residues, such as arginine or aromatics, to form a stable complex. Corresponds to SERVA Blue G (cat. no. 35050).

Crystal Violet is used for differentiation of Gram-negative versus Gram-positive bacteria, to check cell viability, staining of cells to study cell migration and invasion and of plant chromosomes.  
 This dye is chemically homogeneous and well-defined, particularly recommended for Flemming and gram-staining because of reproducible results. Commercial preparations usually contain components of reddish tinge like methyl violet 2B. Indicator pH 0.0 - 1.8.

**CTAB**

see 16530 Cetyltrimethylammonium-bromide, page 24

**CTAB DNA Extraction Buffer** molecular biology grade

HS 38220000

Cetyltrimethylammonium-bromide (CTAB) is a non-ionic detergent, which forms insoluble complexes with nucleic acids if the sodium chloride concentration in the solution is around 0.5 M. Polysaccharides, phenolic components and other enzyme-inhibiting impurities from lysates of plant cells can be effectively removed with the CTAB lysis buffer (1).  
 Contains 2 % CTAB, 20 mM EDTA·Na<sub>2</sub>·2H<sub>2</sub>O, 1.4 mM NaCl and 100 mM Tris, pH 8.

 Storage temperature +2 °C to +8 °C

Glutarimide antibiotic isolated from *Streptomyces griseus*; active against fungi and yeasts, but not against bacteria. Inhibits eukaryotic protein synthesis by blocking the translocation step in the elongation cycle (1,3,8). Blocks translation of mRNA on cytosolic but not on mitochondrial or chloroplast ribosomes (2,4,6).

Assay (HPLC) min. 90.0 %  
 MP 98 - 112 °C

Actidione = registered trademark of Upjohn.

Storage temperature +2 °C to +8 °C

3,3'-Diaminobenzidine tetrahydrochloride (DAB) is a substrate for peroxidases, especially for horseradish peroxidase (HRP). DAB is used for histology and ultrahistochemistry (1) and demonstration of ultrastructural peroxidase (2).

It serves as a hydrogen donor in the presence of peroxide in the peroxidase reaction. The oxidized DAB forms an insoluble brown end-product, which can be detected in visible light and does not bleach during long-term storage.

**Stock solution:** 10 - 20 mg/ml in 50 mM Tris buffer, pH 7.3 (store in aliquots at -20 °C), working solution: 0.5 - 1 mg/ml in buffer (PBS, TBS, pH 7.0 - 7.6) containing 0.01 % hydrogen peroxide.

Vials under argon.

$C_2H_6OS$   $\diamond$   $M_r$  78.1  $\diamond$  CAS [67-68-5]

MAK/TRK 160mg/m<sup>3</sup>  $\diamond$  EINECS 200-664-3  $\diamond$  WGK 1L  $\diamond$  HS 29309099

Dimethyl sulfoxide (DMSO) is a highly active solvent and pharmaceutical vehicle. In cell culture DMSO is used for freezing cells.

The solvent is as well applied in gradient centrifugation (1) and determination of cysteine and cystine in proteins (2).

Assay min. 99.0 %  
MP min. 18.0 °C  
d20 °C 1.1  
Water (KF) max. 0.3 %

 HS 29309099

Storage temperature +2 °C to +8 °C

Dithiothreitol, as well called DTT or Cleland's reagent, is a widely used reagent for maintaining thiol (SH) groups in reduced state. DTT quantitatively reduces disulfide groups (1) and is effective in sample buffers for reducing protein disulfide bonds prior to SDS gel electrophoresis (SDS-PAGE). It is not only less pungent and less toxic than 2-mercaptoethanol, but as well a seven fold lower concentration of DTT (100 mM) than of 2-mercaptoethanol (5 % v/v, 700 mM) is needed. DNase/RNase not detected. Oxidized DTT max. 0.5 %. Hygroscopic.

Assay (titr.) min. 99.0 %  
 MP 40 - 45 °C

### 2-Dodecenylsuccinic acid anhydride pract.

(DDSA; 2-Dodecenylsuccinic anhydride;  
EPON hardener DDSA)

$C_{16}H_{26}O_3$  ♦ M<sub>r</sub> 266.38 ♦ CAS [25377-73-5]

WARNING

H315-H319-H335 ♦ EINECS 246-917-1 ♦ WGK 2 ♦ HS 29171980

2-Dodecenylsuccinic acid anhydride (DDSA) is used as hardener for epoxy resins like Glycid ether 100 (Epon 812), one of the most widely used embedding media in electron microscopy.

Glycid ether cured with DDSA alone will result in rather soft blocks. The combination of DDSA with the hardener methyl nadic anhydride (MNA) in varying proportions enables the production of blocks of desired hardness.

Storage temperature -15 °C to -25 °C

E-64 is an irreversible and highly selective cysteine (thiol) protease inhibitor during isolation and purification of proteins and enzymes. It inhibits calpain activation.

The inhibition of thiol proteases by E-64 appears to be of a non-competitive nature between the SH components. The trans-epoxysuccinyl group (active moiety) of E-64 irreversibly binds to an active thiol group in many cysteine proteases, such as papain, actinidase, and cathepsins B, H, and L to form a thioether linkage. E-64 does not inhibit serine proteases (except trypsin) like other cysteine protease inhibitors. It does not react with the functional thiol group of non-protease enzymes.

E-64 can be used as a ligand for affinity purification of cysteine proteases. Although binding of the inhibitor is no longer irreversible, the specificity is retained. Effects on metastasis formation in mice (5).

**Stock solution:** 1 mM aqueous solution

**Working solution:** 1 to 10 μM

Aqueous stock solutions are stable for months at -20 °C. Diluted solutions are stable for days at neutral pH. E-64 is also soluble in DMSO, a 10 mM solution can be prepared in dry DMSO and stored at -20 °C. Dilutions can be made in culture medium or in 0.9 % sodium chloride for injection.

Assay (HPLC) min. 99.0 %

Storage temperature -15 °C to -25 °C

For the degradation of proteins and peptides.

Serine proteinase with broad substrate specificity. It preferentially cleaves peptide bonds at the carbonyl end of amino acid residues with small hydrophobic side chains, such as glycine, valine, leucine, isoleucine, and particularly alanine. This specificity explains its unique ability to digest native elastin, which is found in highest concentrations in the elastic fibers of connective tissues. Therefore elastase in combination with other enzymes like trypsin is frequently used to dissociate tissues which contain extensive intercellular fiber networks.

Elastase is also able to digest other proteins such as fibrin, hemoglobin, and casein, but not native collagen and keratin. In the presence of Tris, sodium sulfate or SDS enzyme activity is greatly stimulated.

**Unit definition:** One unit will hydrolyze one micromole of methoxy succinyl-alanine-alanine-proline-valine-p-nitroanilide per minute at 37 °C and pH 7.5.

Epoxy cyclohexylmethyl-3,4-epoxycyclohexylcarboxylate (ERL-4221D) is a cycloaliphatic epoxy resin used as an embedding medium for electron microscopy.

ERL-4221D is a less toxic substitute for the classical SPURR embedding medium component ERL 4206. SPURR-Mixture has a low viscosity which facilitates rapid penetration into tissues. It is often used for highly vacuolated plant cells and tissues with hard lignified cell walls, for brain tissue as well as for tissues with dense structures like minerals and bones.

Epoxy equivalent weight 126 - 135  
Viscosity (25 °C) 220 - 250 mPa·s  
Density (g/ml) 1.159 - 1.174

### Endo F3, recombinant lyophilized

(Endo-β-N-acetylglucosaminidase F3, Endoglycosidase)

M<sub>r</sub> 36.000

HS 35079090

Storage Temperature: +15 °C to +30 °C

Endo F3, recombinant endo-β-N-acetylglucosaminidase F3 from *Flavobacterium meningosepticum*, cleaves in β(1-4) link in between the two core GlcNAcs of asparagine linked glycans. Endo F3 cleaves this link on core-fucosylated structures. The enzyme can be applied to workflows alone or in conjunction with PNGase F to allow for structural characterization of core-fucosylated glycans in tissues while maintaining spatial localization. Especially designed and tested for mass spectrometry imaging and HPLC/UPLC

Contains a His-tag for easy removal by affinity chromatography

Because the enzyme is lyophilized, there is no need for refrigerated transport and storage is at room temperature. Concentration after reconstitution: 8 μg/ml in 100 μl H<sub>2</sub>O dest.

**Unit definition:** Human IgG (10 μg) is incubated with 1 μL of Endo F3 for 60 minutes at 37 °C and then analyzed by SDS-PAGE. Fully glycosylated IgG heavy chain migrates at approximately 50 kDa. Loss of glycan results in a 2.5 kDa shift that can be observed following staining with Coomassie Brilliant Blue™.

■ **Endo S, recombinant** lyophilized

(Endo-β-N-acetylglucosaminidase S, Endoglycosidase)  
M<sub>r</sub> 108.000

HS 35079090

Storage Temperature: +15 °C to +30 °C

Endo S, a recombinant endo-β-N-acetylglucosaminidase S from *Streptococcus pyogenes*, plays a central role in glycoengineering strategies for the development of IgG antibodies with improved therapeutic efficacy. This enzyme will leave any human IgG with a single N-Acetylglucosamine, with or without an attached fucose molecule.

Especially designed and tested for mass spectrometry imaging and HPLC/UPLC. Outstanding performance — produces in HPLC clean peaks with very high yields. Contains a His-tag for easy removal by affinity chromatography.

The endoglycosidase Endo S has a unique accuracy for cleaving the N-linked glycans from the chitobiose core of the heavy chain of native IgG molecules. The enzyme hydrolyzes the β(1-4) linkage between the two core GlcNAcs of asparagine linked biantennary complex-type glycans of human IgG Fc regions.

Because the enzyme is lyophilized, there is no need for refrigerated transport and storage is at room temperature. Concentration after reconstitution: 200 u/μl (1.0 mg/ml) in 10 μl/50 μl/100 μl H<sub>2</sub>O dest. Delivered with 10x reaction buffer.

**Unit definition:** One unit of reconstituted Endo S will catalyze the deglycosylation of 10 μg of IgG in 60 minutes at 37 °C. One unit is equal to 1 IUB milliunit.

| Cat.No.  | Size   | EUR    |

■ **Endoproteinase Glu-C, recombinant** sequencing grade

(V8 protease)

3.4.21.19 ♦ CAS [66676-43-5]

HS 35079090

Storage temperature -15 °C to -25 °C

Due to its highly specific cleavage of peptides the serine protease Glu-C (*S. aureus* V8) is used to produce protein digests for peptide mapping applications or protein identification by peptide mass fingerprinting or MS/MS spectral matching.

The specificity of Glu-C is primarily determined by the buffer pH and composition. Using phosphate buffers (pH 7.8), Glu-C will cleave at both glutamyl and aspartyl bonds. Ammonium bicarbonate buffer (pH 7.8) will lead to a preferential cleavage of glutamyl bonds. The presence of proline residues on the carboxy side of the peptide bond inhibits the cleavage.

- ♦ High specificity, purity and stability
- ♦ Recombinant - animal origin material free, consistent lot-to-lot quality

### Ethylene glycol bis(2-aminoethylether)-N,N,N',N'-tetra acetic acid analytical grade

(EGTA; Chel-De; Egtazic acid; Ethylene-bis(oxyethylene-nitrilo)-tetraacetic acid)

$C_{14}H_{24}N_2O_{10}$  ♦  $M_r$  380.35 ♦ CAS [67-42-5]

EINECS 200-651-2 ♦ HS 29225000

Ethylene glycol bis(2-aminoethylether)-N, N, N', N'-tetra acetic acid (EGTA) is an unspecific protease inhibitor like EDTA, but with a high selectivity for  $Ca^{2+}$  over  $Mg^{2+}$ . Inhibition results from chelating of metal ions leading to their removal from the surrounding medium. An excess of  $Ca^{2+}$  or  $Mg^{2+}$  compensates the inhibitory effect of EGTA.

Assay (titr.) min. 99.0 %

**Excellent Gel Kit 7.5 % for 1D SDS PAGE**

HS 38220000

Storage temperature +2 °C to +8 °C

The ready-to-use precast horizontal Excellent gels are the ideal tool to run high resolution horizontal SDS PAGE. Up to 25 samples can be run in one gel, sample volume is 15 µl. The thin gel layer and running conditions at temperature-controlled 15 °C enable high resolution of protein bands, fast staining/destaining and much easier handling compared to vertical PAGE. Due to the horizontal method, low buffer consumption is an extra plus in comparison with operating a vertical system. The standard support film is recommended for Coomassie® or silver staining. For fluorescence detection of proteins, gels cast on a non-fluorescent support film are available. The Excellent Gel Kits are the ideal alternative for ExcelGel™ for SDS PAGE from GE. The gels have been developed in Heidelberg in close co-operation with researchers formerly using GE's ExcelGels™ ensuring comparable results.

Contains: 4 film-backed precast 7.5 % T SDS PAGE gels with a Tris/acetate buffer system (size: 260 x 125 x 0.43 mm, 25 slots for 15 µl) and a SDS PAGE buffer kit. For run in horizontal flatbed chambers like HPE™ BlueTower, HPE™ BlueHorizon and Multiphor II™.

**Excellent Gel Kit 12.5 % for 1D SDS PAGE**

HS 38220000

Storage temperature +2 °C to +8 °C

The ready-to-use precast horizontal Excellent gels are the ideal tool to run high resolution horizontal SDS PAGE. Up to 25 samples can be run in one gel, sample volume is 15 µl. The thin gel layer and running conditions at temperature-controlled 15 °C enable high resolution of protein bands, fast staining/destaining and much easier handling compared to vertical PAGE. Due to the horizontal method, low buffer consumption is an extra plus in comparison with operating a vertical system. The standard support film is recommended for Coomassie® or silver staining. For fluorescence detection of proteins, gels cast on a non-fluorescent support film are available. The Excellent Gel Kits are the ideal alternative for ExcelGel™ for SDS PAGE from GE. The gels have been developed in Heidelberg in close co-operation with researchers formerly using GE's ExcelGels™ ensuring comparable results.

### ■ FICOLL™ 400

M<sub>r</sub> 300 000 - 500 000 ♦ CAS [26873-85-8]

WGK 1 ♦ HS 39139000

Suited for preparation of continuous and discontinuous density gradients. For stabilization of membrane-bound particles, isolation of lymphocytes. Dialyzable material (including NaCl) max. 1 %. Better osmotic properties than sucrose, it preserves functional and morphological integrity and does not penetrate biological membranes.

FICOLL™ 400 is a neutral, highly branched, hydrophilic polymer of sucrose which dissolves readily in aqueous solution. Concentrations up to 50 % (w/v), covering a density range up to 1.2 g/ml, can be obtained without exceeding normal osmolarity.

*FICOLL = trademark of GE Healthcare companies.*

### ■ 1 ml FliQ Column

HS 38220000

Empty 1 ml FPLC chromatography column.

Both ends of the FliQ columns have 10.32 UNF threads which fit all common chromatography instruments. Pack your own resin into these columns. Separate your proteins using an FPLC, HPLC, low pressure pump or a syringe. Use your own resins or use our own high capacity, high flow rate resins e.g. Protein A Agarose, Protein G Agarose, Ni-Superflow, Resin.

#### Specifications

Bead volume: 1 ml resin

Simple packing procedure

Universal 10.32 UNF threads

Compatible with FPLC &amp; HPLC

Flow rate: 0.5 to 2 ml/min

Stability: pH 2 - 14

Max. pressure: 70 psi (5 bar)

10.32 packing connector sold separately (cat. no. 42282.01)

| Cat.No.  | Size    | EUR   |

**Fluorescence Gel Scanner**

HS 90278017

Bio-1000F is an innovative, user-friendly and cost-effective fluorescence gel imager that integrates image capture, gel preview, and gel extraction essential for routine nucleic acid and protein gel electrophoresis. With the combination of high-sensitivity CCD system and Blue-LED illuminators, Bio-1000F is compatible with all EtBr-alternative fluorescent stains and provides the publication-quality image up to 0.04 ng per band, significantly enhancing the fluorescent signal expression over other gel documentation systems dependent on UV and Blue-LED light sources. Moreover the scanner allows to detect proteins pre-labelled with SERVA Lightning Red and other fluorescent dyes that are excited with blue light and emitting above 520 nm with a sensitivity of about 1 ng protein/band (for SERVA Lightning Red). Incorporating removable filter plate and intuitive MiBioFluo software interface, users can visualize banding pattern and conduct gel extraction directly on Bio-1000F for more convenient operation without movement between trans-illuminator and gel imager. The compact design especially enables Bio-1000F to fit in crowded laboratory space. Bio-1000F features an integrated, environmental friendly, and ultra-sensitive gel imager for researchers, dedicated to improve the laboratory safety and gel electrophoresis process efficiency.

**Fluorobind Membrane, surface PVDF**

Pore size 0.2 µm, format: 25 cm x 3 m

HS 39219090

Fluorobind membranes are based on PVDF-type chemistry and show an excellent protein binding capacity. They are not only suitable for all standard applications in protein analysis, but as well for special applications like fluorescence detection and protein sequencing. The pore size of 0.2 µm is ideal for blotting of proteins of lower molecular weight and peptides, but can as well be used for larger proteins. The membranes feature a high sensitivity with low background in all common detection systems. The high mechanical stability facilitates handling and allows multiple stripping of the membrane and harsh washing conditions.

**■ G 418 solution sterile filtered**

HS 38220000

Storage temperature -15 °C to -25 °C

Stock solution, for cell culture, biochemistry and molecular biology. Formulated to contain 50 mg/ml G 418 base in deionized water. 50 mg G 418 base are approx. 70 mg G 418 sulfate (based on dry weight). The working concentration has to be established for every cell type. Bacteria and algae require 5 µg/ml or less while animal cells may require 300 - 500 µg/ml.

G 418 is an aminoglycoside antibiotic from *Micromonospora rhodorangea*. Used for the selection and maintenance of eukaryotic cells expressing the neomycin resistance gene (neo). G418 blocks polypeptide synthesis by inhibiting the elongation step. It is similar in structure to gentamycin B1 but active against both bacteria and eukaryotes.

C<sub>20</sub>H<sub>40</sub>N<sub>4</sub>O<sub>10</sub> · 2H<sub>2</sub>SO<sub>4</sub> ♦ M<sub>r</sub> 692.7 ♦ CAS [108321-42-2]

**DANGER**  
H317-H334 ♦ WGK 3 ♦ HS 29419000

Aminoglycoside antibiotic from

*Micromonospora rhodorangea*. Used for the selection and maintenance of eukaryotic cells expressing the neomycin resistance gene (neo). G418 blocks polypeptide synthesis by inhibiting the elongation step. It is similar in structure to gentamycin B1 but active against both bacteria and eukaryotes.

Potency min. 650 µg/mg

Geneticin = trademark of LTI.

### ■ Gelrite®

(Agar Substitute; K9A-40; Gellan-Gum)

CAS [71010-52-1]

EINECS 275-117-5 ♦ WGK 1 ♦ HS 39131000

Highly-purified polysaccharide produced by bacteria. Useful alternative to agar for the in vitro culture of many plants and in microbiological culture media.

High salt concentrations increase gelling temperature and polymerisation is enhanced in the presence of bivalent cations.

- ◆ Yields very clear gels
- ◆ Consistent quality from lot to lot
- ◆ Economical, because only about half the amount of agar is required
- ◆ Reduced gel preparation time
- ◆ Stable at high temperature and withstands repeated autoclaving

*Gelrite = registered trademark of Merck & Co., Inc. USA*

DANGER

H317-H334-H361D ♦ WGK 1 ♦ HS 38220000

Storage temperature -15 °C to -25 °C

Formulated to contain 50 mg/ml gentamycin base in deionized water. 50 mg gentamycin base correspond to approx. 50 000 units of gentamycin and are approx. 80 mg gentamycin sulfate. Gentamycin is an aminoglycoside antibiotic complex from *Micromonospora purpurea* and consists of closely related compounds: gentamycin C1, C1a, C2, C2a and C2b. Inhibits bacterial protein synthesis by binding to the ribosomal 30S subunit and causing misreading of mRNA (in a similar way as streptomycin).

Broad spectrum antibiotic which inhibits growth of many gram positive and gram negative bacteria including strains which are resistant to chloramphenicol, kanamycin or tetracycline. Frequently used in cell culture, often in combination with amphotericin B, nystatin or penicillin G.

Storage temperature -15 °C to -25 °C \*

Glucose oxidase is used in the enzymatic determination of D-glucose in solution. Glucose oxidase oxidizes β-D-glucose to D-gluconolactate and hydrogen peroxide. Horseradish peroxidase is then used as the coupling enzyme for glucose determination. Although glucose oxidase is specific for β-D-glucose, solutions of D-glucose can be quantified as α-D-glucose will mutarotate to β-D-glucose as the β-D-glucose is consumed by the enzymatic reaction.

**Unit definition:** 1 U catalyzes the oxidation of 1 μmole glucose to glucuronic acid per minute at 25 °C, pH 7 coupled with peroxidase and o-dianisidine (2).

For the determination of L-glutamate, ammonia and 2-oxoglutaric acid (1, 2). Suitable for urea determination in conjunction with urease (cat. no. 37799). In 50 % glycerol.

25 mg correspond to approx. 1 ml, 100 mg correspond to approx. 4 ml.

**Unit definition:** 1 U catalyzes the reductive amination of 1 μmole 2-oxoglutarate per minute at 25 °C, pH 7.3 in the presence of ADP.

**Activity in other units:** ca. 40 U/mg protein (1 U causes the transformation of 1 μmole 2-oxoglutarate per minute at 25 °C and pH 7.3 under assay conditions not containing ADP).

**Extraneous activities:** LDH, MDH each max. 0.01 %; Ammonium ions less than 0.001 μmole per unit.

(GSSG)

C<sub>20</sub>H<sub>32</sub>N<sub>2</sub>O<sub>12</sub>S<sub>2</sub> ♦ M<sub>r</sub> 612.64 ♦ CAS [27025-41-8]

EINECS 248-170-7 ♦ WGK 1 ♦ HS 29309016

Storage temperature +2 °C to +8 °C

L-Glutathione oxidized (GSSG) is the dimeric form of glutathione (GSH). In vivo GSSG is reduced by the NADPH-dependent enzyme glutathione reductase. The ratio of GSH to GSSG is often used to measure the level of oxidative stress in cells, with higher concentrations of GSSG implying more oxidative stress.

Assay (HPLC) min. 98.0 %  
[α] 20 °C/D (c=4 % in water) -106.0 ° to -96.0 °

EINECS 200-725-4 ♦ WGK 2L ♦ HS 29309016

Storage temperature +2 °C to +8 °C

Suitable to elute GST-tagged proteins from glutathione-agarose beads.

L-Glutathione reduced (GSH) is an antioxidant that helps to protect cells from reactive oxygen species such as free radicals and peroxides. By acting as an electron donor, glutathione reduces any disulfide bond formed within cytoplasmic proteins to cysteines.

Assay (CE) min. 97.5 %  
MP 182 - 192 °C  
[α] 20 °C/D (c=4 % in water) -15.5 ° to -17.5 °

**Glutathione Agarose Resin**

(GST-Tag Purification)

HS 38220000

The resin permits rapid, mild and highly selective purification of GST fusion proteins with a one step procedure. The recovery rate is more than 95 % and the mild conditions retain the biological activity of the isolated proteins. Handling is easy and identical to standard protocols of other manufacturers, therefore there is no need to change established protocols. Suitable for isolation of small and large proteins tagged with GST in batch or column purifications.

Binding capacity: > 8 mg recombinant GST/ml gel.

**Gravity Blotter**

HS 90272000

The SERVA Gravity Blotter has been developed by SERVA to blot film-based IEF and SDS PAGE gels at high efficiency. When performing horizontal gel electrophoresis the gel layer has to be stabilized by a backing, either by glass or plastic. This backing has to be removed before transferring the separated proteins onto a membrane by tank or semy-dry blotting. During this laborious process, the gel could get damaged. The use of the Gravity Blotter renders separating gel and film backing unnecessary. The results are comparable to tank or semi-dry transfer methods.

The unit consists of a base plate with a transfer area of 14 x 29 cm. The pressure is provided by aluminum plates that are placed on top of the blotting stack. Transfer time is 4 h or overnight.

WARNING

H315-H319-H335 ♦ EINECS 208-237-3 ♦ WGK 2L ♦ HS 32030010

Hematoxylin or Haematoxylin, a basophilic dye extracted from the tree *Haematoxylum campechianum*, is often used together with eosin (H&E stain) in histological study under light microscope. The dye is also used alone as a nuclear counterstain in immunohistochemistry. To produce a functional dye, hematoxylin is oxidized to hematein and subsequently is bound to one of several metal ions including aluminum (Al+3), iron (Fe+3) and chromium (Cr+3). Tested for use in Delafield-Heidenhain staining.

#### Specifications

Column volume: 1 ml resin  
Column construction: Polypropylene  
Resin: Super Co-NTA Agarose  
Base matrix: 7.5 % cross-linked agarose  
Co-NTA capacity: 40 - 50 mg (per 1 ml resin)  
Flow rate: 1 ml/min  
Max. pressure: 0.5 MPa (72 psi)  
Universal 10.32 (1/16") UNF threads: Inlet Female/Outlet Male  
Dimensions: 15 x 80 mm

| Cat.No.  | Size     | EUR    |
|----------|----------|--------|
| 42288.01 | 5 pieces | 227,00 |

### 5 ml HiFliQ Co-NTA FPLC Column

HS 38220000

Protein Ark HiFliQ columns pre-packed and ready to use with pre-charged Cobalt-NTA Agarose Resin for affinity purification of poly-histidine tagged recombinant proteins by immobilized metal ion affinity chromatography (IMAC).

Available in 1 ml and 5 ml HiFliQ column sizes with high binding capacity and minimal ion leakage. Compatible with all common chromatography HPLC and FPLC instruments, and low pressure pumps and syringes using an appropriate adaptor.

#### Specifications

Column volume: 5 ml resin  
Column construction: Polypropylene  
Resin: Super Co-NTA Agarose  
Base matrix: 7.5 % cross-linked agarose  
Co-NTA capacity: 40 - 50 mg (per 1 ml resin)  
Flow rate: 1 - 5 ml/min (5 ml)  
Max. pressure: 0.5 MPa (72 psi)  
Universal 10.32 (1/16") UNF threads: Inlet Female/Outlet Male  
Dimensions: 23 x 80 mm

| Cat.No.  | Size    | EUR    |

### 1 ml HiFliQ GST FPLC Column

HS 38220000

Protein Ark HiFliQ columns pre-packed and ready to use with Glutathione coupled agarose resin for rapid affinity purification of Glutathione S-Transferase (GST)-tagged proteins under native conditions.

Available in 1 ml and 5 ml HiFliQ column sizes with high ligand density and high binding capacity. Compatible with all common chromatography HPLC and FPLC instruments (including ÄKTA™ FPLCs), and low pressure pumps and syringes using an appropriate adaptor.

#### Specifications

Column volume: 1 ml resin  
Column construction: Polypropylene  
Resin: Glutathione Agarose  
Base matrix: Agarose  
GST capacity: 10 mg (per 1 ml resin)  
Flow rate: 1 ml/min  
Max. pressure: 0.5 MPa (72 psi)  
Universal 10.32 (1/16") UNF threads: Inlet Female/Outlet Male  
Dimensions: 15 x 80 mm

### ■ HPE™ BlueHorizon™

HS 90272000

The HPE™ BlueHorizon™ is a flatbed system for horizontal electrophoresis using precast gels, self-cast gels and gel strips. Main applications are isoelectric focusing (IEF) including the run of IPG strips (like SERVA IPG BlueStrips) in 2D PAGE and SDS PAGE, but also the separation of nucleic acids in polyacrylamide gels.

The unit consists of a stable metal housing and an integrated drawer. The drawer holds the cooling plate with connectors for the external refrigeration system (e.g. the circulatory refrigerator bath HPE™ Cooling Unit, cat. no. HPE-CU1). The cooling plate is made from special ceramic material (maximum gel size 260 x 205 mm) for efficient cooling. It provides even heat dissipation, allowing to run gels at a temperature as low as 4 °C. This is particularly important when applying high voltage to thin isoelectric focusing (IEF) gels.

The electrode lid comes with one pair of platinum electrodes. Three fixed electrode positions allow the usage of a wide range of different sized gels. Optional, an electrode lid with a triple electrode arrangement for bi-directional gel run is available. The easy-to-clean housing allows placing the power supply on top of the unit saving valuable space on your bench.

- ◆ High capacity cooling plate suitable for high voltage applications like IEF etc.
- ◆ Fixed platinum electrode distances of 270 mm, 195 mm and 115 mm
- ◆ For all kinds of film-backed flatbed gels, self or precast
- ◆ Samples are easy to load
- ◆ Economical reagent usage (minimizing running buffer volume)
- ◆ Smart design - made in Germany

HPE™ BlueHorizon™ – a highly sophisticated instrument to run horizontal gels under reliable temperature control.

| Cat.No. | Size    | EUR      |
|---------|---------|----------|
| HPE-BH  | 1 piece | 7.750,00 |

### ■ HPE™ BlueHorizon™ Bidirectional, with 3 Electrode Lid

HS 90272000

The HPE™ BlueHorizon™ is a flatbed system for horizontal electrophoresis using precast gels, self-cast gels and gel strips. Main applications are isoelectric focusing (IEF) including the run of IPG strips (like SERVA IPG BlueStrips), 2D PAGE and SDS PAGE, HCP analysis and separation of recombinant proteins/antibodies, but also the separation of nucleic acids in polyacrylamide gels.

The unit consists of a stable metal housing and an integrated drawer. The drawer holds the cooling plate with connectors for the external refrigeration system (e.g. the circulatory refrigerator bath HPE™ Cooling Unit, cat. no. HPE-CU1). The cooling plate is made from special ceramic material (maximum gel size 260 x 205 mm) for efficient cooling. It provides even heat dissipation, allowing to run gels at a temperature as low as 4 °C. This is particularly important when applying high voltage to thin isoelectric focusing (IEF) gels.

The electrode lid comes with a triple electrode arrangement for bi-directional gel runs. The easy-to-clean housing allows placing the power supply on top of the unit saving valuable space on your bench.

- ◆ High capacity cooling plate suitable for high voltage applications like IEF etc.
- ◆ Fixed platinum electrode distances of 270 mm, 195 mm and 115 mm
- ◆ For all kinds of film-backed flatbed gels, self or precast
- ◆ Samples are easy to load

| HPE-BH3E | 1 piece | 8.050,00 |

### ■ HPE™ BlueHorizon™ Tridirectional, with 4 Electrode Lid

HS 90272000

Instead of the standard electrode lid, this version of the HPE™ BlueHorizon™ comprises a special lid with a four electrode arrangement for tri-directional gel runs.

HPE™ BlueHorizon™ – a highly sophisticated instrument to run horizontal gels under reliable temperature control.

| Cat.No.  | Size    | EUR      |
|----------|---------|----------|
| HPE-BH4E | 1 piece | 8.350,00 |

### ■ HPE™ BlueHorizon™ C

HS 90272000

HPE™ BlueHorizon™ C includes:

- ◆ HPE™ BlueHorizon™ flatbed chamber (cat. no. HPE-BH)
- ◆ HPE™ Cooling Unit (cat. no. HPE-CU1)

| Cat.No. | Size    | EUR       |
|---------|---------|-----------|
| HPE-BHC | 1 piece | 12.050,00 |

### ■ HPE™ BlueHorizon™ Double Deck

HS 90272000

The HPE™ BlueHorizon™ Double Deck consists of two single HPE™ BlueHorizon™ flatbed chambers that can be easily combined to a mini tower to double the gel running capacity. To operate the system, both units can be connected to one chiller (cat. no. HPE-CU) and to one power supply (cat. no. BP-3000-HPE).

| Cat.No. | Size    | EUR       |
|---------|---------|-----------|
| HPE-BHD | 1 piece | 15.500,00 |

■ HPE™ BlueHorizon™ PS

HS 90272000

HPE™ BlueHorizon™ PS includes:

- ◆ HPE™ BlueHorizon™ flatbed chamber (cat. no. HPE-BH)
- ◆ BluePower™ 3000 Volt Power Supply (cat. no. BP-3000-HPE)

| Cat.No. | Size    | EUR       |

| HPE-BHSYS | 1 piece | 14.500,00 |

■ HPE™ BlueHorizon™ Triple Deck

HS 90272000

The HPE™ BlueHorizon™ Triple Deck consists of three single HPE™ BlueHorizon™ flatbed chambers that can be easily combined to a mini tower to triple the gel running capacity. To operate the system, all three units can be connected to one chiller (cat. no. HPE-CU) and to one power supply (cat. no. BP-3000-HPE).

| Cat.No. | Size    | EUR       |
|---------|---------|-----------|
| HPE-BHT | 1 piece | 23.250,00 |

■ HPE™ BlueTower

HS 90272000

The HPE™ BlueTower allows electrophoretical separations of up to four horizontal flatbed gels at the same time. It is used for 1D and 2D electrophoresis gels. For more information please refer to „HPE™ Blue Tower System“ (cat. no. HPE-TS2).

| Cat.No. | Size    | EUR       |
|---------|---------|-----------|
| HPE-T02 | 1 piece | 33.500,00 |

■ HPE™ BlueTower System

HS 90272000

The HPE™ BlueTower System allows electrophoretical separations in up to four horizontal gels at the same time. It is used for 1D and 2D electrophoresis gels, where multiple runs are an important demand. Structurally, the HPE™ BlueTower consists of four horizontal electrophoresis chambers, which are built as movable drawers into a metal housing.

The HPE™ BlueTower and the HPE™ gels have been developed together as a system to achieve better results than with conventional SDS polyacrylamide gel electrophoresis (PAGE) technology. The precast HPE™ gels, which are less than 1 mm thin and film-backed, are protected from light during the run. No glass plates are used. They are placed on aluminum oxide ceramic cooling plates, which ensure very efficient heat dissipation and therefore straight electrophoretic migration in each gel.

**Content:**

HPE™ BlueTower (HPE-T02), HPE™ BluePower™ 3000V Supply (BP-3000-HPE) and HPE™ Cooling Unit (HPE-CU1).

■ HPE™ Cooling Unit

HS 90272000

Cooling unit for HPE™ BlueTower and HPE™ BlueHorizon™ flatbed systems.

| Cat.No. | Size    | EUR      |
|---------|---------|----------|
| HPE-CU1 | 1 piece | 4.300,00 |

■ 2D HPE™ Double BlotGel NF 12.5 % Kit

Size: 250 x 110 x 0.65 mm

HS 38220000

Kit comprising 4 plastic-backed gels, including running and equilibration buffers, FS wicks and cooling contact fluid.

The gels can be easily blotted because the gels are non-covalently bound to the supporting film so that it can be removed from the gel after electrophoresis. This non-fluorescent (NF) supporting film also provides best results for fluorescent staining and labelling.

Suitable for running 2x 11 cm IPG strips plus 1 marker lane by horizontal electrophoresis on HPE™ BlueTower, HPE™ BlueHorizon or Multiphor II™.

*Multiphor = trademark of GE Healthcare*

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 43430.01 | 1 kit | 448,00 |

■ 2D HPE™ Double Gel 10 - 15 % Kit Size: 250 x 110 x 0.65 mm

HS 38220000

Kit comprising 4 plastic-backed gels, including running and equilibration buffers, FS wicks and cooling contact fluid. Suitable for running

2x 11 cm IPG strips plus 1 marker lane by horizontal electrophoresis on HPE™ BlueTower, HPE™ BlueHorizon or Multiphor II™. Gels are on standard backing providing best results for silver and Coomassie® staining.

Not suitable for fluorescent applications.

Storage temperature -15 °C to -25 °C

Glucosidase which cleaves endo-N-acetylhexosaminic bonds in hyaluronic acid and chondroitin sulfate A and C to tetrasaccharide residues. As hyaluronic acid and chondroitin sulfate are often found in connective tissues, Hyaluronidase is often used in conjunction with collagenase to dissociate the extracellular matrix between cells of animal tissue, in order to release viable cells for use in tissue culture.

It may also be used to clarify synovial fluids in order to make cell counts possible.

**Unit definition:** 1 U produces the same turbidity reduction in a mixture of hyaluronic acid and albumin as 1 I.U. (International Unit) of a standard hyaluronidase preparation (1).

N-(2-Hydroxyethyl) piperazine-N'-2-ethane sulfonic acid sodium salt (HEPES sodium salt) is a buffering substance for biochemistry and molecular biology. At biological pH, HEPES is zwitterionic, and is effective as a buffer at pH 6.8 to 8.2 (pKa 20 = 7.55). Thus this Good's buffer is widely used in biological solutions and as a component in cell culture media.

### IEF Sample Buffer (2x) sterile filtered

HS 38220000

Storage temperature +2 °C to +8 °C

SERVA IEF sample buffer is suited to all vertical and horizontal IEF applications and systems. The sample buffer is supplied as 2x concentrate. It is sterile filtered, beneficial to long shelf life and absence of contaminants. Simply mix the liquid sample 1:1 with the buffer or dissolve a solid sample in the buffer first and dilute with water 1:1. When performing IEF in the presence of urea mix the sample with the buffer and add solid urea or use concentrated urea solution.

The buffer contains 4 % SERVALYT™ 4 - 9 T, 30 % glycerol and 0.005 % phenol red.

(IAA; Heteroauxins; Auxins)  
 $C_{10}H_9NO_2$  ♦  $M_r$  175.2 ♦ CAS [87-51-4]  
 EINECS 201-748-2 ♦ HS 29339980  
 Storage temperature +2 °C to +8 °C

Indole-3-acetic acid (IAA), a natural phytohormone (plant auxin) is a highly effective plant growth regulator, formed by a variety of fungi, including yeast. 3-Indoleacetic acid induces plant cell elongation and division causing uncontrolled growth. The auxin is a signaling molecule involved in plant organogenesis and growth control. IAA is a supplement in media such as Murashige and Skoog media and Gamborg's B5 media.

Assay (titr.) 97.0 - 103.0 %  
 MP 165 - 169 °C

### 3-Isobutyl-1-methylxanthine research grade

(IBMX)  
C<sub>10</sub>H<sub>14</sub>N<sub>4</sub>O<sub>2</sub> ♦ M<sub>r</sub> 222.2 ♦ CAS [28822-58-4]  
EINECS 249-259-3 ♦ HS 29335995

3-Isobutyl-1-methylxanthine (IBMX) is one of the most potent and nonspecific inhibitors of cyclic nucleotide phosphodiesterases (cAMP- and cGMP PDE). The increase in cAMP level because of phosphodiesterase inhibition by IBMX activates protein kinase A (PKA), leading to decreased proliferation, increased differentiation, and induction of apoptosis. The inhibitor induces calcium release from intracellular stores in sensory neurons. IBMX has been used as a culture medium supplement for inducing adipogenic differentiation, for 3T3-L1 preadipocyte differentiation and in the differentiation of mesenchymal stem cells (MSC). Soluble in ethanol.

Assay (NMR) min. 99.0 %  
MP 200 - 203 °C

**LabImage 1D L-320 Gel Analysis**

HS 90279050

LabImage 1D gel analysis (LabImage 1D) is a flexible solution with strong image analysis algorithms, applicable also for DNA or protein testing and western blotting techniques. Due to its workflow-based concept, this application has become a prime example of software usability. Based on the latest technology, this application works with both Mac and the latest Windows versions and requires no special user training.

LabImage 1D L-320 is the basic version for standard 1D analysis of protein and nucleic acid gels. It allows import of common image types or import of images from scanner or camera, automatic lane and band detection, manual lane and band correction, calculation of MW, Rf, area, band volume, background reduction, creation of own MW or pl standard as well as multiple standards for one gel and has many different report and export functions. LabImage 1D Gel Analysis Software - your tool in 1D gel analysis

- ◆ Full 16 bit image processing
- ◆ Intuitive User Interface/Workflow
- ◆ Runs under Windows, Mac OS X, Linux
- ◆ As single and network license available

*This version is for academic only. For corporate usage please ask for L-320-C*

### ■ LabImage 1D L-360-C Gel Analysis

HS 90279050

LabImage 1D gel analysis (LabImage 1D) is a flexible solution with strong image analysis algorithms, applicable also for DNA or protein testing and western blotting techniques. Due to its workflow-based concept, this application has become a prime example of software usability. Based on the latest technology, this application works with both Mac and the latest Windows versions and requires no special user training.

LabImage 1D L-360 is the advanced version for standard 1D analysis of protein and nucleic acid gels. It allows import of common image types or import of images from scanner or camera, automatic lane and band detection, manual lane and band correction, calculation of MW, Rf, area, band volume, background reduction, creation of own MW or pI standard as well as multiple standards for one gel and has many different report and export functions.

Moreover it includes grimage correction, Rf calibration and correction of multiple standards, can normalize not only single band but group of bands and has an additional export report to RFT and XLS. An additional module allows FDA 21 CFR Part 11 compliance. As these functions are shared with the L-340, additionally the L-360 version could detect multiple regions of interest (ROIs) and is fully automatable (create and edit macros for automation, apply macros to single image or image stack).

LabImage 1D Gel Analysis Software - your tool in 1D gel analysis.

- ◆ Full 16 bit image processing
- ◆ Intuitive User Interface/Workflow
- ◆ Runs under Windows, Mac OS X, Linux
- ◆ Compliant with FDA21 CFR part 11 (module required)
- ◆ As single and network license available

*This version is for corporate only. For academic usage please ask for L-360-A.*

**Lectin from *Canavalia ensiformis* lyophil.**

(Concanavalin A from jack bean)

M<sub>r</sub> 110 000 ♦ CAS [11028-71-0]

**DANGER**

H317-H334 ♦ EINECS 234-258-2 ♦ WGK 1 ♦ HS 35040090

Storage temperature +2 °C to +8 °C

Mitogenic lectin purified from the jack bean, *C. ensiformis*, that selectively cross-links cell-surface glycoproteins and affects the initiation of cell agglutination, mitogenesis, and apoptosis. Concanavalin A (ConA) binds to D-glucose, D-mannose and sterically related sugars in glycoproteins, and glycolipids and has been used in affinity chromatography purifications of various glycoproteins and cellular structures (1).

It has potential anticancer effects due to mitogenic activity with lymphocytes and cancer cells (2). When administered, concanavalin A binds to glycoproteins of the cell membrane, inducing autophagy when it eventually enters the cell. Simultaneously, it triggers inflammation of tumorous cells, causing an immune response targeted against those cells. This simultaneous induction of immune response and autophagy makes it a potentially potent and novel cancer treatment. It is also used for studies of immune regulation across various cell types

**Sugar specificity:** D-glucose, D-mannose and sterically related sugars

**Hemagglutination:** Reference (3)

**Leupeptin**

(Acetyl-L-leucyl-L-leucyl-L-argininal)

C<sub>20</sub>H<sub>38</sub>N<sub>6</sub>O<sub>4</sub> · 1/2H<sub>2</sub>SO<sub>4</sub> ♦ M<sub>r</sub> 475.6 ♦ CAS [103476-89-7]

**WARNING**

H302-H332 ♦ WGK 1 ♦ HS 29241900

Storage temperature -15 °C to -25 °C

Leupeptin, or N-acetyl-L-leucyl-L-leucyl-L-argininal, is a naturally occurring tripeptide and a reversible inhibitor of serine and cysteine proteases. Competitively inhibits calpain, cathepsin B, kallikrein, papain, plasmin, and trypsin, but is little or non-inhibiting for pepsin, cathepsin A and D, chymotrypsin, and thrombin.

Leupeptin forms in the active site of serine proteases a covalent hemiacetal adduct between the aldehyde group of leupeptin and the hydroxyl group of a serine residue in the enzyme active site. Inhibition of cysteine proteases is achieved by forming a comparable bond between the electrophilic (aldehyde) carbon of leupeptin with the sulfur atom of a cysteine residue in the enzyme active site.

Due to its aldehyde groups, leupeptin may interfere with protein detection assays (e.g. Bradford).

Stock solution: 5 mg/ml (10 mM) in H<sub>2</sub>O, ethanol, acetic acid and DMF (stable at +4 °C for approx. 7 days and at -20 °C for approx. 6 months)

Working concentration: 1 - 100 μM (stable only for few hours)

Assay (HPLC) min. 96.5 %

(sum of tautomeric isomers)

**Lysozyme from chicken egg white min. 15 000 units/mg cryst.**

DANGER  
H334 ♦ EINECS 235-747-3 ♦ WGK 1 ♦ HS 35079090  
Storage temperature +2 °C to +8 °C

Crystalline powder in hydrochloride form. Lysozyme hydrolyzes the β 1 → 4 linkages of the murein between N-acetylmuramic acid and N-acetyl-D-glucosamin, and degrades the heteroglycan chain to disaccharides. This reaction leads to cell lysis in most gram positive bacteria. Lysis can be prevented if the reaction is performed in an isotonic sucrose medium. Under these assay conditions protoplasts are produced which no longer have a cell wall. In gram negative bacteria a compact lipopolysaccharide layer on the exposed murein sacculus efficiently shields them from lysozyme digestion. Only when the stabilizing Ca<sup>2+</sup> ions are removed by treatment with e.g. EDTA, the murein becomes susceptible to lysozyme. Suitable for hydrolysis of bacterial cell walls and of proteoglycans (1, 2).

**Unit definition:** 1 unit catalyzes a decrease in absorption at 450 nm of 0.001 per minute at 25 °C, pH 6.24, in a suspension of *Micrococcus lysodeikticus* as substrate.

**Isoelectric point:** 10.5 - 11.0

**Optimum pH:** 9.2

**Lysyl Endopeptidase®, MS approved**

EC 3.4.21.50 ♦ CAS [72561-05-08]

EINECS 276-716-4 ♦ HS 35079090  
Storage temperature -15 °C to -25 °C \*\*

Approved quality for use with in-gel digestion and mass spectrometric analysis.

Lysyl Endopeptidase, originally isolated from the soil bacterium discovered by Masaki, et al. cleaves specifically the peptide bonds at the carboxy-terminal side of Lysine residues and S-aminoethylcysteine residues with a high degree of specificity, making it a valuable tool for protein sequence analysis and for proteome research. An added feature of Lysyl Endopeptidase is its ability to retain complete activity after incubation in 4M urea or in 0.1 % SDS solution for up to 6 hours at 30 °C.

RC, diameter 22 mm

HS 39173200

Packed dry, made from regenerated cellulose (RC). With glycerol as protection for embrittlement, which can be easily removed by soaking in water. Contain low level of heavy metal and sulfide impurities. Highly resistant against chemicals, suitable for pH range 2 – 12 and temperatures 4 – 60 °C.

Nominal dry flat width 34 mm  
 Nominal dry diameter 22 mm  
 Approx. filling volume 3.4 ml/cm  
 Nominal dry wall thickness 25 µm

■ Metal Chelate Buffer Pack, includes 1 Buffer A and 1 Buffer B

HS 38220000

**Contents:**

250 ml 5 x PBS Buffer A  
 150 ml 1 x Imidazole Buffer B

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 42277.01 | 1 kit | 111,00 |

■ Metal Chelate Midi Bulk Pack MC Plugs

HS 38220000

The Proteus IMAC kit is designed for simple, rapid His-tagged recombinant protein purification from a cell lysate under native or denaturing conditions. Proteus spin columns replace lengthy and expensive chromatographic methods such as FPLC. Metal chelate affinity chromatography is a rapid one-step purification, which removes most contaminants and can achieve purities close to homogeneity.

**Contents:**

Quantity: 24 x 1.6 ml Ni-IMAC columns  
 Max. sample volume per load: 20 ml, swing bucket rotor  
 Collection tube: 50 ml centrifuge tubes  
 Min. number of purifications: 48 purifications (2 uses per column)  
 Typical capacity/preparation: 10 - 15 mg 6 x His-tagged protein

| Cat.No.  | Size      | EUR      |
|----------|-----------|----------|
| 42274.01 | 24 pieces | 1.016,00 |

■ Metal Chelate Midi Kit - 8 MC Plugs

HS 38220000

The Proteus IMAC kit is designed for simple, rapid His-tagged recombinant protein purification from a cell lysate under native or denaturing conditions. Proteus spin columns replace lengthy and expensive chromatographic methods such as FPLC. Metal chelate affinity chromatography is a rapid one-step purification, which removes most contaminants and can achieve purities close to homogeneity.

**Contents:**

Quantity: 8 x 1.6 ml Ni-IMAC columns  
 Max. sample volume per load: 20 ml, swing bucket rotor  
 Collection tube: 50 ml centrifuge tubes  
 Min. number of purifications: 16 purifications (2 uses per column)  
 Typical capacity/preparation: 10 - 15 mg 6 x His-tagged protein  
 Vivaspin 20 ultrafiltration concentrators: 8  
 Buffers: 5 x PBS Buffer A, 1 x Imidazole Buffer B

| Cat.No.  | Size  | EUR    |

EINECS 246-644-8 ♦ WGK 3 ♦ HS 29172000

Methylnadic anhydride (MNA) is a hardener component for polyester and epoxy resins, for example Glycid ether 100 (formerly EPON 812) embedding for electron microscopy.

Glycid ether cured with MNA yields very hard blocks. By combining different proportions of the hardeners dodecyl succinic acid anhydride (DDSA) and methylnadic anhydride (MNA) with glycid ether will allow the preparation of blocks with a hardness from soft to hard.

### Mini Pro 300 V

HS 90272000

Combining small size and versatility, the new Mini Pro 300 V power supply is an ideal choice for any researcher. The two terminators allow the simultaneous run of two electrophoresis chambers, saving both time and valuable bench space. Capable of providing constant voltage or constant current in 1 V or 1 mA steps, the unit is perfectly suited to run both vertical polyacrylamide or horizontal agarose gel electrophoresis experiments.

- ◆ 300 V, 400 mA, 60 W output
- ◆ Two pairs of outlet terminals
- ◆ Time with alarm function
- ◆ Constant voltage or constant current options

| Cat.No.  | Size    | EUR    |

**DANGER**  
 H302-H351 ◆ EINECS 200-008-6 ◆  
 WGK 3L ◆ HS 29419000

Potent anti-tumor antibiotic isolated from *Streptomyces caespitosus*. Belongs to the group of aziridine-containing natural products. Causes intra- and interstrand crosslinks in DNA, which prevent dissociation of the strands, and thus inhibits replication and transcription of DNA. Each vial contains 48 mg sodium chloride as diluent.

■ **MP 310 Power Supply**

HS 90272000

The Major Science MP 310 power supply is a microprocessor-controlled power supply with full control range of designated current and/or voltage. Its maximum voltage output is 300 V. MP 310 is designed to meet most electrophoresis needs in a personal, single, easy to use unit. It is capable of running horizontal and vertical electrophoresis (like 2D electrophoresis, SDS PAGE applications). In addition, a timer with alarm function is also equipped in the unit, and so is pause function. Furthermore, the powerful specifications plus four terminator pairs can be used to run four units in parallel. The compact design of stackability is another feature to save benchtop space.

- ◆ Advanced power capacity: 300 V, 700 mA, 150 W
- ◆ Wide applications for DNA, RNA, and protein electrophoresis
- ◆ Microprocessor controlled
- ◆ Constant voltage or constant current
- ◆ Four pairs of outlet terminator
- ◆ Timer with alarm function
- ◆ Advanced safety devices
- ◆ Stackability
- ◆ Compact size

| Cat.No. | Size    | EUR    |
|---------|---------|--------|
| MP-310  | 1 piece | 945,00 |

■ **MP 320 Power Supply**

HS 90272000

In addition to running standard horizontal agarose and vertical polyacrylamide gels, the MP 320 power supply easily handles all your blotting applications. Its microprocessor control offers constant voltage, constant current or constant power and pause/resume run capability during timed or continuous operation. MP 320 is fully programmable, offering up to 6 multi-step settings and saving up to 30 programs, and capable of running 4 cells simultaneously. Its design provides a compact and modern stackable case, and a 2.6" LCD screen, which displays all the running / setting conditions. Safety devices include no load detection, leakage detection, sudden load change, over temperature protection, and over load detection.

- ◆ 300 V maximum voltage
- ◆ 3000 mA maximum current
- ◆ 300 W maximum power
- ◆ Four pairs of outlet terminals
- ◆ Timer with alarm function
- ◆ Constant voltage or constant current operation
- ◆ Advanced safety device design
- ◆ Compact size
- ◆ Stackable case
- ◆ Wide applications for DNA, RNA and protein electrophoresis

■ **MP 510 Power Supply**

HS 90272000

The MP 510 power supply is a microprocessor controlled power supply that covers the broadest range of applications. It offers constant voltage, constant current or constant power. Pause/resume run capability during timed or continuous operation is allowed. MP 510 is a fully programmable model, offering up to 6 multi-step settings and saving up to 30 programs, and capable for running 4 electrophoresis systems simultaneously. Its design provides a compact and modern stackable case, and a 2.6" LCD screen, showing all the running / setting conditions. Safety devices include no load detection, leakage detection, sudden load change detection, over temperature protection, and over load detection.

- ◆ 500 V maximum voltage
- ◆ 800 mA maximum current
- ◆ 300 W maximum power
- ◆ Four pairs of outlet terminals
- ◆ Timer with alarm function
- ◆ Advanced safety device design
- ◆ Compact size
- ◆ Stackable case
- ◆ Wide applications for DNA, RNA and protein electrophoresis

DANGER  
H225-H318-H336 ◆ GGVSE/ADR 3 II UN1987 ◆  
IATA 3 II UN1987 ◆ HS 38089490

Highly effective disinfectant, particularly active against mycoplasma, but also against bacteria, virus and fungus.

One of the sources of mycoplasma contamination is the formation of aerosols that can occur during handling of infected cells. Cell culture labs should therefore thoroughly disinfect all surfaces of the laboratories and equipment, including benches, incubators, storage boxes of cells, liquid nitrogen containers.

Mycodecon is an alcohol based, non-corrosive and non-carcinogenic solution which can be easily sprayed on all surfaces without leaving any traces. Supplied in a spray bottle (250 ml) or as refill (500 ml).

■ **Mycorase Solution (50x) for mycoplasma removal**

HS 38220000

Storage temperature -15 °C to -25 °C \*\*

Mycorase is a highly effective antibiotic solution especially developed for safe eradication of mycoplasma contamination in most cell lines. It is active against a broad range of different mycoplasma strains without effect on eukaryotic cell proliferation.

- ◆ Ready-to-use solution
- ◆ Broad range of action
- ◆ Safe eradication without effect on cell proliferation
- ◆ Permanent cure for most cell types

**Ni-Extrachel Agarose Resin**

HS 38220000

Storage temperature +2 °C to +8 °C

The resin has a polychelator ligand covalently coupled to a highly crosslinked agarose resin and is loaded with nickel ions.

Ni-Extrachel Agarose Resin works in presence of EDTA, DTT and other chemicals, which result in stripping of the metal ions with standard Ni-NTA or -IDA resins.

Its specificity and stability allows a one-step purification without the need of pretreatment of samples for removal of nickel stripping agents.

Suitable for batch, gravity and high pressure column purification.

Binding capacity: > 80 mg/ml gel.

**Ni<sup>2+</sup>-IDA-Metal Chelate Sepharose Resin**

HS 38220000

Ni<sup>2+</sup>-IDA Metal Chelate Agarose Resin designed for affinity purification of polyhistidine tagged proteins. Nickel ions are carefully loaded onto an agarose matrix via an iminodiacetic acid (IDA) coupled ligand to obtain a stable affinity matrix with a high binding capacity for histidine residues (up to 10 mg/ml determined from *E. coli* cleared lysate). Other metal ions such as Co<sup>2+</sup>, Cu<sup>2+</sup>, and Zn<sup>2+</sup> can also be used resulting in different affinities. If required, the Nickel ions can be removed from the agarose matrix using 5 wash steps with 100 mM EDTA, and the matrix recharged with a different metal ion.

**Specifications**

Specificity: Polyhistidine tag  
 Matrix: Agarose  
 Couples ligand: Iminodiacetic acid (IDA)  
 Binding capacity: 10 mg/ml  
 Bead size: 45 – 160 µm  
 Flow rate: 0.25 – 2 ml/min  
 Maximum pressure: 42 psi  
 Buffer compatibility: Common aqueous buffers from pH 2 - 12  
 Cleaning buffer examples: 30 % ethanol, 1 M NaOH, 0.01 M HCl, 8 M urea, 6 M guanidinium hydrochloride  
 Shipping/delivery: 50 % (v/v) resin suspension in 20 % ethanol at ambient temperature  
 Storage: Equilibration buffer at 2 - 8 °C (short-term) 20 % ethanol at 2 - 8 °C (long-term)

Used as a post fix and stain of tissues in scanning and transmission electron microscopy.

Osmium tetroxide reacts with lipids in tissue by oxidation of unsaturated bonds of fatty acids, which adds density and contrast to biological samples. In normal tissues, presence of osmium results in intense black staining. In addition, it is used in electron microscopy for enhancing staining.

GGVSE/ADR 4.1 III UN2213 ♦ IATA 4.1 III UN2213  
WGK 2L ♦ HS 2912600

Paraformaldehyde is a cross-linking fixative used in histology, light and electron microscopy and flow cytometry. It is changed to formaldehyde by heating and by adding small amount of sodium hydroxide.

When the samples are to be used in fluorescence studies, paraformaldehyde is recommended as fixative. In histology it is generally preferred over other fixatives as the others result in more silver grains on the tissues.

**PBS Buffer (10x) sterile**

(Phosphate buffered salt solution)  
HS 38220000

10 x concentrated phosphate buffered salt solution, autoclaved. PBS buffer is a widely used buffer in protein detection systems like Western Blot analysis, ELISAs and other enzyme assays, for immunocytological and immunohistological detection, *in situ* hybridization, apoptosis assays and staining of nuclei. 1x PBS is as well often used as protein solvent and diluent.

**Composition:**

NaCl (cat. no. 30183) 1.37 M  
KCl (cat. no. 26868) 27 mM  
Na<sub>2</sub>HPO<sub>4</sub> (cat. no. 30200) 100 mM  
KH<sub>2</sub>PO<sub>4</sub> (cat. no. 26870) 20 mM  
pH 7.2 - 7.6

| Cat.No.  | Size | EUR   |
|----------|------|-------|
| 42595.01 | 1 L  | 73,00 |

**PBST Buffer (10x) sterile**

(Phosphate buffered salt solution)  
HS 38220000

10 x concentrated phosphate buffered salt solution with 0.5 % Tween 20, autoclaved. PBST buffer is a widely used buffer in protein detection systems like Western Blot analysis, ELISAs and other enzyme assays, for immunocytological and immunohistological detection, *in situ* hybridization, apoptosis assays and staining of nuclei.

**Composition:**

NaCl (cat. no. 30183) 1.37 M  
KCl (cat. no. 26868) 27 mM  
Na<sub>2</sub>HPO<sub>4</sub> (cat. no. 30200) 100 mM  
KH<sub>2</sub>PO<sub>4</sub> (cat. no. 26870) 20 mM

β-Lactam antibiotic. Inhibitor of bacterial cell wall synthesis. Binds to the active site of a transpeptidase which is involved in the synthesis of murein, a major component of the bacterial cell wall. Frequently used in cell culture media to prevent the growth of contaminating bacteria (2), often in combination with streptomycin (3 - 5).

Assay (HPLC) min. 96.0 %

### ■ Pepsin porcine ca. 15 milliAnson units/mg 2xcryst. lyophil.

(Pepsin A)

EC 3.4.23.1 ♦ M<sub>r</sub> ca. 36 000 ♦ CAS [9001-75-6]

DANGER

H315-H319-H334-H335 ♦ EG-Index 647-008-00-6 ♦

EINECS 232-629-3 ♦ WGK 1 ♦ HS 35079090

Storage temperature -15 °C to -25 °C

For the degradation of proteins. Pepsin preferentially hydrolyzes those peptide linkages which involve the amino group contributed by the aromatic amino acids phenylalanine, tyrosine and tryptophan.

**Unit definition:** 1 milliAnson unit is equivalent to 1 μmole of Folin-positive amino acids calculated as tyrosine, released from denatured hemoglobin per minute at 37 °C, pH 2.0.

**Activity in other units:** ca. 0.015 PU<sup>hb</sup>/mg („Pepsin-Unit“ according to Anson (1, 2). Expressed in millimole tyrosine, therefore 1 PU<sup>hb</sup> = 1000 milliAnson units.)

**PNGase F, recombinant solution**

$M_r$  36 000  
 HS 35079090  
 Storage temperature -15 °C to -25 °C

**Concentration:** 1000 u/ $\mu$ l (2.0 mg/ml), supplied in 1x PBS  
 PNGase F is a mutant recombinant glycosidase from *Flavobacterium meningosepticum* and expressed and purified from *E. coli*. The enzyme catalyzes the cleavage of N-linked oligosaccharides between the innermost GlcNAc and asparagine residues of high mannose, hybrid and complex oligosaccharides from N-linked glycoproteins.

The proprietary changes made to PNGase F have been shown to have unique characteristics when compared to other commercially-available sources of PNGase F:

- ◆ Does not need a denaturing step
- ◆ Works on native glycoproteins and serum glycoproteins in only minutes at room temperature
- ◆ Leads to a more complete glycan release compared to other commercially-available enzymes
- ◆ Especially designed and tested for mass spectrometry imaging of tissue samples

**Unit definition:** Achieves complete deglycosylation of 10  $\mu$ g of RNase B incubated in 1x PBS with 1  $\mu$ l of PNGase F for 5 - 10 min at 37 °C or room temperature.

| Cat.No.  | Size       | EUR    |

### ■ Poly-L-lysine 70 000-HBr research grade

(C<sub>6</sub>H<sub>14</sub>N<sub>2</sub>O<sub>2</sub>-HBr)<sub>n</sub> ◆  $M_r$  ca. 70 000 - 150 000 ◆ CAS [25988-63-0]  
WGK 1 ◆ HS 35040090  
Storage temperature -15 °C to -25 °C

Poly-L-lysine is a positively charged amino acid polymer with approximately one HBr per lysine residue, which makes it soluble in water. The substance is a nonspecific attachment factor for cells. It promotes cell adhesion to solid substrates by enhancing electrostatic interaction between negatively charged ions of the cell membrane and positively charged ions on the culture surface.

For coating of a 25 cm<sup>2</sup> culture dish it is recommended to use 1.0 ml of a 0.1 mg/ml solution. Remove the solution after 5 minutes through aspiration and thoroughly rinse the surface. Let dry for two hours before introducing cells and medium.

Can also be used for coating of glass coverslips.

(Aerosporin)  
CAS [1405-20-5]

**WARNING**  
H302 ♦ HS 38210000  
Storage temperature +2 °C to +8 °C

Mixture of the sulfates of polypeptides produced by the growth of certain strains of *Bacillus polymyxa*, the main component being Polymyxin B1. Assay (HPLC): sum of Polymyxins B1, B2, B3 and B1-I min. 80 %; Polymyxin B3 max. 6 %; Polymyxin B1-I max. 15 % (all data based on dried substance). Peptide antibiotic that mainly acts against gram negative bacteria. Causes changes in membrane structure resulting in leakage of small molecules. Used in cell culture media against the contamination of bacteria or in other media for suppression of pathogenic germs (2,3). Inhibitor of the mitogenic response to lipopolysaccharide (4).

EINECS 232-909-5 ♦ WGK 1 ♦ HS 35079090

Storage temperature +2 °C to +8 °C

Mixture of at least 10 proteases: five serine type proteases, two zinc endopeptidases, two zinc leucine aminopeptidases and one zinc carboxypeptidase. Digestion with the product has been useful when extensive or complete degradation of protein is required. Pronase E is used in tissue dissociation of various tissues, e.g. to isolate living chondrocytes. Additional applications are the structural analysis of proteins (1, 2), preparation of bacteriophage lambda DNA (3), pretreatment of tissue sections to enhance the intensity of immunostaining and removal of protein in DNA/RNA isolations.

**Activity:** min. 5.0 DMC U/mg

**Unit definition:** 1 DMC-U (1U) is that amount of enzymatic activity which catalyzes the cleavage of 1 μ-equivalent peptide bond from dimethyl casein per minute at 25 °C, pH 7.5, expressed in terms of the appearance of new terminal amino groups (4).

**Activity in other units:** ca. 1 000 000 PU-units/g (casein substrate; 40 °C, pH 7.4 (5)), ca. 20 000 PUK-units/g (casein substrate, 40 °C, pH 7.5).

Special mixture of 6 protease inhibitors with broad range of activity for the inhibition of aspartate-, cysteine-, serine-, and metallo proteases as well as aminopeptidases. It is especially formulated for use with plant extracts. Contains AEBSF, Bestatin, E-64, Leupeptin, Pepstatin A, and 1,10-Phenanthroline. Supplied as a kit: each vial is provided with an extra vial of 1 ml DMSO. The content of 1 vial dissolved in 1 ml DMSO will give a 100-fold concentrate, suitable for the treatment of 100 ml extract.

**Protease-Inhibitor Mix M**

EINECS 200-664-3 ♦ WGK 1 ♦ HS 38220000  
 Storage temperature -15 °C to -25 °C

Mixture of 6 protease inhibitors with broad spectrum of activity for the inhibition of aspartate-, cysteine-, and serine-proteases as well as aminopeptidases (metallo-proteases). It is especially formulated for use with extracts from mammalian tissue, but can also be used with other extracts. It is free of EDTA and contains AEBSF, Aprotinin, Bestatin, E-64, Leupeptin and Pepstatin A. Supplied as a kit: each vial is provided with an extra vial of 1 ml DMSO. The content of 1 vial dissolved in 1 ml DMSO will give a 100-fold concentrate, suitable for the treatment of 100 ml extract.

| Cat.No.  | Size     | EUR    |

**Protease-Inhibitor Mix HP**

HS 38220000  
 Storage temperature -15 °C to -25 °C

Special mixture of 4 water-soluble protease inhibitors with broad specificity for the inhibition of cysteine- and serine-proteases. Free of metal-chelators. Recommended for purification of polyHis-tagged proteins and for other applications where metal-chelators should be avoided. Contains AEBSF, Aprotinin, E-64, and Leupeptin. The content of 1 vial dissolved in 1 ml water will give a 100-fold concentrate suitable for the treatment of 100 ml tissue extract.

| Cat.No.  | Size     | EUR    |
|----------|----------|--------|

### ■ Protease-Inhibitor Mix HP PLUS

HS 38220000

Storage temperature -15 °C to -25 °C

Mixture of 6 protease inhibitors with broad spectrum of activity for the inhibition of aspartate-, cysteine-, and serine proteases as well as aminopeptidases, Thermolysin and other microbial metalloendoproteases. It is especially recommended for purification of polyHis-tagged proteins and for other applications, where metal-chelators should be avoided.

Contains AEBSF, Bestatin, E-64, Leupeptin, Pepstatin A, and Phosphoramidon.

Supplied as a kit; each vial is provided with an extra vial of 1 ml DMSO. The content of 1 vial dissolved in 1 ml DMSO will give a 100-fold concentrate, suitable for the treatment of 100 ml extract.

### ■ Protein A Midi Bulk Pack Midi A Plugs

HS 38220000

The Midi Protein A & G spin column permits semi-preparative purification of concentrated monoclonal and polyclonal antibodies for all downstream applications. Both the Mini and Midi kits contain all the resin spin columns, buffers and ultrafiltration spinners necessary for rapid and convenient purifications of your target antibodies.

**Contents:**

- Quantity: 12 x 1.6 ml Protein A Midi spin columns
- Max. sample volume per load: 20 ml, swing bucket rotor
- Collection tube: 24 x 20 ml centrifuge tubes
- Min. number of purifications: 60 purifications (5 uses per column)
- Typical capacity/preparation: 20 mg human IgG

| Cat.No.  | Size      | EUR      |

**Protein Molecular Weight Standards**

HS 38220000  
Storage temperature -15 °C to -25 °C

To determine the molecular weight of proteins separated in polyacrylamide gels in their native state SERVA offers a set of 8 proteins. Proteins are either in solution or lyophilized, the lyophilized proteins can easily be dissolved in water or sample buffer. The molecular weights of the proteins range from 12.300 Da (Cytochrome C) up to 450.000 Da (Ferritin horse).

**Please note: In the presence of SDS most of the proteins will fall into their subunits, therefore this marker should not be used for SDS PAGE.**

25 mg of each. For native electrophoresis.

|                      |                        |
|----------------------|------------------------|
| Ferritin horse       | M <sub>r</sub> 450 000 |
| Catalase bovine      | M <sub>r</sub> 240 000 |

**Proteinase K, recombinant, min. 30 mAnson-U/mg**  
lyophil., molecular biology grade

EC 3.4.21.14 ♦ M, ca. 28 000 ♦ CAS [39450-01-6]

**DANGER**  
H315-H319-H334-H335 ♦ EINECS 254-457-8 ♦ WGK 1 ♦  
HS 35079090  
Storage temperature -15 °C to -25 °C

A recombinant proteinase K from *Tritirachium album* expressed in *Pichia pastoris*. Subtilisin-related serine protease with a very high specific activity and a broad spectrum of action. It is widely used for digestion of proteins, including DNases and RNases during nucleic acid preparations without compromising the integrity of the isolated DNA or RNA. Free of DNase and RNase activity.

**Unit definition:** One unit will hydrolyze urea-denatured 2 % hemoglobin to produce color equivalent 1 µmol of tyrosine per minute at pH 7.5 at 37 °C (color by Fiolin & Ciocalteu's Phenol Reagent).

| Cat.No.  | Size   | EUR    |

**Proteinase K, recombinant, min. 35 mAnson-U/mg**  
lyophil., NGS grade

EC 3.4.21.14 ♦ M, 28.900,00 ♦ CAS [39450-01-6]

**DANGER**  
H315-H319-H334-H335 ♦ EINECS 254-457-8 ♦ WGK 1 ♦  
HS 35079090

Storage temperature -15 °C to -25 °C

A recombinant proteinase K from *Tritirachium album* expressed in *Pichia pastoris*. Subtilisin-related serine protease with a very high specific activity and a broad spectrum of action. It is widely used for digestion of proteins, including DNases and RNases during nucleic acid preparations without compromising the integrity of the isolated DNA or RNA.

An extra purification step results in 2.5-fold increased solubility, increased specific activity and very low DNA content compared to other commercially available recombinant proteinase K preparations. Therefore it is especially suitable for methods demanding highest quality like Next Generation Sequencing (NGS).

- ♦ Free of endonucleases, exonucleases and ribonucleases
- ♦ Solubility in water: ≥ 50 mg/ml
- ♦ DNA: ≤0.1 pg/mg enzyme

**Proteus 1-Step Batch Midi Plus Spin Columns**

HS 38220000

Proteus 1-Step Batch Midi Plus Spin Columns are designed for small scale protein purifications such as those required for expression trials, solubility determination tests, screening, titrating and scouting studies. These innovative columns incorporate a SelfSeal™ membrane technology which retains the resin and sample in the batch incubation chamber. When the column is spun in a benchtop centrifuge at 750 g, the pores of the membrane dilate and the filtered eluate is collected in the bottom of the centrifuge tube.

**Specifications**

Sinter type: ultra high density polyethylene  
Construction: Polypropylene  
Pore size: 0.1 - 0.2 µm low protein binding PVDF  
SelfSeal: Proprietary coating  
Maximum vol: 20 ml  
Typical g force: 750 g  
Typical spin times: 5 min for up to 20 ml sample at 750 g  
Storage: Store at RT (non-sterile)  
Shelf-life: 24 months

| Cat.No.  | Size     | EUR    |

**Proteus 1-Step Batch Mini Spin Columns**

HS 38220000

Proteus 1-Step Batch Mini Spin Columns are designed for small scale protein purifications such as those required for expression trials, solubility determination tests, screening, titrating and scouting studies. These innovative columns incorporate a SelfSeal™ membrane technology which retains the resin and sample in the batch incubation chamber. When the column is spun in a microfuge at 12 - 14,000 g for up to 1 min, the pores of the membrane dilate and the filtered eluate is collected in the bottom of the centrifuge tube.

**Specifications**

Sinter type: ultra high density polyethylene  
Construction: Polypropylene  
Pore size: 0.1 - 0.2 µm low protein binding PVDF  
SelfSeal: Proprietary coating  
Maximum vol: 600 µl  
Maximum g force: 12 - 14,000 g (45° fixed angle rotor)  
Minimum g force: 2,500 g for 1 min  
Typical spin times: 30 sec - 1 min for up to 0.6 ml sample at 12 - 14,000 g  
Storage: Store at RT (non-sterile)  
Shelf-life: 24 months

| Cat.No.  | Size      | EUR    |

### ■ Proteus Detergent Anion Exchange Mini Spin Column Kit (20 pc)

HS 38220000

Proteus Detergent Anion Exchange (DetEx) Mini Spin Columns designed for rapid and effective removal of free detergents micelles and complete detergent exchange. They are optimized for membrane proteins with pI <8 in complex with non-ionic or zwitterionic detergents. Simple and adaptable to your protein requiring only a microfuge for operation. Ideal for applications such as ELISA, IEF, MS and NMR which suffer from interference with excess detergents.

#### Features:

Weak Anion Exchanger for binding membrane proteins with pI <8  
Complete detergent exchange/removal  
Column bed volume: 0.2 ml  
Max. sample loading volume: 0.4 ml  
Typical protein binding capacity: 2 mg  
Elution in a small volume (minimum volume 50 µl)

#### Benefits:

Universal appeal as most proteins have a pI between 4 - 8  
Rapid removal and exchange of free detergent micelles in 10 min  
Generate concentrated protein free of detergent micelles  
Only requires a microfuge for use

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 42241.01 | 1 kit | 500,00 |

### ■ Proteus Detergent Anion Exchange Mini Spin Columns Trial Kit (4 pc)

HS 38220000

### ■ Proteus Mini Clarification Spin Column, 0.2 µm PVDF membrane

HS 38220000

Proteus Mini Clarification Spin Columns are designed to remove microorganisms, particles and precipitates larger than 0.2 µm pore size from aqueous solutions. These are ideal for HPLC/FPLC sample preparation. The PVDF membrane provides high flow rates and throughput, low extractables and broad chemical compatibility. The membrane binds far less protein than nylon, cellulose or PES membranes. The columns fit all standard microfuges and allow you to process multiple samples in parallel.

#### Specifications

Membrane type: Hydrophilic PVDF  
Plastic construction: Polypropylene  
Pore size: 0.2 µm  
Maximum sample volume: 0.65 ml  
Hold-up volume: < 5 µl  
Maximum g force: 16,000 g  
Typical spin times: 1 - 2 mins for 0.65 ml sample at 14,000 g  
Storage: Store at RT (non-sterile)  
Shelf-life: 24 months

| Cat.No.  | Size       | EUR    |

| 42225.01 | 100 pieces | 260,00 |

### ■ Proteus NoEndoµ (Micro) 100 Column Kit

HS 38220000

Residual endotoxin contamination in advanced biotechnology products is an expensive and often difficult contaminant to control.

Many commercially available protocols are unable to remove endotoxins effectively and are based on non-affinity chromatography methods e.g. ion exchange chromatography, phase separation using Triton X-114 or require time consuming and expensive affinity steps. These costly resins are often supplied as loose resin or packed in slow gravity columns. The Proteus NoEndo™ spin column kits offer a standardised method for high grade clearance of endotoxin from recombinant proteins, antibodies and viral vectors. These agents are increasingly being designed for therapeutic applications, hence moving them forward efficiently through *in vivo* studies requires pure preparations of the samples.

NoEndo™ µ spin columns incorporate our proprietary and NASA-inspired SelfSeal™ membrane technology. The membrane is specially formulated to prevent any sample from leaking into the collection tube on an orbital mixer. In a centrifuge, the membrane pores dilate and the eluate, free of endotoxin, passes into the collection tube. The contact time is maximized to ensure maximum endotoxin depletion without losses of the target protein, antibody or domain antibody. Uniquely, there is also no dilution of the sample.

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 42250.01 | 1 kit | 923,00 |

### ■ Proteus NoEndoµ (Micro) 2 Column Kit

HS 38220000

Residual endotoxin contamination in advanced biotechnology products is an expensive and often difficult contaminant to control.

**■ Proteus X-Spinner 2.5 TRIAL Columns, assorted MWCOs**

HS 38220000

The holy grail in ultrafiltration (UF) is to eliminate sample fouling and to enhance recovery and purity of target proteins during concentration or buffer exchange step. The 2.5 ml non-stick UF concentrator provides the highest possible protein recoveries. This is due to two factors: the low protein binding cellulose triacetate (CTA) membrane and critically, the design of the X-Spinner which ensures that ultrafiltration is in opposite direction to the centrifugal force. The contra design also ensures that the filter does not clog. This is the first centrifugal concentrator designed with membrane proteins as a key application.

Maximum sample volume is 2.5 ml, hold-up volume is 25 µl. Trial pack contains the following X-Spinner with MWCOs of: 2x 5 kDa, 3x 10 kDa, 2x 20 kDa, 3x 100 kDa, 2x 300 kDa.

| Cat.No.  | Size      | EUR    |

The holy grail in ultrafiltration (UF) is to eliminate sample fouling and to enhance recovery and purity of target proteins during concentration or buffer exchange step. The 2.5 ml non-stick UF concentrator provides the highest possible protein recoveries. This is due to two factors: the low protein binding cellulose triacetate (CTA) membrane and critically, the design of the X-Spinner which ensures that ultrafiltration is in opposite direction to the centrifugal force. The contra design also ensures that the filter does not clog. This is the first centrifugal concentrator designed with membrane proteins as a key application.

Maximum sample volume is 2.5 ml, hold-up volume is 25 µl. Pack contains 24 X-Spinner with MWCO of 20 kDa.

### ■ Quick Coomassie™ Stain

HS 38220000

Storage temperature +2 °C to +8 °C

There are several benefits of our QC stain compared to other rapid and traditional Coomassie™ stains:

**Rapid:** 15 min non-toxic safe 1-step stain. No organic solvents and no phosphoric acid!

**Sensitive:** 50 x more sensitive than other rapid stains. Lower limit is 5 ng protein standard.

**Linear range:** Very low background enabling accurate quantitation of proteins.

**High resolution:** Sharp protein bands that you would expect with traditional Coomassie™ staining. Also MS compatible!

**Durable:** Re-usable up to 3 times!

**Shelf life:** 1 year at room temperature. No precipitate forms over time, thus no shaking required!

Coomassie is a trademark of ICI Ltd.

**Recombinant Protein A Sepharose FF Resin**

HS 38220000

Protein A Sepharose® FF Resin designed for simple, one-step and rapid antibody purification from serum, ascites and tissue culture supernatant such as those derived from static cultures and bioreactors.

Recombinant protein A has been coupled to Sepharose® to obtain a stable matrix with a high binding capacity for immunoglobulins via the heavy chain of the FC region (up to 30 mg/ml Human IgG). Antibody samples purified using this affinity resin may be used in a wide range of laboratory procedures such as 1D or 2D polyacrylamide gel electrophoresis, Western blotting, ELISA etc. Binding affinity varies depending upon the source species and subclass.

**Specifications**

Specificity: Protein A affinity antibodies  
 Matrix: Sepharose®  
 Coupled ligand: 3.5 mg Protein A/ml resin  
 Binding capacity (human IgG): 30 mg/ml  
 Bead size: 60 - 165 µm  
 Flow rate: 0.25 - 1 ml/min (recommended)  
 Maximum pressure: 120 - 140 psi  
 Buffer compatibility: Common aqueous buffers from pH 2.5 - 10  
 Binding buffer example: 1.5 M glycine/NaOH, 3 M NaCl pH 9.0  
 Elution buffer example (1): 0.1 M sodium citrate pH 5.5  
 Elution buffer example (2): 0.2 M glycine/HCl pH 2.5  
 Neutralization buffer example: 1 M Tris/HCl pH 9.0  
 Shipping/delivery: 50 % (v/v) resin suspension in 0.01 % thimerosal  
 Storage: 0.01 % thimerosal at 2 - 8 °C for up to 2 years from manufacture

| Cat.No.  | Size | EUR    |

**Recombinant Protein G Sepharose FF Resin**

HS 38220000

Protein G Sepharose® FF Resin designed for simple, one-step and rapid antibody purification from serum, ascites and tissue culture supernatant such as those derived from static cultures and bioreactors. Recombinant protein G has been coupled to Sepharose® to obtain a stable matrix with a high binding capacity for immunoglobulins via the heavy chain of the FC region (up to 20 mg/ml Human IgG). Antibody samples purified using this affinity resin may be used in a wide range of laboratory procedures such as 1D or 2D polyacrylamide gel electrophoresis, Western Blotting, ELISA etc. Binding affinity varies depending upon the source species and subclass.

**Specifications**

Specificity: Protein G affinity antibodies  
 Matrix: Sepharose®  
 Coupled ligand: 2 mg Protein G/ml resin  
 Binding capacity (human IgG): 20 mg/ml  
 Bead size: 45 - 165 µm  
 Flow rate: 0.25 - 1 ml/min (recommended)  
 Maximum pressure: 120 - 140 psi  
 Buffer compatibility: Common aqueous buffers from pH 2.5 - 10  
 Binding buffer example: 0.1 M sodium phosphate, 0.15 M NaCl, pH 7.4  
 Elution buffer example: 0.2 M glycine/HCl pH 2.5  
 Neutralization buffer example: 1 M Tris/HCl pH 9.0  
 Shipping/delivery: 50 % (v/v) resin suspension in 20 % ethanol  
 Storage: 20 % ethanol at 2 - 8 °C for up to 2 years from manufacture

**Rehydration Tray for IPG Strips**

HS 90272000

To rehydrate up to 12 IPG strips in lengths up to 24 cm. The rehydration tray is form stable and resistant against chemicals normally used when rehydrating IPG strips. The binding capacity to proteins is very low. The lid protects the IPG strips during rehydration against contamination. After usage the tray can easily be cleaned using a mild washing-up liquid and rinsed with distilled water.

### Resazurin-Na-salt analytical grade

(Diazoresorcinol)

C<sub>12</sub>H<sub>6</sub>NO<sub>2</sub>·Na ♦ M<sub>r</sub> 251.2 ♦ CAS [62758-13-8]

WARNING

H302-H315-H319-H335 ♦ EINECS 263-718-5  
♦ HS 29349990

Resazurin is a blue non-fluorescent dye used as a redox indicator in cell viability and proliferation assays for bacteria, yeast or mammalian cells. In viable cells the blue form of the dye is irreversibly reduced by enzymes to the highly red-fluorescent product resorufin (excitation: 530 - 540 nm; emission: 585 - 595 nm), which can be detected by flow cytometry, fluorescence microscopy, and high-throughput screening methods. Resazurin is minimally toxic to living cells, making it suitable for use in long-term cell culture.

| 34226.02 | 5 g  | 82,00 |

### Resazurin Cell Viability Assay

HS 38220000

Storage temperature -15 °C to -25 °C

The Resazurin Cell Viability Assay is a fluorescent assay that detects the cellular metabolic activities. The kit offers a simple, rapid, reliable, sensitive, safe, and cost-effective measurement of cell viability. Resazurin is a blue non-fluorescent dye until it is irreversibly reduced to the pink colored, highly red fluorescent resorufin by dehydrogenase enzymes in metabolically active cells. The fluorescent signal is monitored using 530 – 560 nm excitation wavelength and 590 nm emission wavelength. The absorbance is monitored at 570 nm and 600 nm. The fluorescent or colorimetric signal generated is proportional to the number of living cells in the sample.

### Ribonuclease A from bovine pancreas min. 80 Kunitz units/mg lyophil.

(Pancreatic RNase; ribonuclease I; ribonuclease 3-pyrimidinoligonucleotidohydrolase)

EC 3.1.27.5 ♦ M<sub>r</sub> ca. 13 700 ♦ CAS [9001-99-4]

DANGER

H334 ♦ EINECS 232-646-6 ♦ WGK 1 ♦ HS 35079090  
Storage temperature +2 °C to +8 °C

An endonuclease which specifically attacks pyrimidine sites (Py/pN) at the 3'-phosphate group. This preparation is salt-free, protease-free and chromatographically homogeneous.

**RNase A content:** min. 90 % by ion exchange chromatography. DNase not detected.

**Unit definition:** 1 unit is that amount of activity which is capable of causing within 1 minute a decrease in absorbance at 300 nm equivalent to the maximum possible change in a 0.05 % solution of yeast RNA at 25 °C, pH 5.0

### RIPA Buffer

HS 38220000

Storage temperature +2 °C to +8 °C

RIPA buffer is a very effective buffer for lysis of cultured mammalian cells. It enables protein extraction from cytoplasmic, membrane and nuclear proteins. The buffer is compatible with many applications like protein purification, protein assays, Western blotting, reporter assays etc. However, it will disrupt protein-protein interactions and may therefore disturb applications like immunoprecipitation and pull-down assays.

**SERVA Blue G**

(Acid Blue 90; COOMASSIE® Brilliant Blue G-250; Xylene Brilliant Cyanine G)  
 C.I.42655 ♦ C<sub>47</sub>H<sub>48</sub>N<sub>3</sub>O<sub>7</sub>S<sub>2</sub>·Na ♦ M<sub>r</sub> 854.0 ♦  
 CAS [6104-58-1]

EINECS 228-058-4 ♦ WGK 2L ♦ HS 32041200

Tested for preparation of staining solution for polyacrylamide gel electrophoresis. Triphenylmethane dye used in protein gel electrophoresis for detection of proteins and with the Bradford method to determine protein concentration. SERVA Blue G is differentiated from SERVA Blue R by the addition of two methyl groups and the slightly greenish tint to its blue color. The dye may exist as a cation (red form) at a pH below 0 with an absorbance peak at 470 nm, an anion (blue form) at a pH above 2 with an absorbance peak at 595 nm, and a neutral, green form at a pH around 1 with an absorbance peak around 650 nm. The blue, anionic form is what binds with amino acid residues, such as arginine or aromatics, to form a stable complex.

λ max. (0.001 % pH 7) 580 - 590 nm

**SERVA Blue-White Light Table**

HS 90275000

The Blue/White Light Table is a dual light source transilluminator for bottom-up LED illumination. It is adjustable to 3 individual light intensities, the amber filter is hinge-free, magnetic positioned. A gel cutting knife as well as a cardboard hood for image capturing with a smartphone are included.

- ◆ Filter size 180 mm x 120 mm
- ◆ 5 minutes automatic power-off
- ◆ Stable metal housing
- ◆ Enhanced portability with PowerBank (optional)
- ◆ Dimensions and weight: 185 mm x 30 mm x 220 mm, 1.45 kg

| Cat.No. | Size    | EUR    |
|---------|---------|--------|
| BWL-T   | 1 piece | 795,00 |

**SERVA BlueShake**

HS 84798200

SERVA BlueShake is a next generation rocking table. A solid aluminum housing, top quality electronic components and mechanics that meet the highest demands make BlueShake a laboratory device that is also ideally equipped for continuous use in research and diagnostic laboratories.

The device is characterized by a sturdy, durable construction: Built on an aluminum housing, it is equipped with robust, precisely running motors. The movement of the table can be controlled manually in all directions at a freely adjustable speed. For a gentle staining or immunoblotting process, the angle of inclination is 4°. The generously dimensioned touch screen is absolutely waterproof and, like the entire device, easy to clean. The built-in mechanism is maintenance-free.

The large touch screen allows easy and intuitive operation of the device. If necessary, adjust time, rocking direction and speed, start, done.

- ◆ 4° angle of inclination for gentle movement
- ◆ Large table surface for versatile use
- ◆ Timer function
- ◆ Direction of movement freely selectable (forward/ reverse - lateral - circular)
- ◆ Robust design - Made in Germany

## ■ SERVA BlueStain

HS 84798200

SERVA BlueStain automatically stains polyacrylamide gels. Accurate, reproducible, user-friendly. The system pumps the required liquids into the gel tray. Pumping out after the preset incubation time is fast and complete. Thanks to SERVA BlueStain you can stain gel around gel using the same protocol. This makes the device interesting for research, but especially for the diagnostic laboratory.

The SERVA BlueStain staining machine as an universal gel stainer is used in research and diagnostics where a high number of gels have to be stained and/or a reproducible method is essential. The device is suitable for the whole range of currently applied staining methods. The simple operation, the absolutely robust mechanics and the results achieved with the device make it an indispensable tool in your laboratory. Programs are pre-installed on delivery, e.g. silver staining.

To start the staining process, first connect the appropriate storage containers (e.g. water, fixing solution, dye solution, waste, etc.) to the respective tubes. Now you can start after selecting the staining program. Using a simple export function, you can save the actual steps performed at the end of the staining process and thus document the corresponding log.

Due to flexible programming you can create your own logs or modify existing or pre-installed programs at any time. To do this, copy any program, make the desired changes and save the newly created program under its own name. You can also intervene in a program that is already running, i.e. cancel a step and go to the next step. This can be important, for example, in silver staining, in order to avoid overcoloring of the gel (silver mirror).

The device is characterized by a sturdy, long lasting construction: Built on an aluminum housing, equipped with robust, precisely running motors, sophisticated electronics and high-quality 10-valve pump technology. The device is equipped with a staining tray measuring 30 cm x 25 cm for large-format gels. Optional equipment for staining gels with smaller formats is available. The movement of the table can be controlled manually in all directions at a freely adjustable speed. For a gentle staining process, the angle of inclination of the table is 4°. The generously dimensioned touch screen is absolutely waterproof and, like the entire device, easy to clean. The built-in mechanism is maintenance-free. Replacement tubes are available as accessories.

- ◆ Suitable for all staining protocols
- ◆ Pre-installed standard programs
- ◆ Free modification/entry of further programs
- ◆ 4° angle of inclination for gentle movement
- ◆ Large gel tray (30 cm x 25 cm)
- ◆ Optionally adaptable for mini gels and other formats

## ■ SERVA BlueStain Pharma Edition

HS 90278080

The SERVA BlueStain Pharma Edition includes the SERVA BlueStain, a specially configured printer and an upgraded preinstalled firmware. This combination is FDA CFR part11 ready:

- ◆ Password protected - password assignment exclusively by superuser
- ◆ Changes in program flow only by logged-in user
- ◆ Data transfer of executed programs to USB stick only by superuser
- ◆ IQ/OQ/PQ and maintenance contract on request

| Cat.No. | Size  | EUR       |
|---------|-------|-----------|
| BST-PU  | 1 kit | 12.750,00 |

## ■ SERVA BlueStain Mini Tray with lid

HS 90278080

Medium gel tray (30 cm x 14 cm) for SERVA BlueStain gel stainer

| Cat.No. | Size    | EUR    |
|---------|---------|--------|
| BST-MT  | 1 piece | 495,00 |

## ■ SERVA BlueStain Printer

HS 90278080

| Cat.No. | Size    | EUR    |
|---------|---------|--------|
| BSP-01  | 1 piece | 950,00 |

## ■ SERVA BlueStain Pump Tube Replacement

HS 90272000

SERVA BlueStain Pump Tube Replacement includes pump tube, connection tubing to tray/valve, connectors and zip ties.

| Cat.No. | Size  | EUR    |
|---------|-------|--------|
| BST-R02 | 1 kit | 200,00 |

## ■ SERVA BlueStain Replacement Tray with Lid

HS 90272000

| Cat.No. | Size    | EUR    |
|---------|---------|--------|
| BST-RT  | 1 piece | 685,00 |

## ■ SERVA BlueStain Spare Part Kit

HS 90272000

SERVA BlueStain spare part kit includes all spare parts needed for maintenance, like tubes, number clips, valve/pump tubing, connectors and zip ties.

| Cat.No. | Size  | EUR    |
|---------|-------|--------|
| BST-R01 | 1 kit | 500,00 |

## ■ SERVA Cellophane Sheets II

HS 39207100

Format: 140 x 133 mm. For drying of mini vertical slab gels (up to 10 x 10 cm).

| Cat.No.  | Size       | EUR   |
|----------|------------|-------|
| 42524.01 | 200 sheets | 32,00 |

## ■ SERVA Clear G Agarose Tablets

HS 38220000

SERVA Clear G Agarose Tablets are fast-solving tablets which already contain the optimal amount of the non-carcinogenic sensitive fluorescent dye DNA Stain Clear G.

Just add the running buffer of your choice, solve the agarose and your agarose gel is ready!

- ◆ For analytical and preparative DNA and RNA gel electrophoresis and blotting (100 bp - >30 kb)
- ◆ Fast-solving agarose for gels with high clarity and low background
- ◆ Optimized mixture for high resolution of sharp bands with high sensitivity
- ◆ No clumping because separately packed in blister pack

| Cat.No.  | Size        | EUR    |
|----------|-------------|--------|
| 39811.01 | 100 Tablets | 121,00 |

## ■ SERVA Co-IDA HD Agarose Resin

HS 38220000

High density cobalt-iminodiacetic acid (IDA) crosslinked agarose resin for low pressure affinity chromatography. The high amount of available cobalt chelate groups allows for high binding capacity. Cobalt chelates recognize two exposed vicinal histidine tags with excellent specificity, but lower affinity as nickel or zinc chelates. The Co-IDA agarose resin is therefore the optimal choice, if highly pure proteins are needed or difficult to separate proteins have to be purified. Suitable for batch or column purifications. Binding/loading capacity: 20 - 40  $\mu\text{mol Me}^{2+}/\text{ml gel}$ .

| 43398.01 | 1 kit | 190,00 |

**SERVA DNA Stain G**

WARNING  
H315-H319 ♦ HS 38220000

SERVA DNA Stain G is a safer alternative to traditional ethidium bromide stain for detecting nucleic acids in agarose gels. It is at least as sensitive as ethidium bromide and can be used in exactly the same way in agarose gel electrophoresis. SERVA DNA Stain G can be added to the gel solution, working dilution is 1:20,000 to 1:50,000. SERVA DNA Stain G emits green fluorescence when bound to DNA or RNA. It has one fluorescence excitation maximum at ca. 300 nm and another at ca. 450 nm when bound to nucleic acid. SERVA DNA Stain G is non-carcinogenic and according to the AMES test it causes significantly fewer mutations than ethidium bromide.

| Cat.No.  | Size     | EUR    |
|----------|----------|--------|
| 39803.01 | 1 ml     | 67,00  |
| 39803.02 | 5 x 1 ml | 292,00 |

**SERVA DNA Stain Clear G**

WARNING  
H315-H319 ♦ HS 38220000

SERVA DNA Stain Clear G is a new, non-carcinogenic, much more sensitive and convenient version of our SERVA DNA Stain G. It can be used instead of highly carcinogenic ethidium bromide for detecting nucleic acids in agarose gels. SERVA DNA Stain Clear G emits green fluorescence when bound to DNA or RNA. It has two secondary fluorescence excitation peaks (ca. 270 nm and 295 nm) and one strong excitation peak centered around 490 nm. The fluorescence emission is similar to EtBr at ca. 530 nm when bound to nucleic acid. Pre-casting and post-staining protocols are applicable. 1 ml of this stain is sufficient for 17 - 25 L of agarose gel.

| Cat.No.  | Size     | EUR    |
|----------|----------|--------|

**SERVA DNA Standard 100 bp Ladder Equimolar, lyophilized**

HS 38220000  
Storage temperature -15 °C to -25 °C

The SERVA DNA Standard 100 bp Ladder equimolar contains 11 fragments ranging from 100 bp to 1000 bp: **100, 150, 200, 300, 400, 500 (2x), 600, 700, 800, 900 and 1000 bp.** Ideal for the analysis of DNA fragments generated from plasmid DNA or for PCR generated DNA fragments. For optimal results use 1.5 - 2 % agarose gels. A separation distance of 60 - 80 mm is recommended. All fragments with EcoRI ends for easy labelling, the 5'-end labeled DNA marker behaves like an equalized DNA marker. For at least 50 applications. Instructions of use and 1 ml separate loading dye solution for resuspension of the lyophilized DNA fragments are included.

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 39311.01 | 50 µg | 77,00 |

**SERVA DNA Standard 100 bp Ladder Extended, lyophilized**

HS 38220000  
Storage temperature -15 °C to -25 °C

The SERVA DNA Standard 100 bp Ladder extended contains 17 fragments ranging from 100 bp to 5000 bp: **100, 150, 200, 300, 400, 500 (2x), 600, 700, 800, 900, 1000, 1500, 2000, 2500, 3000, 4000 and 5000 bp.** Ideal for the analysis of DNA fragments generated from plasmid DNA or for PCR generated larger DNA fragments. For optimal results use 1.0 - 2.0 % agarose gels. A separation distance of 60 - 80 mm is recommended. All fragments with EcoRI ends for easy 5'-end labelling. For at least 50 applications. Instructions of use and 1 ml separate loading dye solution for resuspension of the lyophilized DNA fragments are included.

| 39312.01 | 50 µg | 77,00 |

**SERVA Dryer Frame Kit**

HS 90330000

For drying of mini vertical slab gels (to up to 10 x 10 cm). Containing 2 dryer frames and 200 cellophane sheets.

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 42523.01 | 1 kit | 82,00 |

**SERVA FastLoad 50 bp DNA Ladder**

HS 38220000  
Storage temperature -15 °C to -25 °C

Ready-to-Use DNA standard for agarose gel electrophoresis containing 17 fragments from 50 – 1500 base pairs. The 500 bp, 1000 bp, 1200 bp, and 1500 bp bands have increased intensity and serve as reference points. For estimation of DNA mass of bands of similar size with comparable intensity, the approximate mass of each band is indicated (0.74 µg/load). Recommended load is 5 µl/well. Contains Orange G as tracking dye. Stable for 12 months at 4 °C. For long term storage store at -20 °C.

| Cat.No.  | Size   | EUR   |
|----------|--------|-------|
| 39315.01 | 500 µl | 68,00 |

**SERVA FastLoad 100 bp DNA Ladder**

HS 38220000  
Storage temperature -15 °C to -25 °C

Ready-to-Use DNA standard for agarose gel electrophoresis containing 12 fragments from 100 – 3000 base pairs. The 500 bp and 1500 bp bands have increased intensity and serve as reference points. For estimation of DNA mass of bands of similar size with comparable intensity, the approximate mass of each band is indicated (0.54 µg/load). Recommended load is 5 µl/well. Contains Orange G and Xylene Cyanol as tracking dye. Stable for 6 months at 25 °C and for 12 months at 4 °C. For long term storage store at -20 °C.

| Cat.No.  | Size   | EUR   |
|----------|--------|-------|
| 39316.01 | 500 µl | 68,00 |

### SERVA FastLoad 1 kb DNA Ladder

HS 38220000

Storage temperature -15 °C to -25 °C

Ready-to-Use DNA standard for agarose gel electrophoresis containing 14 fragments from 250 – 25000 base pairs. The 1000 bp and 3000 bp bands have increased intensity and serve as reference points. For estimation of DNA mass of bands of similar size with comparable intensity, the approximate mass of each band is indicated (0.52 µg/load).

Recommended load is 5 µl/well. Contains Orange G and Xylene Cyanol as tracking dye.

Stable for 6 months at 25 °C and for 12 months at 4 °C. For long term storage store at -20 °C.

| Cat.No.  | Size   | EUR   |
|----------|--------|-------|
| 39317.01 | 500 µl | 68,00 |

### SERVA Fluo-610 Standard I

HS 38220000

Storage temperature -15 °C to -25 °C

SERVA Fluo-610 Standard I is a ready-to-use fluorescent labelled protein marker for direct detection in a SDS-PAGE gel or on a membrane in Western Blotting. The marker proteins in the range from 14.4 kDa to 97.4 kDa are labelled with the highly sensitive and stable fluorescent dye Lightning Red. SERVA Lightning Red (cat. no. 43402) is a fluorescent dye for rapid labelling in minutes of proteins prior to SDS PAGE and/or Western Blotting, making any staining and washing steps after electrophoresis unnecessary.

The protein standard is lyophilized for long stability and easy to resuspend. .

| Cat.No.  | Size     | EUR    |
|----------|----------|--------|
| 39261.01 | 5x 50 µl | 304,00 |

### SERVA IEF Gel 3-9 for PhastSystem™

HS 38220000

Storage temperature -15 °C to -25 °C

Film-supported, ready-to-use polyacrylamide mini gel for IEF (pH gradient 3 - 9) on PhastSystem™.

PhastSystem™ = trademark from Cytiva/ former GE Healthcare

| Cat.No.  | Size    | EUR    |
|----------|---------|--------|
| 43366.01 | 10 gels | 230,00 |

### SERVA HiSens Stain G

HS 38220000

Storage temperature +2 °C to +8 °C

SERVA HiSens Stain G is a highly sensitive, non-carcinogenic, non-toxic fluorescent nucleic acid stain, specially designed for in-gel staining of agarose gels. It stains double-stranded or single-stranded DNA and RNA with a sensitivity several times greater than EtBr. The detection limit in in-gel staining is around 0.1 ng of a 4-kb dsDNA band.

The stain can be detected with standard UV as well as with blue light tables. When bound to nucleic acids, the stain has fluorescent excitation maxima of 250 and 480 nm, and an emission maximum of 509 nm.

The stain is provided as a ready-to-use 10 000x stock solution.

| Cat.No.  | Size   | EUR   |
|----------|--------|-------|
| 39805.01 | 500 µl | 82,00 |

### SERVA HPE™ Coomassie® Staining Kit

HS 38220000

Colloidal staining kit for highly sensitive staining of 1D and 2D gels after electrophoresis. The kit contains two components to be mixed together prior to use. Kit contains enough reagents to stain 4 large 2D HPE™ gels. Reagents are MS compatible for downstream mass spectrometry analysis.

Coomassie = registered trademark of ICI Ltd.

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 43396.01 | 1 kit | 109,00 |

### SERVA HPE™ IPG Overlay

HS 27101985

Overlay oil to cover IPG strips during high voltage isoelectric focusing of proteins with no influence on separation behaviour of the IPG strip. Usage of the SERVA IPG Overlay is an important factor for sharp protein spots in high resolution 2D gel electrophoresis. For easy application of the oil a separate dropping bottle is included.

| Cat.No.  | Size | EUR   |
|----------|------|-------|
| 43397.01 | 1 L  | 65,00 |

### SERVA HPE™ IPG Strip Buffer

HS 38220000

Storage temperature +2 °C to +8 °C

1 ml 40 % (w/v) SERVALYT™ mixture (pH 3-10) for IPG strip rehydration and sample preparation for 2D electrophoresis.

SERVA IPG strip buffer works for all IPG strips pH gradients. Due to the low molecular weights of the SERVALYT™ buffer molecules there is no background staining in the 2D gels.

| Cat.No.  | Size | EUR   |
|----------|------|-------|
| 43368.01 | 1 ml | 50,00 |

### SERVA HPE™ Lightning Red

(Fluorescence labelling)

HS 38220000

Storage temperature +2 °C to +8 °C

SERVA HPE™ Lightning Red is a fluorescent dye for rapid labelling of proteins prior to 2D PAGE, making any staining and washing steps after electrophoresis unnecessary. In addition the dye is fully compatible with mass spectrometry and other downstream methods like Western Blotting.

The labelling procedure is simple and quick:

Typically use 80 pmol SERVA HPE™ Lightning Red for labelling of 1 µg protein. Incubate at 0 °C for 15 min. The labelled protein solution is directly applied to an IPG strip via cup- or rehydration loading.

After the 2D run, detection of labelled proteins is performed by fluorescent imager (camera or scanner) at an excitation wavelength of about 530 nm and emission filter of 610 nm with a narrow band width of 30 nm.

SERVA HPE™ Lightning Red is compatible with all additives typically used for sample solubilization and protein extraction, including carrier ampholytes and reductants.

Alkalescent conditions are sufficient, it is not required to titrate the pH to a defined value.

- ◆ Direct detection
- ◆ No staining and washing steps after the run
- ◆ Very high sensitivity, < 100 pg protein / spot
- ◆ Wide dynamic and linear range of > 10<sup>4</sup>
- ◆ No over-staining effects
- ◆ Fully MS and Western Blotting compatible

The kit contains 250 µg SERVA HPE™ Lightning Red dye and DMSO.

| Cat.No.  | Size  | EUR    |

**SERVA IPG BlueStrip 3-10 / 17 cm**

HS 38220000  
Storage temperature -15 °C to -25 °C \*\*

SERVA IPG BlueStrips are dried gel strips with immobilized pH gradient used in high resolution 2D gel electrophoresis of proteins. The strips have to be rehydrated before use. The homogeneous polyacrylamide gel matrix is covalently bound to GEL-FIX™ to stabilize the gel. Additionally, a non-binding cover film (GEL-FIX™ for Covers) protects the gel from damage and contamination. Each gel strip has its own lot number printed on and, therefore, is suitable for documentation according to GMP/GLP. Each package contains 12 gel strips (all derived from the same production lot). Other pH gradients and gel strip lengths are available upon request.

■ **SERVA Lightning Sci2 lyophilized**

HS 38220000  
Storage temperature -15 °C to -25 °C

SERVA Lightning Sci2 is a Cyanine2 NHS ester for minimal labelling and maximum detection of proteins prior to protein detection in 2D Fluorescence Difference Gel Electrophoresis (DIGE). Minimal labelling with SERVA Lightning Sci2, Sci3 and Sci5 allows for the precise comparison of protein expression in two or three samples. The dyes are charge- and size-matched enabling high efficient detection and high resolution of minor proteins on 2D gel electrophoresis. SERVA Lightning Sci2 is compatible with all imagers suitable for detection of Cy2®. Gels labelled with SERVA Lightning Sci2 dyes are ready for subsequent mass spectrometry analysis. Each vial contains specified amount of NHS ester with a tolerance variation of 10 %.

**Special properties:**  
Fluorescence colour Green  
Excitation maximum 490 nm  
Emission maximum 510 nm

### ■ SERVA Lightning Sci3 lyophilized

HS 38220000

Storage temperature -15 °C to -25 °C

SERVA Lightning Sci3 is a Cyanine3 NHS ester for minimal labelling and maximum detection of proteins prior to protein detection in 2D Fluorescence Difference Gel Electrophoresis (DIGE). Minimal labelling with SERVA Lightning Sci2, Sci3 and Sci5 allows for the precise comparison of protein expression in two or three samples. The dyes are charge- and size-matched enabling high efficient detection and high resolution of minor proteins on 2D gel electrophoresis. SERVA Lightning Sci3 is compatible with all imagers suitable for detection of Cy3<sup>®</sup>. Gels labelled with SERVA Lightning SciDyes are ready for subsequent mass spectrometry analysis.

Each vial contains specified amount of NHS ester with a tolerance variation of 10 %.

### ■ SERVA Lightning SciDye Set

HS 38220000

Storage temperature -15 °C to -25 °C

SERVA Lightning SciDyes are designed for minimal labelling and maximum detection of proteins prior to protein detection in 2D Fluorescence Difference Gel Electrophoresis (DIGE). They allow for the precise comparison of protein expression in two or three samples. SERVA Lightning SciDyes are compatible with all imagers suitable for detection of Cy2<sup>®</sup>, Cy3<sup>®</sup> and Cy5<sup>®</sup>. Gels labelled with SERVA Lightning SciDyes are ready for subsequent mass spectrometry analysis.

SERVA Lightning SciDye Set consists of one vial each of SERVA Lightning Sci2 (cat. no. 43404) SERVA Lightning Sci3 (cat. no. 43405) and SERVA Lightning Sci5 (cat. no. 43406).

Each vial contains specified amount of NHS ester with a tolerance variation of 10 %.

### ■ SERVA Mag Rack

HS 90279050

Rack for 12 tubes from 0.5 up to 2.0 ml.

To separate magnetic beads from liquid simply raise the plate equipped with 12 single magnets, the position of the plate will be secured by one extra magnet at each site. The magnetic particles will be attached to one site of the tube, allowing the researcher to pipette out the solution very easily, leaving the magnetic particles in the tube.

### ■ SERVA Ni-IDA HD Agarose Resin

HS 38220000

High density nickel-iminodiacetic acid (IDA) crosslinked agarose resin for low pressure affinity chromatography. The high amount of available nickel chelate groups allows for high binding capacity. Nickel chelates recognize two exposed histidine tags with high specificity and very high affinity. Therefore a nickel charged matrix is recommended for most standard purifications. Suitable for batch or column purifications. Binding/loading capacity: 20 - 40 µmol Me<sup>2+</sup>/ml gel.

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 42141.01 | 25 ml  | 293,00 |
| 42141.02 | 100 ml | 655,00 |

### ■ SERVA Ni-NTA Agarose Resin

(NTA-Agarose Resins)

HS 38220000

Storage temperature +2 °C to +8 °C

High capacity nickel-nitrilotriacetic acid (NTA) crosslinked agarose resin for low pressure affinity chromatography. The four metal-binding sites on the chelate enable high-protein binding and minimal metal leaching. Ideal for purification under denaturing conditions. Handling is easy and identical to standard protocols of other manufacturers, therefore there is no need to change established protocols. Suitable for batch and column purification. Binding capacity: > 50 mg/ml gel.

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 42139.01 | 25 ml  | 289,00 |
| 42139.02 | 100 ml | 985,00 |

**SERVA Ni-NTA Magnetic Beads**

HS 38220000  
Storage temperature +2 °C to +8 °C

High capacity nickel-nitrilotriacetic acid (NTA) magnetic agarose beads (5 %) for rapid and easy small scale purification of His-tagged proteins under native or denaturing conditions.  
Binding capacity: > 75 mg His-tagged protein/ml gel.

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 42179.01 | 2 ml  | 135,00 |
| 42179.02 | 10 ml | 468,00 |

**SERVA PRIME Lightning Red**

HS 38220000  
Storage temperature +2 °C to +8 °C

SERVA Lightning Red is a fluorescent dye for rapid labelling of proteins prior to SDS PAGE and/or Western Blotting, making any staining and washing steps after electrophoresis unnecessary. Normalization in Western Blots by using the total protein signal on the membrane as loading control can be easily done with the pre-labelled samples. In addition, the dye is fully compatible with mass spectrometry and other downstream methods. The labelling procedure is simple and quick: 2 - 5 min for qualitative and 30 min for quantitative analysis.

For separation of the labelled proteins a wide range of gel formats including precast gels in plastic cassettes like SERVAGel PRIME Vertical Mini Gels and film-backed gels can be used.

The labelling works with complex and purified samples in a protein concentration range between 1 µg/ml up to 20 mg/ml - no need for protein concentration measurement or purification and concentration steps before or after labelling.

After the run, detection of labelled proteins is performed by fluorescent imager (camera or scanner) at an excitation wavelength of about 530 nm and emission filter of 610 nm with a narrow band width of 30 nm.

Depending on the used protocol sufficient for 250 - 1250 lanes - no matter what size of gel (mini, wide or large format) you use.

- ◆ Simple and fast pre-labelling of proteins for SDS PAGE and Western Blotting
- ◆ No need for protein concentration measurement or purification and concentration steps before or after labelling
- ◆ No staining and washing steps after the run
- ◆ Broad protein concentration range
- ◆ Very high sensitivity, very low background
- ◆ Wide dynamic and linear range
- ◆ Compatible with all common gel electrophoresis buffer systems and mass spectrometry

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 43402.01 | 1 kit | 184,00 |

**SERVA ProteinStain Fluo-R powder**

C<sub>72</sub>H<sub>42</sub>N<sub>6</sub>O<sub>18</sub>S<sub>6</sub>•Na<sub>4</sub>Ru ◆ M<sub>r</sub> 1664.5  
WGK 2L ◆ HS 28439090

SERVA ProteinStain Fluo-R is a highly sensitive fluorescent dye for detection of proteins in e. g. SDS PAGE, native PAGE or 2D gels. The dye does not interfere with immunodetection. Therefore you can stain your gel with SERVA ProteinStain Fluo-R and then proceed with Western Blotting receiving a copy of your gel on the membrane.

The dye can as well be used for pre-staining, just use it in the loading buffer instead of bromophenol blue or other dyes.

It is as sensitive as silver staining, but has superior staining properties, which makes it the first choice for proteomic research. The dye has a good linearity, high contrast and is compatible with MS/MS analysis. The staining can be as well combined with silver staining and DIGE.

The dye is easily soluble in water. Just dissolve 5 mg in 3 L water to receive a 1 µM staining solution. Or prepare a 20 mM stock solution by dissolving 5 mg in 150 µl water. The dye is best excited with blue light of wave length 473/488 nm. Excitation with laser light of wave length 532 nm is as well possible, but less sensitive.

**SERVA Purple Protein Quantification Assay**

HS 38220000  
Storage temperature -15 °C to -25 °C

The assay bases on the eco-friendly fluorescent dye SERVA Purple. The dye reversibly binds to lysine, arginine, and histidine residues in proteins and peptides to yield an intensely red-fluorescent product (λ<sub>ex</sub> 518 nm, λ<sub>em</sub> 610 nm). The assay exhibits very low protein binding variation, leading to more accurate protein concentration values.

- ◆ Fast and simple - no heating and reduction steps, completed in 1 h
- ◆ Compatible with many detergents and reducing agents
- ◆ Accurate staining of glyco-, phospho-, hydrophobic proteins and peptides
- ◆ Single tube and 96- or 384-well-format for high-throughput
- ◆ Detection limit of 100 ng/ml for peptides and 40 ng/ml for proteins
- ◆ Linear quantification over 3 orders of magnitude
- ◆ Compatible with downstream applications like 1D- and 2D-PAGE, MS, DIGE-labelling, HPLC

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 39235.01 | 10 ml | 284,00 |

### ■ SERVA Purple, 250x concentrate

**DANGER**

♦ IATA 3 II UN1648 ♦ WGK 2L ♦ HS 38220000  
Storage temperature -15 °C to -25 °C

The fluorescent dye Deep Purple (marketed by GE) and LavaPurple (marketed by Gelcompany and SERVA) has been used by many laboratories for staining proteins in gels and on blotting membranes. The dye is based on a small naturally occurring fluorescent compound "Epicocconone" that reversibly binds to lysine, arginine, and histidine residues in proteins and peptides to yield an intensely red-fluorescent product. SERVA Purple is a further development of this compound "Epicocconone". It has improved properties due to a novel production and purification technology by unchanged cost-effectiveness compared to other fluorescence dyes or even silver staining.

- ♦ Environmentally friendly, easy to use
- ♦ Sensitivity to as low as 50 pg/band
- ♦ Linear quantification over 4 orders of magnitude
- ♦ Compatible with MS, DIGE-labelling
- ♦ After imaging gel can be further processed by Western Blotting

### ■ SERVA Purple HiSens, 250x concentrate

**DANGER**  
H225-H302-H312-H319-H332 ♦ GGVSE/ADR 3 II UN1648  
♦ IATA 3 II UN1648 ♦ WGK 2L ♦ HS 38220000  
Storage temperature -15 °C to -25 °C

Total protein stain for non-denaturing and denaturing 1D and 2D gel electrophoresis and blotting. The dye reversibly binds to lysine, arginine, and histidine residues in proteins and peptides to yield an intensely red-fluorescent product (λEx 518 nm, λEm 610 nm). SERVA Purple HiSens shows highest sensitivity compared to most other protein stains. Even difficult to stain proteins as glycoproteins and lipoproteins can be accurately detected. Although this modified version of SERVA Purple has a significantly increased sensitivity, its cost-effectiveness as against other fluorescent dyes or even silver staining is unchanged.

- ♦ Environmentally friendly, easy to use
- ♦ Sensitivity to as low as <20 pg/band
- ♦ Linear quantification over 4 orders of magnitude
- ♦ Compatible with MS, DIGE-labelling
- ♦ After imaging gel can be further processed by Western Blotting

### ■ SERVA Triple Color Protein Standard I

HS 38220000

Storage temperature -15 °C to -25 °C

SERVA Triple Color Protein Standard I is a ready-to-use protein marker of 9 recombinant pre-stained proteins of a wide molecular weight range from 15 to 180 kDa (separation on a SDS Tris-Glycine gel). The protein ladder is designed for monitoring protein separation during SDS PAGE, verification of Western Blotting transfer efficiency and for approximate sizing of proteins. Proteins are covalently coupled with a blue chromophore except for four reference bands, two green bands at 15 kDa and 60 kDa and two red bands at 30 kDa and 70 kDa (separation on a SDS Tris-glycine gel).

**SERVA Triple Color Protein Standard II**

HS 38220000  
Storage temperature -15 °C to -25 °C

SERVA Triple Color Protein Standard II is a mixture of 10 pre-stained proteins of a molecular weight range from 11 to 180 kDa (separation on a SDS Tris-glycine gel). Proteins are covalently coupled with a blue chromophore except for one green band at 25 kDa and one red band at 75 kDa (separation on a SDS Tris-glycine gel). It is provided in a ready-to-use formula and no heating, further dilution or adding of reducing reagents is necessary before use. SERVA Triple Color Protein Standard II is designed for monitoring protein separation during SDS PAGE, verification of Western Blotting transfer efficiency and for approximate sizing of proteins. The marker is stable for up to two weeks at 25 °C and for up to 3 months at 4 °C. Recommended loading volume for a mini gel is 3 – 5 µl/lane.

**SERVA Triple Color Protein Standard III**

HS 38220000  
Storage temperature -15 °C to -25 °C

SERVA Triple Color Protein Standard III is a mixture of 13 pre-stained proteins of a molecular weight range from 5 to 245 kDa (separation on a SDS Tris-glycine gel). Proteins are covalently coupled with a blue chromophore except for one green band at 25 kDa and one red band at 75 kDa (separation on a SDS Tris-glycine gel). It is provided in a ready-to-use formula and no heating, further dilution or adding of reducing reagents is necessary before use. SERVA Triple Color Protein Standard III is designed for monitoring protein separation during SDS PAGE, verification of Western Blotting transfer efficiency and for approximate sizing of proteins. The marker is stable for up to two weeks at 25 °C and for up to 3 months at 4 °C. Recommended loading volume for a mini gel is 3 – 5 µl/lane.

**SERVA Tris-Glycine Native Electrophoresis Buffer (10x)**

HS 38220000  
Running buffer for native PAGE. Supplied as 10 x concentrate. Contains 250 mM Tris, 1.92 M glycine.

| Cat.No.  | Size | EUR   |
|----------|------|-------|
| 42530.01 | 1 L  | 41,00 |

**SERVA Tris-Glycine Native Sample Buffer (2x)**

HS 38220000  
Storage temperature +2 °C to +8 °C  
Sample buffer for native PAGE. Supplied as 2 x concentrate. Contains 126 mM Tris/HCl (pH 6.8), 20 % glycerol and 0.02 % bromophenol blue.

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 42528.01 | 20 ml | 26,00 |

**SERVA Tris-Glycine/LDS Sample Buffer (4x)**

HS 38220000  
Storage temperature +2 °C to +8 °C

Modified sample buffer for SDS PAGE, delivered as 4x concentrate. Lithium dodecyl sulfate (LDS) replaces the commonly used sodium dodecyl sulfate (SDS) in the triethanolamine buffered sample buffer. LDS prevents degradation of proteins during sample preparation and heating and stabilizes the pH of the sample during gel run. It does not crystallize at lower temperatures due to significantly better solubility than SDS. Hence, protein stability as well as band resolution is significantly enhanced by cooled gel runs. For reducing conditions the sample buffer may be supplemented with 10 mM DTT or 5 % β-mercaptoethanol (end concentration 1x sample buffer). Contains: Triethanolamine buffered, 40 % glycerol, 4 % Ficoll® 400, 4 % LDS, 0.025 % phenol red and 0.025 % bromophenol.

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 42525.01 | 10 ml | 23,00 |

**SERVA Tris-Glycine/SDS Electrophoresis Buffer (10x)**

HS 38220000  
Running buffer for SDS PAGE. Supplied as 10 x concentrate. Contains 250 mM Tris, 1.92 M glycine, 1 % SDS.

| Cat.No.  | Size | EUR   |
|----------|------|-------|
| 42529.01 | 1 L  | 39,00 |

**SERVA Tris-Glycine/SDS Sample Buffer (2x)**

(Tris-Glycine/SDS Sample Buffer)  
HS 38220000  
Storage temperature +2 °C to +8 °C

Sample buffer for SDS PAGE. Supplied as 2 x concentrate. Contains 126 mM Tris/HCl (pH 6.8), 20 % glycerol, 4 % SDS and 0.02 % bromophenol blue.

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 42527.01 | 20 ml | 26,00 |

**SERVA Tris-SDS Sample Buffer pH 8.6 (10X)**

 **WARNING**  
H315 - H319 ♦ HS 38220000  
HS 38220000  
Storage temperature +2 °C to +8 °C

Non-reducing sample buffer for SDS PAGE, delivered as 10x concentrate. Ideal for diluted samples. Due to the basic pH the sample buffer can be used for labelling of proteins with e.g. Lightning Red or DIGE dyes prior to electrophoresis. For reducing conditions the sample buffer may be supplemented with 10 mM DTT or 5 % β-mercaptoethanol (end concentration 1x sample buffer). Contains: 290 mM Tris, 210 mM Tris-HCl, 25 % glycerol, 10 % SDS and 0.1 % bromophenol

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 42546.01 | 10 ml | 35,00 |

**SERVA Tris-Tricine/SDS Electrophoresis Buffer (10x)**

HS 38220000  
Running buffer for SDS PAGE. Supplied as 10 x concentrate. Contains 1 M Tris, 1 M Tricine and 1 % SDS.

| Cat.No.  | Size | EUR    |
|----------|------|--------|
| 42552.01 | 1 L  | 101,00 |

**SERVA Tris-Tricine/SDS Electrophoresis Buffer (20x)**

HS 38220000  
Running buffer for SDS PAGE. Optimized formulation to improve sharpness of bands, especially when used together with SERVAGel Neutral pH 7.4 (cat. no. 43220 and 43221) precast gels. Supplied as 20 x concentrate. Contains 1.2 M Tris (pH 8.5), 0.8 M Tricine and 2 % SDS.

| Cat.No.  | Size | EUR    |
|----------|------|--------|
| 42560.01 | 1 L  | 103,00 |

### SERVA Tris-Tricine/SDS Sample Buffer (2x)

HS 38220000

Storage temperature +2 °C to +8 °C

Sample buffer for SDS PAGE. Supplied as 2 x concentrate. Contains 900 mM Tris/HCl (pH 8.45), 24 % glycerol, 4 % SDS, 0.015 % SERVA Blue G and 0.005 % phenol red.

| Cat.No.  | Size  | EUR   |

### SERVA Unstained Protein Standard 6.5 - 97 kDa

HS 38220000

Storage temperature -15 °C to -25 °C

Ready-to-use protein marker that contains 7 native proteins ranging from 6.5 to 97.4 kDa.

After gently warming the protein standard solution to room temperature, apply 5 µl per lane when staining with SERVA Blue G, SERVA Blue R or Coomassie®. For silver staining, e.g. using SERVA's Silver Staining Kit (cat.no. 35076), dilute 1:5 in 1x Laemmli Buffer and apply 5 µl.

### SERVA Unstained Protein Standard IV

HS 38220000

Storage temperature -15 °C to -25 °C

SERVA Unstained Protein Standard IV is a mixture of 12 unstained recombinant proteins of a molecular weight range from 10 to 200 kDa (separation on a SDS Tris-glycine gel). The 25 kDa and 85 kDa bands have double intensity for easy allocation of protein molecular weights. It is provided in a ready-to-use formula and no heating, further dilution or adding of reducing reagents is necessary before use. SERVA Unstained Protein Standard IV is designed for molecular weight determination in SDS PAGE and verification of Western Blotting transfer efficiency.

The marker is stable for up to two weeks at 25 °C and for up to 3 months at 4 °C. Recommended loading volume for a mini gel is 5 µl/lane.

| Cat.No.  | Size   | EUR    |

DANGER  
H314-H411 ♦ GGVSE/ADR 8 III UN1805 ♦  
IATA 8 III UN1805 ♦ HS 38220000

The SERVA Violet 17 Staining Kit is suited to stain all vertical and horizontal gels after isoelectric focusing (IEF). The kit is convenient, safe and easy to use and contains everything needed for fixation, staining and destaining. The colloidal stain SERVA Violet 17 gives you high sensitivity when staining IEF gels. No organic solvents are needed to apply SERVA Violet 17 staining. The SERVA Violet 17 Staining Kit contains 1 g SERVA Violet 17 and 500 ml stain solubilizer solution, ready-to-use solutions for fixation (2 x 500 ml) and destaining (500 ml) and a detailed protocol for the detection procedure. The kit contains enough stain and solutions for 5 to 10 applications (large/small gels).

**SERVA VisiBlot Standard I**

HS 38220000  
Storage temperature -15 °C to -25 °C

VisiBlot Standard I is a mixture of 10 recombinant proteins of a molecular weight range from 25 kDa to 150 kDa. Protein bands of 25 kDa, 45 kDa and 85 kDa are prestained allowing monitoring of protein separation during SDS PAGE. The remaining five proteins contain several IgG binding sites. Hence marker proteins bind to primary or secondary antibodies used in Western Blotting facilitating easy marker visualization on the transfer membrane. Because the proteins have no chromophore attached, the marker enables accurate molecular weight estimation. Recommended loading volume for a mini gel is 5 µl/lane.

- ♦ Ready-to-use, no reconstitution, further dilution or heating required
- ♦ Prestained bands for monitoring electrophoresis and membrane transfer
- ♦ Visualization of marker proteins on Western Blots by horseradish peroxidase or alkaline phosphatase-based immune-detection methods
- ♦ Molecular weight determination of proteins detected on transfer membrane

**SERVAColor BCIP/NBT Blot Solution**

HS 38220000  
Storage temperature +2 °C to +8 °C

Ready-to-use, non-toxic, highly sensitive substrate solution for detection of alkaline phosphatase (AP) in membrane assays. Forms dark purple precipitates at the sites of AP activity on membranes.

- ♦ Rapid precipitate formation due to high activity
- ♦ High contrast due to very low background
- ♦ Long term stability at room temperature
- ♦ No significant fading after reaction stop

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 15245.01 | 250 ml | 207,00 |

**SERVAColor TMB Blot Solution**

HS 38220000  
Storage temperature +2 °C to +8 °C

Ready-to-use, non-toxic, highly sensitive substrate solution for detection of horseradish peroxidase (HRP) in membrane assays. Forms dark blue precipitates at the sites of HRP activity on membranes.

- ♦ Rapid precipitate formation due to high activity
- ♦ High contrast due to very low background
- ♦ Long term stability at room temperature
- ♦ No significant fading after reaction stop

#### ■ **SERVAGel™ TG PRiME™ 4 - 12 %** precast gel, 15 sample wells

HS 38220000

Storage temperature +2 °C to +8 °C \*

Obtained from proprietary development, **SERVAGel™ TG PRiME™ 4 - 12 %** features an extended shelf life and short electrophoresis times by using a standard Tris/glycine buffer system (2 gels, 35 min at 350 V const.). It can be operated under native and denaturing conditions. The separation range is from 30 up to 300 kDa.

**SERVAGel™ Neutral HSE** precast gel, 10 sample wells

HS 38220000  
Storage temperature +2 °C to +8 °C \*

The precast gel SERVAGel™ Neutral HSE is a specially for High Speed Electrophoresis developed version of the SERVAGel™ Neutral pH 7.4 Gradient (cat. no. 43223). With the standard SDS-Tris-glycine buffer system (Laemmli) it can be operated at 400 V, which reduces the electrophoresis time to 20 min.

The separation range is from 6.5 up to 200 kDa.

Obtained from proprietary development, the SERVAGel™ Neutral HSE features extended shelf life due to its neutral buffer system.

| Cat.No.  | Size    | EUR    |

### ■ **SERVAGel™ N Native Starter Kit**

HS 38220000

Storage temperature +2 °C to +8 °C \*

The SERVAGel™ N gels were developed for native gel electrophoresis. The gels can be operated in Blue and Clear Native buffer systems. Due to their neutral buffer system, the SERVAGel™ N gels feature extended shelf life.

Contains:

2 precast gels SERVAGel™ N 3 - 12, Vertical Native Gels 3 - 12 %

2 precast gels SERVAGel™ N 4 - 16, Vertical Native Gels 4 - 16 %

250 ml 10x Native Anode Buffer for BN/CN (cat. no. 42535)

250 ml 10x Native Cathode Buffer for BN/CN (cat. no. 42536)

50 µl SERVA Native Marker Liquid Mix for BN/CN (cat. no. 39219)

2 ml Sample Buffer for Blue Native (2x) (cat. no. 42533)

2 ml Sample Buffer for Clear Native (2x) (cat. no. 42534)

5 ml SERVA Blue G Solution for BN, 1 % (cat. no. 42538)

### ■ **SERVAGel™ IEF 3 - 10** precast gel, 10 sample wells

HS 38220000

Storage temperature +2 °C to +8 °C \*

The precast gel SERVAGel™ IEF 3 - 10 is suitable for isoelectric focusing (IEF) in a pH range of 3 to 8.5 (Standard IEF) and 5.5 to 11 (non-equilibrium pH gradient electrophoresis, NEPHGE). For NEPHGE you change cathode and anode buffer as well as polarity of the electrophoresis chamber. In contrast to standard IEF, samples are loaded anodic, which enables an optimal separation of basic to very basic proteins.

| Cat.No.  | Size    | EUR    |

Running Buffer Kit for SERVAGel™ IEF 3 - 10.  
Contains:  
SERVA IEF Anode Buffer (1x, powder for 5 L buffer)  
SERVA IEF Cathode Buffer 3 - 10 (10x, powder for 200 ml buffer)

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 42539.01 | 1 kit | 103,00 |

**SERVALight Polaris CL HRP WB Substrate Kit**

HS 38220000  
Storage temperature +2 °C to +8 °C

Highly sensitive enhanced chemiluminescence kit for the detection of immobilized proteins (Western Blot) or immobilized nucleic acids (Southern and Northern Blot) labelled directly with Horseradish Peroxidase (HRP) or indirectly with HRP-labelled antibodies/streptavidin. The substrate is readily prepared by mixing component A (luminol/enhancer solution) with component B (stabilized peroxide solution) in a one-to-one ratio. 0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane.

- ◆ High sensitivity, low picogram limit of detection
- ◆ Long light emission for 6 hours
- ◆ Primary antibody dilution 1:1000 -1:5000
- ◆ Secondary antibody dilution 1:20.000 – 1:100.000
- ◆ Detection can be done by film or CCD imaging equipment

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 42584.01 | 100 ml | 82,00  |
| 42584.02 | 250 ml | 161,00 |

**SERVALight Eos CL HRP WB Substrate Kit**

HS 38220000  
Storage temperature +2 °C to +8 °C

Very highly sensitive enhanced chemiluminescence kit for the detection of immobilized proteins (Western Blot) or immobilized nucleic acids (Southern and Northern Blot) labelled directly with Horseradish Peroxidase (HRP) or indirectly with HRP-labelled antibodies/streptavidin. The substrate is readily prepared by mixing component A (luminol/enhancer solution) with component B (stabilized peroxide solution) in a one-to-one ratio. 0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane.

- ◆ Very high sensitivity, mid femtogram limit of detection
- ◆ Very long and steady light emission for 12 hours
- ◆ Primary antibody dilution 1:1000 -1:15.000
- ◆ Secondary antibody dilution 1:25.000 – 1:150.000
- ◆ Detection can be done by film or CCD imaging equipment

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 42585.02 | 250 ml | 207,00 |

**SERVALight EosUltra CL HRP WB Substrate Kit**

HS 38220000  
Storage temperature +2 °C to +8 °C

Ultrahigh sensitive enhanced chemiluminescence kit for the detection of immobilized proteins (Western Blot) or immobilized nucleic acids (Southern and Northern Blot) labelled directly with Horseradish Peroxidase (HRP) or indirectly with HRP-labelled antibodies/streptavidin. The substrate is readily prepared by mixing component A (luminol/enhancer solution) with component B (stabilized peroxide solution) in a one-to-one ratio. 0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane. SERVALight EosUltra substrate is optimized for maximum length of light emission and therefore ideal for detection by CCD imaging systems.

- ◆ Ultrahigh sensitivity, mid to low femtogram limit of detection
- ◆ Extremely long light emission at a very high signal level for 18 hours
- ◆ Primary antibody dilution 1:5000 -1:50.000
- ◆ Secondary antibody dilution 1:50.000 – 1:250.000
- ◆ Detection can be done preferably by CCD imaging equipment or film

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 42586.02 | 100 ml | 408,00 |

### ■ SERVALight Helios CL HRP WB Substrate Kit

HS 38220000

Storage temperature +2 °C to +8 °C

Extremely sensitive enhanced chemiluminescence kit for the detection of immobilized proteins (Western Blot) or immobilized nucleic acids (Southern and Northern Blot) labelled directly with Horseradish Peroxidase (HRP) or indirectly with HRP-labelled antibodies/streptavidin.

The substrate is readily prepared by mixing component A (luminol/enhancer solution) with component B (stabilized peroxide solution) in a one-to-one ratio. 0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane.

Due to the extremely high light output of the SERVALight Helios substrate very short exposure times or very high dilution of antibodies can be used. Especially when using film detection this is critical to receive optimal performance.

- ◆ Extreme sensitivity, low femtogram limit of detection
- ◆ Long light emission for 8 hours
- ◆ Primary antibody dilution 1:5000 -1:100,000
- ◆ Secondary antibody dilution 1:100,000 – 1:500,000
- ◆ Detection can be done preferably by CCD imaging equipment or film

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|

### ■ SERVALight Vega CL HRP WB Substrate Kit

HS 38220000

Storage temperature +2 °C to +8 °C

Highly sensitive enhanced chemiluminescence kit for the detection of immobilized proteins (Western Blot) or immobilized nucleic acids (Southern and Northern Blot) labelled directly with Horseradish Peroxidase (HRP) or indirectly with HRP-labelled antibodies/streptavidin. The substrate is readily prepared by mixing component A (luminol/enhancer solution) with component B (stabilized peroxide solution) in a one-to-one ratio. 0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane.

- ◆ High sensitivity, mid picogram limit of detection
- ◆ Directly compatible with protocols of standard ECL WB substrates of other vendors
- ◆ Low background, high signal/noise ratio
- ◆ Working solution is stable for minimum 5 days – reproducible results, less waste
- ◆ Primary antibody dilution 1:100 -1:5000
- ◆ Secondary antibody dilution 1:1000 – 1:15,000
- ◆ Detection can be done by film or CCD imaging equipment

| Cat.No.  | Size   | EUR    |
|----------|--------|--------|
| 42588.02 | 250 ml | 151,00 |
| 42588.03 | 500 ml | 264,00 |

### ■ SERVALight PreMix Vega CL HRP WB Substrate

HS 38220000

Storage temperature +15 °C to +30 °C

SERVALight PreMix chemiluminescent horseradish peroxidase (HRP) substrates are ready-to-use solutions for convenient and fast detection of proteins in Western Blotting. The pre-mixed solutions save time and increase consistency in your results, avoiding pipetting errors and possible contaminations.

SERVALight PreMix Vega is an entry-level HRP Western Blot substrate, ideal for routine analysis.

0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane.

- ◆ High sensitivity, mid picogram limit of detection
- ◆ No mixing, ready-to-use at room temperature
- ◆ Low background, high signal/noise ratio
- ◆ Primary antibody dilution 1:100 -1:5000
- ◆ Secondary antibody dilution 1:1000 – 1:15,000
- ◆ Signal duration 3 hours

### ■ SERVALight PreMix Eos CL HRP Substrate

HS 38220000

Storage temperature +15 °C to +30 °C

SERVALight PreMix chemiluminescent horseradish peroxidase (HRP) substrates are ready-to-use solutions for convenient and fast detection of proteins in Western Blotting. The pre-mixed solutions save time and increase consistency in your results, avoiding pipetting errors and possible contaminations.

SERVALight PreMix Eos is a versatile HRP Western Blot substrate. Its high signal intensity combined with a broad linear dynamic range allows an accurate quantification of both low and high abundance proteins on the same Western Blot.

0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane.

- ◆ Very high sensitivity, mid femtogram limit of detection
- ◆ No mixing, ready-to-use at room temperature
- ◆ Low background, high signal/noise ratio
- ◆ Primary antibody dilution 1:1000 -1:15,000
- ◆ Secondary antibody dilution 1:25,000 – 1:150,000
- ◆ Signal duration 4 hours

| Cat.No.  | Size   | EUR    |

| 42656.01 | 250 ml | 238,00 |

### ■ SERVALight PreMix Helios CL HRP WB Substrate

HS 38220000

Storage temperature +15 °C to +30 °C

SERVALight PreMix chemiluminescent horseradish peroxidase (HRP) substrates are ready-to-use solutions for convenient and fast detection of proteins in Western Blotting. The pre-mixed solutions save time and increase consistency in your results, avoiding pipetting errors and possible contaminations.

SERVALight PreMix Helios is an extremely sensitive HRP Western Blot substrate with excellent signal intensity, which enables to detect very low amounts of proteins reducing the needed quantity of antibodies.

0.1 ml substrate is sufficient for one cm<sup>2</sup> membrane.

- ◆ Extreme sensitivity, low femtogram limit of detection
- ◆ No mixing, ready-to-use at room temperature
- ◆ Low background, high signal/noise ratio
- ◆ Primary antibody dilution 1:5000 -1:100,000
- ◆ Secondary antibody dilution 1:100,000 – 1:500,000
- ◆ Signal duration 2 hours

**SERVALYT™ PRECOTES™ Wide Range pH 3-10**

(Precast Gels for IEF; PRECOTES™)

DANGER

H340-H350 ◆ HS 38220000

Storage temperature +2 °C to +8 °C

PAG Layer 150 µm; size 125 x 125 mm.

Horizontal precast polyacrylamide gels for IEF. The ultra-thin layer guarantees short focusing and staining/destaining times with high resolution and band sharpness. Gels are cast on a stable, inert polyester support film. Therefore they are despite the thin layer easy to handle and protected against mechanical damages like e. g. ripping of the gel matrix. The thin cover sheet (GEL-FIX™ for covers) prevents the surface from drying out and damages.

### SERVAPOR® Closure, 110 mm

HS 39173200

Made from polyamide. Specifically designed for leak-free soaking of dialysis membranes. Do not float, autoclavable.

| Cat.No.  | Size      | EUR   |
|----------|-----------|-------|
| 44610.01 | 10 pieces | 35,00 |

### SERVAPOR® 3 dialysis tubing, MWCO 3500

RC, diameter 16 mm

HS 39173200

Packed dry, made from regenerated cellulose (RC). With glycerol as protection for embrittlement, which can be easily removed by soaking in water. Contain low level of heavy metal and sulfide impurities. Highly resistant against chemicals, suitable for pH range 2 – 12 and temperatures 4 – 60 °C. Delivered with a pair free of charge dialysis membrane closures and manual.

**Sialidase, recombinant lyophilized**

(Neuraminidase, Exoglycosidase)

Mr 85.000

Storage Temperature: +15 °C to +30 °C

Sialidases are a family of exoglycosidases that catalyze the cleavage of non-reducing sialic acid residues of mono- or oligosaccharide chains on glycoconjugates. SERVA Sialidase, a recombinant glycosidase from *Arthrobacter ureafaciens*, cleaves α2,3-, α2,6- and α2,8- linked sialic acids. Because of its broad substrate specificity, Sialidase is capable of completely removing sialic acids from glycoconjugates of a wide variety of biological materials (cells, antibodies, serum, tissues etc.).

◆ Especially designed and tested for mass spectrometry imaging and HPLC/UPLC

◆ Contains a His-tag for easy removal by affinity chromatography

Because the enzyme is lyophilized, there is no need for refrigerated transport and storage is at room temperature. Concentration after reconstitution: 50 u/µl in 100 µl H<sub>2</sub>O dest.

**Unit definition:** Denatured alpha-1-antitrypsin (A1AT) (10µg) is incubated with 1 µL of reconstituted Sialidase for 60 minutes at 37 °C and then analyzed by SDS-PAGE and analysis with the sialic acid binding Sambucus nigra lectin (SNA).

### ■ SingleQuant Assay Kit

DANGER  
H225-H314 ♦ HS 38220000  
Storage temperature +2 °C to +8 °C

Single tube format assay kit for protein quantification. The assay bases on the precipitation of proteins as insoluble dye complexes with acidic, ethanolic amido black 10B solution (1,2). After precipitation the protein-dye complexes are spinned down. The pellet is washed and resububilized. The thereby released dye amount is measured at 624 nm.

- ◆ Precise, reproducible, reliable assay data
- ◆ Completed in only 45 min.
- ◆ No interference with detergents or reducing agents
- ◆ Detection range starts as low as 2 µg protein.

### ■ Skim Milk Powder for blotting

CAS [68514-61-4]

HS 04021011

Skim milk powder is used as a blocking reagent in immunological assays like Western Blotting or ELISA. It is as well suitable for blocking of nitrocellulose filters in cDNA cloning.

It is not suitable for biotin/streptavidin detection systems, because milk contains biotin.

**di-Sodium hydrogen phosphate-2H<sub>2</sub>O** research grade, Ph. Eur., USP

CAS [10028-24-7]

EINECS 231-448-7  $\diamond$  WGK 1L  $\diamond$  HS 28352200

Buffer substance for biochemical, enzymatic and histochemical assays.

Assay (dried basis) 99.0 - 100.5 %  
 pH 1 % in water 9,0 - 9,6  
 Heavy metals (Pb) max. 10 ppm

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 30201.01 | 500 g | 26,00 |
| 30201.02 | 1 kg  | 42,00 |

**di-Sodium hydrogen phosphate-2H<sub>2</sub>O** analytical grade

(Sodium phosphate dibasic (sec. sodium phosphate))  
 $Na_2HPO_4 \cdot 2H_2O$   $\diamond$  M, 177.99  $\diamond$  CAS [10028-24-7]

EINECS 231-448-7  $\diamond$  WGK 1L  $\diamond$  HS 28352200

Buffering substance according to Sørensen. Biochemical and enzymatic standard, tested for use in tissue culture.

Assay (titr.) min. 99.5 %  
 pH 5 % solution 9.0 - 9.2  
 Heavy metals (Pb) max. 10 ppm  
 Nitrogen (N) max. 10 ppm

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 30200.01 | 500 g | 29,00 |

| 35231.02 | 1 kg | 37,00 |

### ■ Spacer Strips

HS 39269097

Silicone, size 265 x 7 x 0.5 mm, for forming the mould in capillary casting techniques.

| Cat.No.  | Size     | EUR   |
|----------|----------|-------|
| 42901.01 | 4 pieces | 26,00 |

### ■ Spectinomycin-2HCl pentahydrate

(Actinospectacin; M 141)

C<sub>14</sub>H<sub>24</sub>N<sub>2</sub>O<sub>7</sub>·2HCl·5H<sub>2</sub>O ♦ M<sub>r</sub> 495.4 ♦ CAS [22189-32-8]

WARNING

H315-H319-H335 ♦ EINECS 244-554-3 ♦ HS 29419000

Storage temperature +2 °C to +8 °C

Cell culture tested.

Water-soluble aminoglycoside antibiotic from *Streptomyces sp.* (1,2). Inhibitor of protein synthesis (3). Differs from other aminoglycoside derivatives in that it is bacteriostatic instead of bactericidal.

**Stock solution:** 10 mg/ml in distilled water, sterile filtered.

For molecular biology applications standard working concentration is 100 µg/ml and in cell culture 7.5 – 20 mg/l.

### ■ Spectra/Por® 1 dialysis tubing, MWCO 6000 - 8000

RC, diameter 6.4 mm

HS 39173200

Packed dry, with glycerol as protection for embrittlement, which can easily be removed by soaking in water. Contains low level of heavy metal and sulfide impurities.

Nominal dry flat width 10 mm  
Nominal dry diameter 6.4 mm  
Approx. filling volume 0.32 ml/cm  
Nominal dry wall thickness 30 - 50 µm

| Cat.No.  | Size | EUR    |
|----------|------|--------|
| 44170.01 | 15 m | 333,00 |

### ■ Spectra/Por® 1 dialysis tubing, MWCO 6000 - 8000

RC, diameter 14.6 mm

HS 39173200

Packed dry, with glycerol as protection for embrittlement, which can easily be removed by soaking in water. Contains low level of heavy metal and sulfide impurities.

Nominal dry flat width 23 mm  
Nominal dry diameter 14.6 mm  
Approx. filling volume 1.7 ml/cm  
Nominal dry wall thickness 30 - 50 µm

| Cat.No.  | Size | EUR    |
|----------|------|--------|
| 44171.01 | 30 m | 333,00 |

### ■ Spectra/Por® 1 dialysis tubing, MWCO 6000 - 8000

RC, diameter 20.4 mm

HS 39173200

Packed dry, with glycerol as protection for embrittlement, which can easily be removed by soaking in water. Contains low level of heavy metal and sulfide impurities.

Nominal dry flat width 32 mm  
Nominal dry diameter 20.4 mm  
Approx. filling volume 3.3 ml/cm  
Nominal dry wall thickness 30 - 50 µm

#### Note:

The trial size of 5 m includes additionally one standard Spectra/Por® closure, one weighted Spectra/Por® closure and 5 opening picks.

### ■ Sulforhodamine B Cytotoxicity Assay

HS 38220000

The Sulforhodamine B (SRB) Cytotoxicity Assay, developed in 1990, remains one of the most widely used methods for *in vitro* cytotoxicity screening. It relies on the ability of SRB to bind to protein components of cells fixed to tissue culture plates. SRB is a bright-pink aminoxanthene dye with two sulfonic groups that bind to basic amino acid residues under mild acidic conditions and dissociate under basic conditions. As the binding of SRB is stoichiometric, the amount of dye extracted from stained cells is directly proportional to the cell mass.

The fixed dye is solubilized and is measured photometrically at OD 540 nm with a reference filter of 690 nm. The OD values correlate with total protein content and therefore with cell number.

The assay is sensitive, simple, reproducible and more rapid with better linearity than the formazan-based assays. It has a good signal-to-noise ratio and has a stable end-point that does not require a time-sensitive measurement, as do the MTT or XTT assays.

**Content:** 0.4 g Sulforhodamine dye, 2x 50 ml Fixative Reagent, 2x 50 ml 10x Dye Wash Solution, 4x 50 ml SRB Solubilization Buffer

| Cat.No.  | Size  | EUR    |

### ■ Super Co-NTA Agarose Resin

HS 38220000

Super Cobalt NTA Affinity Resin designed for affinity purification of polyhistidine tagged proteins. Cobalt ions are carefully loaded onto a 7.5 % cross-linked agarose matrix (medium particle diameter 40 µm) via a NTA coupled ligand to obtain a stable affinity matrix with the highest binding capacity for histidine residues (up to 10 mg/ml determined from *E. coli* cleared lysate). Other metal ions such as Ni<sup>2+</sup>, Zn<sup>2+</sup>, Fe<sup>3+</sup>, and Al<sup>3+</sup> can also be used resulting in different affinities. If required, the cobalt ions can be removed from the agarose matrix using 5 wash steps with 100 mM EDTA, and the matrix recharged with a different metal ion.

#### Specifications

Specificity: Polyhistidine tag  
 Matrix: 7.5 % cross linked agarose  
 Coupled ligand: Nitrilotriacetic acid (NTA)  
 Binding capacity: 30 mg/ml  
 Bead size: 32 – 60 µm (40 µm medium)  
 Flow rate: 0.25 – 1 ml/min (optimum), 6 ml/min (max.)  
 Maximum pressure: 72 psi  
 Buffer compatibility: Common aqueous buffers from pH 2 - 14  
 Cleaning buffer examples: 100 % methanol, 100 % ethanol, 8 M urea, 6 M guanidinium hydrochloride, 30 % (v/v) acetonitrile  
 Shipping/delivery: 50 % (v/v) resin suspension in 20 % ethanol at ambient temperature  
 Storage: Equilibration buffer at 2 - 8 °C (short-term) 20 % ethanol at 2 - 8 °C (long-term)

Super Cobalt NTA Affinity Resin designed for affinity purification of polyhistidine tagged proteins. Cobalt ions are carefully loaded onto a 7.5 % cross-linked agarose matrix (medium particle diameter 40 µm) via a NTA coupled ligand to obtain a stable affinity matrix with the highest binding capacity for histidine residues (up to 10 mg/ml determined from *E. coli* cleared lysate). Other metal ions such as Ni<sup>2+</sup>, Zn<sup>2+</sup>, Fe<sup>3+</sup>, and Al<sup>3+</sup> can also be used resulting in different affinities. If required, the cobalt ions can be removed from the agarose matrix using 5 wash steps with 100 mM EDTA, and the matrix recharged with a different metal ion.

#### Specifications

Specificity: Polyhistidine tag  
 Matrix: 7.5 % cross linked agarose  
 Coupled ligand: Nitrilotriacetic acid (NTA)  
 Binding capacity: 30 mg/ml  
 Bead size: 32 – 60 µm (40 µm medium)  
 Flow rate: 0.25 – 1 ml/min (optimum), 6 ml/min (max.)  
 Maximum pressure: 72 psi  
 Buffer compatibility: Common aqueous buffers from pH 2 - 14  
 Cleaning buffer examples: 100 % methanol, 100 % ethanol, 8 M urea, 6 M guanidinium hydrochloride, 30 % (v/v) acetonitrile  
 Shipping/delivery: 50 % (v/v) resin suspension in 20 % ethanol at ambient temperature  
 Storage: Equilibration buffer at 2 - 8 °C (short-term) 20 % ethanol at 2 - 8 °C (long-term)

**Super Ni-NTA Agarose Resin**

HS 38220000

Super Nickel NTA Affinity Resin designed for affinity purification of polyhistidine tagged proteins. Nickel ions are carefully loaded onto a 7.5 % cross-linked agarose matrix (medium particle diameter 40 µm) via a NTA coupled ligand to obtain a stable affinity matrix with the highest binding capacity for histidine residues (up to 70 mg/ml determined from *E. coli* cleared lysate). Other metal ions such as Co<sup>2+</sup>, Zn<sup>2+</sup>, Fe<sup>3+</sup>, and Al<sup>3+</sup> can also be used resulting in different affinities.

If required, the nickel ions can be removed from the agarose matrix using 5 wash steps with 100 mM EDTA, and the matrix recharged with a different metal ion.

**Specifications**

Specificity: Polyhistidine tag  
 Matrix: 7.5 % cross linked agarose  
 Coupled ligand: Nitrilotriacetic acid (NTA)  
 Binding capacity: 70 mg/ml  
 Bead size: 32 – 60 µm (40 µm medium)  
 Flow rate: 0.25 – 2 ml/min (optimum), 6 ml/min (max.)  
 Maximum pressure: 72 psi  
 Buffer compatibility: Common aqueous buffers from pH 2 - 14  
 Cleaning buffer examples: 100 % methanol, 100 % ethanol, 8 M urea, 6 M guanidinium hydrochloride, 30 % (v/v) acetonitrile  
 Shipping/delivery: 50 % (v/v) resin suspension in 20 % ethanol at ambient temperature  
 Storage: Equilibration buffer at 2 - 8 °C (short-term) 20 % ethanol at 2 - 8 °C (long-term)

### ■ Synperonic® F108 pract.

M<sub>r</sub> ca. 14000 ♦ CAS [9003-11-6]

WGK 1L ♦ HS 34021900

The tensid Synperonic® F108, a polyoxyethylene-polyoxypropylene block copolymer, is an effective solubilizer for substances demonstrating pharmaceutical activity. The strongly hydrophilic non-ionic detergent demonstrates good adsorption characteristics. These particular properties may be of interest in pharmaceutical chemistry e.g. for the coating of liposomes. Synperonic® F108 is used as cleansing agent, emulsifier, dispersant, wetter, solubilizer and adjuvant for lentiviral transduction. Polypropylene glycol (M<sub>r</sub> ca. 3 250): poly(ethylene glycol) ca. 1:4. MP 55 - 60 °C; HLB ca. 27. More than 10 % soluble in water.  
Synperonic = Registered trademark of ICI

### TEV Protease, recombinant

M<sub>r</sub> 28.000  
HS 35079090  
Storage Temperature: -15 °C to -25 °C

Recombinant TEV Protease is a highly site-specific cysteine protease, which is found in the Tobacco Etch Virus. Due to its sequence specificity, the enzyme is a very powerful reagent for removal of fusion tags from recombinant proteins after protein purification. The enzyme has been genetically modified to increase its activity and resistance to autolysis. It consists of the catalytic domain with an N-terminal polyhistidine tag. It recognizes a seven amino acid sequence of the general form Glu-X-X-Gln-Gly/Ser, most commonly Glu-Asn-Leu-Tyr-Phe-Gln-Gly, and cleaves between glutamine and glycine or serine. Using the polyhistidine tag at the N-terminus of the protease the enzyme can be easily removed from the cleavage reaction by affinity chromatography following digestion.

**Specific activity:** 10 U/μl

**Unit definition:** 1 μl cleaves >80 % of 50 μg control substrate in three hours at 30 °C.

Storage temperature +2 °C to +8 °C

Serine protease that activates factor XIII and converts fibrinogen to fibrin by selectively cleaving Arg-Gly bonds. Suitable for removal of a tag, e.g. GST-tag, from a recombinant fusion protein containing an accessible thrombin recognition sequence.

**Unit definition:** 1 NIH unit clots a standard fibrinogen solution in 15 s at 37 °C (1).

**Extraneous activities:** very low fibrinolytic activity

**Transferrin human (Apo) lyophil.**

(Siderophilin)  
 M<sub>r</sub> ca. 77 000

HS 35040090

Storage temperature -15 °C to -25 °C

Serum-free cell culture systems require a delivery format for iron. Transferrin is the preferential delivery form of iron because cells process transferrin bound iron in a physiologically appropriate way through transferrin receptors on the cell surface. Human apo-transferrin is a high affinity transferrin that can be used with a wide range of cells types. Apo-transferrin can be loaded with iron prior to use or added directly to an iron containing medium. Iron-poor, iron (Fe) max. 0.003 %. Donor units tested for HbsAg, Anti-HCV, Anti-HIV-1, anti-HIV-2, and Syphilis by FDA approved tests.

Protein content min. 98.0 %

$C_{19}H_{15}ClN_4$  ♦  $M_r$  334.79 ♦ CAS [298-96-4]

WARNING

H315-H319-H335 ♦ EINECS 206-071-6 ♦

HS 29339980

Triphenyltetrazolium chloride, abbreviated TTC, is used in biochemistry to measure the activity of dehydrogenases. In vital staining living cells are detected through the reduction of the colourless, water-soluble tetrazolium dye to a deep red, water-insoluble formazan via the dehydrogenases of the respiratory chain. Furthermore, TTC can be used in microbiology to distinguish between coliform and noncoliform bacteria, to measure the bacterial content of liquids in food analysis and to determine seed vitality.

DANGER

H314 ♦ GGVSE/ADR 8 II UN3261 ♦ IATA 8 II UN3261 ♦ WGK 1 ♦  
HS 29420000

Storage temperature +2 °C to +8 °C

Water-soluble and odorless reagent for selective and fast reduction of disulfides. Does not react with other functional groups of proteins. Unreactive towards many common alkylating reagents, so reductions have been carried out simultaneously with alkylations. More stable and effective than DTT. The strength of the phosphorus-oxygen bond makes the reaction irreversible. Dilute solutions of TCEP (1 mM) react rapidly at room temperature. Suitable also in mass spectrometry applications.

Assay (titr.) 98.0 – 102.0 %

### N-Tris(hydroxymethyl)methylglycine analytical grade

(Tricine)

$C_6H_{13}NO_5$   $M_r$  179.17  $\blacklozenge$  CAS [5704-04-1]

EINECS 227-193-6  $\blacklozenge$  WGK 1  $\blacklozenge$  HS 29225000

Tris(hydroxymethyl)methylglycine (Tricine) is a zwitterionic Good's buffer used in biochemistry and molecular biology. The buffer is part of the Tris buffer family and has a useful pH range of 7.4 – 8.8, pKa 20 = 8.15 (1). Tricine is optimal to separate peptides that are in the molecular weight range of 1 to 100 kDa in SDS-PAGE. It is also used in capillary zone electrophoresis, high performance liquid chromatography and ion exchange chromatography. It is the best buffer for ATP assays involving firefly luciferase and is a scavenger of hydroxyl radicals. Tricine forms a complex with Cu(II) and is therefore used in the Lowry protein assay. The buffer is a non-toxic substitute for barbital (2).

### Tris(hydroxymethyl)methylglycine electrophoresis grade

(Tricine)

$C_6H_{13}NO_5$   $M_r$  179.17  $\blacklozenge$  CAS [5704-04-1]

EINECS 227-193-6  $\blacklozenge$  HS 29221985

In the Tricine gel system developed by Schaeffer and von Jagow (1), Tricine replaces glycine in the running buffer. This results in higher resolution of low molecular weight proteins and of smaller peptides.

Ultrapure quality, tested for use in electrode buffers for PAGE.

 Storage temperature +2 °C to +8 °C

For the determination of urea (1).  
 Urease is involved in purine metabolism and the urea cycle. It hydrolyzes urea to produce ammonia and carbon dioxide.

**Unit definition:** 1 U catalyzes the formation of 1 µmole ammonia per minute at 25 °C, pH 8.0 from urea, determined in a coupled reaction with GLDH (2).

**Activity in other units:** If the unit of activity is defined in terms of 1 µmole urea decomposed per minute, this preparation would contain at least 90 units/mg.

HS 39173200

Packed dry, made from regenerated cellulose (RC). With glycerol as protection for embrittlement, which can be easily removed by soaking in water. Contain low level of heavy metal and sulfide impurities. Highly resistant against chemicals, suitable for pH range 2 – 12 and temperatures 4 – 60 °C.

Pore diameter ca. 25 Å  
Nominal dry flat width 10 mm  
Nominal dry diameter 6 mm  
Approx. filling volume 0.3 ml/cm  
Nominal dry wall thickness 51 µm

| Cat.No.  | Size | EUR    |
|----------|------|--------|
| 44104.01 | 5 m  | 54,00  |
| 44104.02 | 30 m | 225,00 |

**VISKING dialysis tubing, MWCO 12 000 - 14 000**

RC, diameter 16 mm

HS 39173200

Packed dry, made from regenerated cellulose (RC). With glycerol as protection for embrittlement, which can be easily removed by soaking in water. Contain low level of heavy metal and sulfide impurities. Highly resistant against chemicals, suitable for pH range 2 – 12 and temperatures 4 – 60 °C.

Pore diameter ca. 25 Å  
Nominal dry flat width 25 mm  
Nominal dry diameter 16 mm  
Approx. filling volume 2.0 ml/cm  
Nominal dry wall thickness 20 µm

**Vitamin B<sub>1</sub> hydrochloride**

see 36020 Thiamine-HCl, page 135

### ■ Vitamin B<sub>12</sub> cryst. pure, Ph. Eur., USP

(Cyanocobalamin; Extrinsic Factor; Antianemic vitamin B)  
C<sub>63</sub>H<sub>88</sub>N<sub>14</sub>O<sub>14</sub>PCo ♦ M<sub>r</sub> 1355.4 ♦ CAS [68-19-9]

EINECS 200-680-0 ♦ WGK 1L ♦ HS 29362600

Vitamin, which works as a coenzyme in fat, carbohydrate and protein metabolism. It is required for growth, genetic stability and survival of cells in vitro and is therefore a component of many classical and serum-free formulations.

Non-animal origin.

Storage temperature +2 °C to +8 °C

Assay (UV), dried 96.0 - 100.5 %

Protect from light!

### ■ Water for UHPLC-MS

CAS [7732-18-5]

EINECS 231-791-2 ♦ HS 28539010

Special grade for excellent performance in ultra high performance liquid chromatography-tandem mass spectrometry (UHPLC-MS/MS).

Conductivity ≤ 0.09 µS/cm  
Total organic carbon ≤ 10 ppb  
Acidity ≤ 0.0002 %  
Alkalinity ≤ 0.00005 %  
Residue on evaporation ≤ 0.4 ppm

#### Transmittance

200 nm min. 95.0 %  
230 nm min. 99.0 %

#### UHPLC gradient peak

210 nm max. 2 mAU  
Drift at 210 nm max. 8 mAU  
Drift at 254 nm max. 3 mAU

#### Test LC-MS TIC (50 – 2000 m/z)

##### ES I(+)

Sensitive impurities (reserpine) max. 30 ppb

#### Metal Compounds

Na/K/Ca max. 50 ppb  
Al/Fe/Mg max. 20 ppb

Microfiltered, 0.1 µm

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|

### □ X-Gal

see 15243 5-Bromo-4-chloro-3-indolyl-β-D-galactoside (X-Gal), page 21

### ■ Xpress Blotting Buffer (10x) for Western Blotting

HS 38220000

The Xpress Blotting Buffer is a ready-to-use buffer reagent for the fast and efficient semi-dry transfer of high and low molecular weight proteins in only 15 min. The buffer system is compatible with nitrocellulose and PVDF membranes. Sufficient for at least 40 vertical mini SDS PAGE gels.

| Cat.No.  | Size | EUR   |
|----------|------|-------|
| 42661.01 | 1 L  | 85,00 |

### ■ Xpress Blotting Kit for Western Blotting

HS 38220000

Kit for fast Semi-Dry Western Blotting of 10 vertical mini SDS PAGE gels. SERVA Xpress Blotting Buffer is a ready-to-use buffer reagent for the fast and efficient semi-dry transfer of high and low molecular weight proteins in only 15 min.

The use of SERVA's newly developed Blotting Fleece instead of blotting paper allows an efficient, undisturbed transfer in a short time. The buffer system is compatible with nitrocellulose and PVDF membranes.

#### Content:

250 ml 10x SERVA Xpress Blotting Buffer  
20x Blotting Fleece sheets (size 80 mm x 85 mm)  
10x Connection Paper (size 80 mm x 85 mm)

| Cat.No.  | Size  | EUR   |
|----------|-------|-------|
| 42662.01 | 1 kit | 69,00 |

### ■ Xpress NC Blotting Kit for Western Blotting

HS 38220000

Kit for fast Semi-Dry Western Blotting of 10 vertical mini SDS PAGE gels on nitrocellulose membrane.

SERVA Xpress Blotting Buffer is a ready-to-use buffer reagent for the fast and efficient semi-dry transfer of high and low molecular weight proteins in only 15 min. The use of SERVA's newly developed Blotting Fleece instead of blotting paper allows an efficient, undisturbed transfer in a short time. The pre-cut nitrocellulose membrane sheets show high protein binding, low background and improved stability for easier handling and re-probing.

#### Content:

250 ml 10x SERVA Xpress Blotting Buffer  
20x Blotting Fleece sheets (size 80 mm x 85 mm)  
10x Connection Paper (size 80 mm x 85 mm)  
10x Nitrocellulose membrane sheets, pore size 0.2 µm (size 80 mm x 85 mm)

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 42663.01 | 1 kit | 156,00 |

### ■ Xpress PVDF Blotting Kit for Western Blotting

HS 38220000

Kit for fast Semi-Dry Western Blotting of 10 vertical mini SDS PAGE gels on PVDF membrane.

SERVA Xpress Blotting Buffer is a ready-to-use buffer reagent for the fast and efficient semi-dry transfer of high and low molecular weight proteins in only 15 min. The use of SERVA's newly developed Blotting Fleece instead of blotting paper allows an efficient, undisturbed transfer in a short time. The pre-cut PVDF membrane sheets with the pore size of 0.2 µm show high protein binding and low background.

#### Content:

250 ml 10x SERVA Xpress Blotting Buffer  
20x Blotting Fleece sheets (size 80 mm x 85 mm)  
10x Connection Paper (size 80 mm x 85 mm)  
10x PVDF membrane sheets, pore size 0.2 µm (size 80 x 85 mm)

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 42664.01 | 1 kit | 212,00 |

**Xpress Micro Dialyzer MD100, MWCO 2 kDa** 1 cartridge

HS 39173300

The Xpress Micro Dialyzer MD100 is a ready-to-use dialysis system for sample volumes from 10 µl to 100 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 25 µl increments on both sides.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis – desalting of nucleic acids and proteins in ca. 30 min
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ Compatible with 96-well deep well plates and 8-channel multipipettes
- ◆ Flexible – dialysis against small volumes in micro tubes or microtiter plates and against larger volumes (with floating device) possible

**Content:** 1 detachable 8-microdialysis device strip

| Cat.No.  | Size     | EUR   |
|----------|----------|-------|
| 46088.01 | 8 pieces | 45,00 |

**Xpress Micro Dialyzer MD100, MWCO 2 kDa**

12 cartridges in deep well plate

HS 39173300

The Xpress Micro Dialyzer MD100 is a ready-to-use dialysis system for sample volumes from 10 µl to 100 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 25 µl increments on both sides.

**Xpress Micro Dialyzer GridKit 48 MD100, MWCO 3.5 kDa**

6 cartridges in deep well plate incl. grid

HS 39173300

The Xpress Micro Dialyzer MD100 is a ready-to-use dialysis system for sample volumes from 10 µl to 100 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 25 µl increments on both sides.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis – desalting of nucleic acids and proteins in ca. 30 min
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ More space for pipetting of the dialysis buffer
- ◆ Comfortable buffer exchange, e.g. rebuffering of your samples
- ◆ Secure grip of the Micro Dialyzer

**Content:** 6 detachable 8-microdialysis device strips, one 48-well deep well plate (5.0 ml volume), one grid, one lid

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 46105.01 | 1 kit | 250,00 |

**Xpress Micro Dialyzer GridKit 48 MD100, MWCO 6 - 8 kDa** 6 cartridges in deep well plate incl. grid

HS 39173300

The Xpress Micro Dialyzer MD100 is a ready-to-use dialysis system for sample volumes from 10 µl to 100 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 25 µl increments on both sides.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis – desalting of nucleic acids and proteins in ca. 30 min
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ More space for pipetting of the dialysis buffer
- ◆ Comfortable buffer exchange, e.g. rebuffering of your samples
- ◆ Secure grip of the Micro Dialyzer

### ■ Xpress Micro Dialyzer MD300, MWCO 2 kDa 1 cartridge

HS 39173300

The Xpress Micro Dialyzer MD300 is a ready-to-use dialysis system for sample volumes from 50 µl to 300 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 75 µl increments on both sides.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis – desalting of nucleic acids and proteins in ca. 30 min
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ Compatible with 96-well deep well plates and 8-channel multipipettes
- ◆ Flexible – dialysis against small volumes in micro tubes or microtiter plates and against larger volumes (with floating device) possible

**Content:** 1 detachable 8-microdialysis device strip

| Cat.No.  | Size     | EUR   |
|----------|----------|-------|
| 46094.01 | 8 pieces | 49,00 |

### ■ Xpress Micro Dialyzer MD300, MWCO 2 kDa

12 cartridges in deep well plate

HS 39173300

The Xpress Micro Dialyzer MD300 is a ready-to-use dialysis system for sample volumes from 50 µl to 300 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 75 µl increments on both sides.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis – desalting of nucleic acids and proteins in ca. 30 min
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ Flexible – dialysis against small volumes in micro tubes or microtiter plates and against larger volumes (with floating device) possible
- ◆ Automation compatible – plate format conforms to the SBS Microplate Standard

**Content:** 12 detachable 8-microdialysis device strips, one 96-well deep well plate (2.2 ml volume)

| Cat.No.  | Size  | EUR    |
|----------|-------|--------|
| 46095.01 | 1 kit | 551,00 |

### ■ Xpress Micro Dialyzer MD300, MWCO 3.5 kDa

single fingers in microtube

HS 39173300

The Xpress Micro Dialyzer MD300 is a ready-to-use dialysis system for sample volumes from 50 µl to 300 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 75 µl increments on both sides.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis – desalting of nucleic acids and proteins in ca. 30 min
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ Flexible – dialysis against small volumes in micro tubes or microtiter plates and against larger volumes (with floating device) possible

**Content:** 12 single microdialysis devices in 2 ml microcentrifuge tube

| Cat.No.  | Size      | EUR   |
|----------|-----------|-------|
| 46118.01 | 12 pieces | 63,00 |

The Xpress Equilibrium Dialyzer ED300 is a ready-to-use dialysis system for sample volumes from 50 µl to 300 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device consists of a U-shaped capillary made from polypropylene with graduation marks in 75 µl increments on both sides. Optimized design for fast and easy equilibrium dialysis.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis – desalting of nucleic acids and proteins in ca. 30 min
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ Ideally suited for dialysis in liquid handling systems
- ◆ Automation compatible – plate format conforms to the SBS Microplate Standard

**Content:** 12 detachable 8-microdialysis device strips, one 96-well deep well plate (2.2 ml volume)

| Cat.No.  | Size  | EUR    |

### ■ Xpress Mini Dialyzer MD1000, MWCO 2 kDa

single fingers in tube

HS 39173300

The Xpress Mini Dialyzer MD1000 is a ready-to-use dialysis system for sample volumes from 150 µl to 1000 µl. Short diffusion distance and large surface area allow very rapid dialysis. The device has two capillary channels, one for sample loading and one for filling of the dialysis buffer. The Mini Dialyzer MD1000 is easily coupled to a strip by a key/slot mechanism.

- ◆ High-quality regenerated cellulose membranes
- ◆ Efficient and fast dialysis, easy change of dialysis buffer
- ◆ Up to 98 % sample recovery
- ◆ Easy handling – sample loading and retrieval can be done with standard laboratory micropipettes
- ◆ Scalable from 1 to 48 samples
- ◆ Compatible with standard 48-well deep well plates

**Xpress Dialysis Box**

HS 39173300

With the Xpress Dialysis Box, up to 96 samples can be dialysed against a common buffer reservoir. Compared to the use of deep well plates, a larger buffer volume is achieved. This allows dialysis efficiency and speed to be increased.

- ◆ Suitable for Xpress Dialyzer MD100, MD300, ED300, MD1000
- ◆ Compatible with SBS microplate format (12x 8 samples)
- ◆ Scalable up to 96 samples
- ◆ Removable inserts with 48 or 96 grid
- ◆ Common large buffer reservoir for increased dialysis speed and efficiency
- ◆ Suitable for multi-channel pipettes and for use in automatic pipetting machines
- ◆ Dialysis cartridges, inserts and dialysis box can be fixed to increase pipetting safety
- ◆ Buffer mixing with magnetic stirrer possible
- ◆ Box is prepared for connection of tubing and a peristaltic pump (Luer Lock connections)
- ◆ Buffer mixing and exchange via peristaltic pump possible (circulation)

**XTT Cell Proliferation Assay**

HS 38220000

Storage temperature -15 °C to -25 °C

The XTT Cell Proliferation Assay is a colorimetric assay that detects the cellular metabolic activities. During the assay, the yellow tetrazolium salt XTT is reduced to a highly coloured formazan dye by dehydrogenase enzymes in metabolically active cells. This conversion only occurs in viable cells and thus, the amount of the formazan produced is proportional to viable cells in the sample. The formazan dye formed in the assay is soluble in aqueous solution and can be quantified by measuring the absorbance at wavelength 450 nm using a spectrophotometer. An electron coupling reagent, such as N-methylphenazonium methyl sulfate (PMS) can significantly improve the efficiency of XTT reduction in cells.

- ♦ Easy to use - no need for additional reagents and washing procedures
- ♦ Rapid and sensitive – no solubilisation step, works with low cell concentrations
- ♦ Accurate – dye absorbance proportional to the number of cells/well

**Content:** 2x 25 ml XTT Reagent, 1 ml Activation Reagent

**YPD Agar, powder 65 g for 1 liter medium**

HS 38210000

A nutritious general growth medium for the propagation of yeast

- 20 g/l Tryptone
- 10 g/l Yeast extract
- 20 g/l Dextrose
- 15 g/l Agar

For making 1 L agar medium, suspend 65 g in 1 L distilled water and sterilize by autoclaving. Cool to 45 °C prior dispensing into sterile petri dishes.

**2xYT Medium, powder 31 g for 1 liter medium**

HS 38210000

For cultivation of *E. coli* and M13 bacteriophages in molecular biology.

- 16 g/l Tryptone
- 10 g/l Yeast extract
- 5 g/l NaCl

For making 1 L 2x liquid medium suspend 31 g in 900 ml distilled water, adjust the pH to 7.0 with approximately 0.2 ml of 5 N NaOH, fill up to a final volume of 1 L with deionized water and sterilize by autoclaving.

### Zymolyase® from *Arthrobacter luteus*, min. 20 U/mg lyophil.

(Lyticase,  $\beta$ -1,3-Glucanlaminaripentaohydrolase)

DANGER  
H334  
CAS [37340-57-1] ♦ HS 35079090

Zymolyase®, produced by a submerged culture of *Arthrobacter luteus* (1), has strong lytic activity against living yeast cell walls to produce protoplast or spheroplast of various strains of yeast cells (2, 3).

This enzyme is prepared by ammonium sulfate precipitation. The essential enzyme activity for the lysis of yeast cells is  $\beta$ -1,3-glucan laminaripentaohydrolase. It hydrolyzes linear glucose polymers with  $\beta$ -1,3-linkages and releases specifically laminaripentaose as the main and minimum product unit (4, 5). Lytic activity varies depending on yeast strain, growth stage of yeast, or cultural conditions (6, 7, 8).

Contained main side activities are  $\beta$ -1,3-glucanase, protease, and mannanase (3).

At 30 °C about 70 % of the lytic activity is lost after 3 months and at 60 °C after 5 minutes all the lytic activity is lost. For lysis of viable cells the optimum temperature is 35 °C at pH 7.5 and for hydrolysis of yeast glucan 45 °C at pH 6.5.

Zymolyase® was shown to lyse *Ashbya*, *Candida*, *Debaryomyces*, *Eremothecium*, *Endomyces*, *Hansenula*, *Hanseniaspora*, *Kloeckera*, *Kluyveromyces*, *Lipomyces*, *Metschikowia*, *Pichia*, *Pullularia*, *Torulopsis*, *Saccharomyces*, *Saccharomycopsis*, *Saccharomycodes*, *Schwanniomyces*, etc. (5). It is activated by a SH compound such as cysteine, 2-mercaptoethanol or dithiothreitol.

**Unit definition:** One unit of lytic activity is defined as the enzyme amount causing a decrease of 30 % in absorbance at 800 nm using 6 mg Brewer's yeast as substrate in phosphate buffer (pH 7.5) at 25 °C.

Zymolyase = registered trademark of Kirin Holdings Company Limited

## 1. Produktname

## 2. Reinheitsgrad

### analytical grade

Standardqualität für analytische Arbeiten

### research grade (reinst)

Hochwertige Qualität für Forschung und Produktion

### molecular biology grade

Laboratoriumsreagens für die molekularbiologische Forschung, getestet auf Abwesenheit von DNAsen und RNAsen

### pure (rein)

Gereinigtes Reagens für universellen Einsatz

### pract.

Reagens für synthetische Zwecke

Nur einwandfreie, unseren Spezifikationen entsprechende Ware wird für den Verkauf freigegeben.

Jedes Produkt enthält eine Chargenkennzeichnung, die auf dem Etikett als Zahlencode oder Zahlen- und Buchstabencode vermerkt ist (im Falle einer Rückfrage bitte angeben).

## 3. Synonyme

## 4. Summenformel

## 5. Molekulargewicht

Relative Molekülmasse

## 6. CAS-Nummer

Registriernummer des Chemical Abstracts Service. Die CAS-Nummern dienen zur Sicherstellung der Identität chemischer Verbindungen.

## 7. HS-Nummer

Harmonisiertes System zur Bezeichnung und Zuordnung der Waren im Internationalen Handel (= Zolltarif-Nummer)

## 8. Produktbeschreibung

Mit Anwendungshinweisen, Literaturzitat, chemischen und physikalischen Spezifikationen

## 9. Strukturformel

## 10. Katalognummer, Abpackungen, Preise (EUR)

Viele unserer Produkte sind auch in größeren Mengen als jeweils im Katalog angegeben zu günstigeren Konditionen lieferbar. Bitte fragen Sie nach »Bulk Quantities«.

## 11. EC-Nummer

Enzyme-Klassifizierungsnummer

## 12. Lagertemperatur

Ist bei einem Produkt keine spezielle Lagertemperatur angegeben, erfolgt die Lagerung bei Raumtemperatur.

## 13. Kühlsendung

Besonders empfindliche Präparate werden gekühlt (\*) oder gefroren (\*\*\*) verschickt. Die Haltbarkeit bei Trockeneisversand beträgt bei ca. 30 °C Außentemperatur mindestens 48 Stunden.

Für Trockeneislieferungen berechnen wir eine Pauschale.

## 14. CI-Nummer

Farbenindexnummer (Colour Index)

## 15. Einstufung gefährlicher Stoffe/ Gemische

Das europäische System zur global harmonisierten Einstufung, Kennzeichnung und Verpackung von Stoffen und Gemischen (GHS/CLP) basiert auf der seit dem 20. Januar 2009 in Kraft getretenen Verordnung (EG) Nr. 1272/2008 (europäische CLP-Verordnung) des europäischen Parlaments und des Rates. SERVAs Stoffe und Gemische werden seit Dezember 2010 gemäß dieser Verordnung eingestuft, gekennzeichnet und verpackt.

Ziel der Verordnung ist es, ein hohes Schutzniveau für die menschliche Gesundheit und für die Umwelt sicherzustellen. Außerdem wird eine weltweite Harmonisierung von Vorschriften für die Einstufung und Kennzeichnung von chemischen Stoffen und Gemischen erreicht.

Nach CLP-Verordnung Anhang V sind die gefährlichen Stoffe und Gemische mit folgenden Gefahrenpiktogrammen zu kennzeichnen:

## 16. R-Begriffsbestimmungen in Verordnung (EG) Nr. 1272/2008, die Einstufung und Kennzeichnung gefährlicher Stoffe und Gemische betreffend

### Signalwort:

**Gefahr:** Signalwort für die schwerwiegenden Gefahrenkategorien

**Achtung:** Signalwort für die weniger schwerwiegenden Gefahrenkategorien

### Gefahrenhinweise (H-Sätze):

beschreiben die Art und gegebenenfalls den Schweregrad der von einem gefährlichen Stoff oder Gemisch ausgehenden Gefahr.

### Sicherheitshinweise (P-Sätze):

Textaussagen, die eine (oder mehrere) empfohlene Sicherheitsmaßnahme(n) beschreiben.

### Gemische:

Gemische oder Lösungen, die aus zwei oder mehr Stoffen bestehen

### SVHC:

Besonders besorgniserregende Substanz der sogenannten Kandidatenliste für die mögliche Aufnahme in das Verzeichnis der zulassungspflichtigen Stoffe (Anhang XIV der Verordnung (EG) Nr. 1907/2006). Die Stoffe erfüllen mindestens eines der in Artikel 57 dieser Verordnung angegebenden Kriterien:

- krebserzeugend
- erbgutverändernd
- fortpflanzungsgefährdend
- persistent, bioakkumulierbar und toxisch
- sehr persistent und sehr bioakkumulierbar
- wahrscheinlich mit schwerwiegenden Wirkungen auf die menschliche Gesundheit oder auf die Umwelt .

Der Pflicht zur Weitergabe von Informationen über Stoffe gemäß Verordnung (EG) Nr. 1907/2006 bezüglich der sehr besorgniserregenden Stoffe kommt SERVA durch die Markierung dieser Stoffe mit SVHC nach.

## 17. EG-Index-Nummer

Kennnummer eines Stoffes oder einer bestimmten Stoffgruppe in der Liste der harmonisierten Einstufung und Kennzeichnung gefährlicher Stoffe im Anhang VI der Verordnung(EG) 1272/2008.

## 18. EG-Nummer

Offizielle Nummer des Stoffes in der Europäischen Union. Es werden drei Gruppen unterschieden:  
1) EINECS: kann dem Verzeichnis der auf dem Markt vorhandenen Stoffe entnommen werden, beginnend mit 200-001-8  
2) EILINCS: kann der Liste der angemeldeten Stoffe entnommen werden, beginnend mit 400-010-09  
3) NLP: kann der Liste »no-longer-polymer« entnommen werden, beginnend mit 500-001-0

## 19. Luftgrenzwert

Die Gefahrstoffverordnung unterscheidet nachfolgende Grenzwerte in der Luft am Arbeitsplatz:

**AGW:** Arbeitsplatzgrenzwert

### Begriffsbestimmungen (Gefahrenkategorien) gemäß Anhang I der Verordnung (EG) Nr. 1272/2008

#### Karzinogen

Ein Stoff oder ein Gemisch, der/das Krebs erzeugen oder die Krebshäufigkeit erhöhen kann, wird als karzinogen angesehen (differenziert als Kategorie 1A, 1B und Kategorie 2)

#### Mutagen

wird bei Stoffen verwendet, die zu einer gesteigerten Mutationshäufigkeit in Zellpopulationen und/oder Organismen führen (differenziert als Kategorie 1A, 1B und Kategorie 2).

### Reproduktionstoxizität:

Beeinträchtigungen von Sexualfunktion und Fruchtbarkeit bei Mann und Frau sowie Entwicklungstoxizität bei den Nachkommen (differenziert als Kategorie 1A, 1B und Kategorie 2).

## 20. Gefahrgut-Transport

Gegenstände oder Stoffe, welche in der Lage sind, ein Risiko für Gesundheit, Sicherheit, Eigentum oder die Umwelt darzustellen und die in den Verzeichnissen gefährlicher Güter der Gefahrgutvorschriften des angewendeten Verkehrsträgers aufgeführt oder die entsprechend dieser Vorschriften klassifiziert sind.

### UN-Nummer

Vierstellige Ziffer, die einem Stoff oder einer bestimmten Stoffgruppe vom UN-Sachverständigenausschuss für den Gefahrguttransport zur Identifizierung zugeordnet wurde.

Die vorangestellten Buchstaben „UN“ müssen bei Verwendung dieser Nummer immer mit angegeben werden.

### ID-Nummer

Die ID-Nummer ist eine vorläufige Identifizierungsnummer in der 8000er Serie der IATA, für einen Gegenstand oder Stoff, der noch keiner UN-Nummer zugeordnet wurde. Die vorangestellten Buchstaben „ID“ müssen bei Verwendung immer mit angegeben werden.

Die Gefahrgüter sind für alle Verkehrsträger einheitlich in UN-Gefahrenklassen eingeteilt, einige sind weiter in Unterklassen differenziert:

| Klasse | Beschreibung   |
|--------|--|
| 1      | Explosive Stoffe u. Gegenstände mit Explosivstoff  |
| 2      | Gase   |
| 3      | Entzündbare flüssige Stoffe  |
| 4.1    | Entzündbare feste Stoffe, selbstzersetzliche Stoffe und desensibilisierte explosive feste Stoffe |
| 4.2    | Selbstentzündliche Stoffe  |
| 4.3    | Stoffe, die in Berührung mit Wasser entzündbare Gase bilden                                      |
| 5.1    | Entzündend (oxidierend) wirkende Stoffe  |
| 5.2    | Organische Peroxide  |
| 6.1    | Giftige Stoffe   |
| 6.2    | Ansteckungsfähige Stoffe   |
| 7      | Radioaktive Stoffe   |
| 8      | Ätzende Stoffe   |
| 9      | Verschiedene gefährliche Stoffe und Gegenstände  |

### Verpackungsgruppen

Gefahrgüter sind einer dem Grad der von ihnen ausgehenden Gefahr entsprechenden Verpackungsgruppe zugeteilt:

Verpackungsgruppe I - hohe Gefahr  
Verpackungsgruppe II - mittlere Gefahr  
Verpackungsgruppe III - geringe Gefahr

Für diese Gefahrgutverpackungen berechnen wir eine Kostenpauschale von EUR 30,00.

## Gefahrgutvorschriften differenziert nach den Verkehrsträgern :

### Straße:

**ADR** europäisches Übereinkommen über die internationale Beförderung gefährlicher Güter auf der Straße (ADR).

### Schiene:

**RID** Ordnung über die internationale Eisenbahnbeförderung gefährlicher Güter

### Binnenwasserstraße:

**ADN** Europäisches Übereinkommen über die internationale Beförderung gefährlicher Güter auf Binnenwasserstraßen

### See:

**IMDG-Code** Internationaler Code für die Beförderung gefährlicher Güter mit Seeschiffen

### Luft:

**IATA-DGR** Gefahrgutvorschriften der IATA - Fluggesellschaften

Gefahrgüter können sicher transportiert werden, vorausgesetzt, dass einige Grundsätze genau befolgt werden.

Die richtige Deklaration durch den Versender gewährleistet, dass alle am Transportablauf Beteiligten wissen, welches Gefahrgut sie transportieren und was bei einem Vorfall oder Unfall am Boden oder im Flug zu tun ist.

Gefahrgüter sind normalerweise in UN-leistungsgeprüften Spezifikationsverpackungen verpackt. Solche sind nicht erforderlich, wenn Gefahrgut in „begrenzten Mengen“ oder „freigestellten Mengen“ transportiert wird.

*Für diese Gefahrgutverpackungen berechnen wir eine Kostenpauschale.*

## 21. WGK

Die wassergefährdenden Stoffe werden nach der Novelle VwVwS vom 27. Juli 2005 entsprechend ihrer Gefährlichkeit in eine der folgenden Wassergefährdungsklassen eingestuft:

**WGK 3:** stark wassergefährdend

**WGK 2:** wassergefährdend

**WGK 1:** schwach wassergefährdend

## 1. Product Name

## 2. Quality Characteristics

### analytical grade

High quality reagent for analytical work.

### research grade

High quality laboratory reagent for research and production.

### molecular biology grade

High quality laboratory reagent for molecular biology research, DNase/RNase activity: none detected.

### Pure

Multi-purpose reagent, purified.

### pract.

Reagent for use in syntheses.

Only items which have been approved and which comply to our specifications are released for sale.

Each product has a lot indication marked on the label as a code which is needed as a reference for all claims.

## 3. Synonyma

## 4. Molecular Formula

## 5. Molecular Weight

Relative Molecular Mass

## 6. CAS Number

Chemical Abstracts Service Number

## 7. HS Numbers

Product numbers according to International Agreements on Tariffs.

## 8. Product Description

Including applications, literature references, chemical and physical parameters.

## 9. Structural Formula

## 10. Catalog Number, Package Sizes and Prices (EUR)

Please ask for quantities others than those stated here-many of our products are available at favorable bulk prices.

## 11. EC-Number

Enzyme Classification Number

## 12. Storage Temperature

## 13. Refrigerated Shipments

If necessary our products are shipped chilled (\*) or frozen (\*\*) in containers withstanding ambient temperatures up to 30 °C for a minimum of 48 hours. A surplus fee is applicable.

## 14. CI-Number

Colour Index Number

## 15. Classification of hazardous substances and mixtures

The european system on globally harmonised classification, labelling and packaging of substances and mixtures (GHS/CLP) bases on Regulation (EC) No.1272/2008 (CLP-Regulation) which has become effective on 20th January 2009. SERVA's substances and mixtures are classified, labelled and packaged according to this regulation.

It's the aim of this regulation to ensure a high level of protection of human health and the environment. In addition it is essential to harmonize the provisions and criteria for the classification and labelling of substances and mixtures.

According to Annex V of this regulation the hazardous substances and mixtures have to be labeled with the hazard Pictograms as given below:

|       |       |
|-------|-------|
|       |       |
| GHS01 | GHS06 |
|       |       |
| GHS02 | GHS07 |
|       |       |
| GHS03 | GHS08 |
|       |       |
| GHS04 | GHS09 |
|       |       |
| GHS05 |       |

## 16. Definitions in Regulation (EC) No 1272/2008 concerning the classification of hazardous Substances and mixtures.

### Signal word:

**Danger:** a signal word indicating the more severe hazard categories

**Warning:** a signal word indicating the less severe hazard categories

#### Hazard statements (H-Phrases):

Describe the nature of the hazards of a hazardous substance or mixture, including, where appropriate, the degree of hazard

#### Precautionary statements (P-Phrases):

A phrase that describes recommended safety measure(s)

#### Mixture:

A mixture or solution composed of two or more substances

#### SVHC:

Substance of very high concern on the so called candidate list for a possible inclusion in the list of substances subject to authorisation (annex XIV of Regulation (EC) No. 1907/2006). Substances included on this list meet at least one of the criteria given in Article 57 of this regulation:

- carcinogenic
- mutagenic
- toxic for reproduction
- persistent, bioaccumulative and toxic
- very persistent and very bioaccumulative
- probable serious effects to human health or the environment

Referring to the duty to communicate informations on substances according to Regulation (EC) No. 1907/2006 regarding the substances of very high concern, SERVA marks these substances with SVHC.

### 17. EG Index Number

Number given by the list of appendix I of the Guideline No. 67/548/EWG (European Economic Community) respectively regulation (EG) No. 1272/2008.

### 18. EG Number

It is the official number of the substance within the European Union. The numbers are divided into three groups:

- 1) EINECS: The EINECS number can be obtained from the European Inventory of Existing Commercial Chemical Substance (EINECS), numbers start at 200-001-8
- 2) ELINCS: The ELINCS number can be obtained from the European List of Notified Substances, numbers start at 400-010-9
- 3) NLP: The NLP number can be obtained from the list of 'No-longer-polymers', numbers start at 500-001-0

### 19. Thresholds

The Hazardous Substances Ordinance provides the following definitions for a hazard present in the air at site of work (acc. To German official standards):

**OELV:** occupational exposure limit value

#### Definitions and hazard categories according to Annex I of Regulation (EC) No 1272/2008

**Carcinogen** means a substance or a mixture of substances which induce cancer or increase its incidence (distinguished as Category 1A, 1B and Category 2).

**Mutagen** used for agents giving rise to an increased occurrence of mutations in populations of cells and/or organisms (distinguished as Category 1A, 1B and Category 2).

**Reproductive toxicity:** Adverse effects on sexual function and fertility in adult males and females, as well as developmental toxicity in the offspring (distinguished as Category 1A, 1B and Category 2).

## 20. Dangerous Goods Transport

Dangerous goods are articles or substances which are capable of posing a risk to health, safety, property or the environment and which are shown in the list of dangerous goods of the applied mode of transport's Dangerous Goods Regulations or which are classified according to these Regulations

#### UN-Number

The four-digit number assigned by the United Nations Committee of Experts on the Transport of Dangerous Goods to identify a substance or a particular group of substances. The prefix „UN“ must always be used in conjunction with these numbers.

#### ID-Number

The ID-Number is a temporary identification number (ID) in the 8000 series assigned to an article or substance for which no UN-number has been assigned. The prefix „ID“ must always be used in conjunction with these numbers.

The dangerous goods are divided for all modes of transport in the following UN hazard classes, some are further distinguished in sub-divisions.

| Class | Description  |
|-------|--|
| 1     | Explosives   |
| 2     | Gases  |
| 3     | Flammable liquids  |
| 4.1   | Flammable solids, self-reactive substances and solid desensitized explosives |
| 4.2   | Substances liable to spontaneous combustion                                  |
| 4.3   | Substances which, in contact with water, emit flammable gases                |
| 5.1   | Oxidizers  |
| 5.2   | Organic peroxides  |
| 6.1   | Toxic substances   |
| 6.2   | Infectious substances  |
| 7     | Radioactive material   |
| 8     | Corrosives   |
| 9     | Miscellaneous dangerous goods  |

#### Packing Groups

Dangerous goods are assigned to the relevant packing group according to the degree of hazard they present:

|                   |                 |
|-------------------|-----------------|
| Packing group I   | - high danger   |
| Packing group II  | - medium danger |
| Packing group III | - low danger    |

#### Dangerous Goods Regulations distinguished as the modes of transport:

##### Road:

**ADR** European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR)

##### Rail:

**RID** Regulations concerning the International Carriage of Dangerous Goods by Rail

##### Inland waterway:

**ADN** European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways

##### Sea:

**IMDG-Code** International Maritime Dangerous Goods Code

##### Air:

**IATA DGR** International Air Transport Association Dangerous Goods Regulations

Dangerous goods can be transported safely provided when certain principles are strictly followed.

The proper declaration of dangerous goods by the shipper ensures that all in the transportation chain know what dangerous goods they are transporting and what to do if an incident or accident occurs in flight or on the ground.

Dangerous goods normally are packed in UN performance-tested specification packagings. These are not required when dangerous goods are shipped in „limited quantities“ or „excepted quantities“.

*We reserve the right to ask for a surcharge for packaging suited for transportation of dangerous goods.*

### 21. WGK

Water endangering substances are classified in compliance according to their hazardous properties:

|               |                               |
|---------------|-------------------------------|
| <b>WGK 3:</b> | extremely hazardous for water |
| <b>WGK 2:</b> | hazardous for water           |
| <b>WGK 1:</b> | slightly hazardous for water  |

## Global Harmonisiertes Einstufungs- und Kenzeichnungssystem (GHS)

Die GHS Verordnung bzw. CLP (Regulation on Classification, Labelling and Packaging of Substances and Mixtures) Verordnung (EG) Nr. 1272/2008 ist am 20. Januar 2009 in Kraft getreten.

Durch diese Verordnung werden die Stoffrichtlinie 67/548/EWG und die Zubereitungsrichtlinie 1999/45/EG durch eine neue Verordnung über einen Zeitraum von einigen Jahren ersetzt und die Verordnung EG Nr. 1907/2006 (REACH) geändert.

Ziel der Verordnung ist es, ein hohes Schutzniveau für die menschliche Gesundheit und für die Umwelt sicherzustellen. Außerdem wird eine weltweite Harmonisierung von Vorschriften für die Einstufung und Kennzeichnung von chemischen Stoffen und Gemischen erreicht.

Wir möchten unseren Kunden mit diesen Informationen einen Einblick in die neue Systematik vermitteln und gleichzeitig die Möglichkeit bieten, sich mit den neuen Piktogrammen sowie H- (Gefahrenhinweise)- und P- (Sicherheitshinweise) Sätzen vertraut zu machen.

### H-Sätze

#### Gefahrenhinweise für physikalische Gefahren

**H200**  
Instabil, explosiv.

**H201**  
Explosiv, Gefahr der Massenexplosion.

**H202**  
Explosiv; große Gefahr durch Splitter, Spreng- und Wurststücke.

**H203**  
Explosiv; Gefahr durch Feuer, Luftdruck oder Splitter, Spreng- und Wurststücke.

**H204**  
Gefahr durch Feuer oder Splitter, Spreng- und Wurststücke.

**H205**  
Gefahr der Massenexplosion bei Feuer.

**H220**  
Extrem entzündbares Gas.

**H221**  
Entzündbares Gas.

**H222**  
Extrem entzündbares Aerosol.

**H223**  
Entzündbares Aerosol.

**H224**  
Flüssigkeit und Dampf extrem entzündbar.

**H225**  
Flüssigkeit und Dampf leicht entzündbar.

**H226**  
Flüssigkeit und Dampf entzündbar.

**H227**  
Brennbare Flüssigkeit.

**H228**  
Entzündbarer Feststoff.

**H229**  
Behälter steht unter Druck: Kann bei Erwärmung bersten.

**H230**  
Explosionsgefahr selbst ohne Luftzufuhr.

**H231**  
Explosionsgefahr selbst ohne Luftzufuhr bei erhöhtem Druck und / oder erhöhter Temperatur.

**H240**  
Erwärmung kann Explosion verursachen.

**H241**  
Erwärmung kann Brand oder Explosion verursachen.

**H242**  
Erwärmung kann Brand verursachen.

**H250**  
Entzündet sich in Berührung mit Luft von selbst.

**H251**  
Selbsterhitzungsfähig; kann in Brand geraten.

**H252**  
In großen Mengen selbsterhitzungsfähig; kann in Brand geraten.

**H260**  
In Berührung mit Wasser entstehen entzündbare Gase, die sich spontan entzünden können.

**H261**  
In Berührung mit Wasser entstehen entzündbare Gase.

**H270**  
Kann Brand verursachen oder verstärken; Oxidationsmittel.

#### H271

Kann Brand oder Explosion verursachen; starkes Oxidationsmittel.

#### H272

Kann Brand verstärken; Oxidationsmittel.

#### H280

Enthält Gas unter Druck; kann bei Erwärmung explodieren.

#### H281

Enthält tiefkaltes Gas; kann Kälteverletzungen oder -verletzungen verursachen.

#### H290

Kann gegenüber Metallen korrosiv sein.

#### Gefahrenhinweise für Gesundheitsgefahren

#### H300

Lebensgefahr bei Verschlucken.

#### H301

Giftig bei Verschlucken.

#### H302

Gesundheitsschädlich bei Verschlucken.

#### H303

Kann bei Verschlucken gesundheitsschädlich sein.

#### H304

Kann bei Verschlucken und Eindringen in die Atemwege tödlich sein.

#### H3505

Kann beim Verschlucken und wenn es in die Atemwege gelangt gesundheitsschädlich sein.

#### H310

Lebensgefahr bei Hautkontakt.

#### H311

Giftig bei Hautkontakt.

#### H312

Gesundheitsschädlich bei Hautkontakt.

#### H313

Kann bei Berührung mit der Haut gesundheitsschädlich sein.

#### H314

Verursacht schwere Verätzungen der Haut und schwere Augenschäden.

#### H315

Verursacht Hautreizungen.

#### H316

Verursacht leichte Hautreizungen.

#### H317

Kann allergische Hautreaktionen verursachen.

#### H318

Verursacht schwere Augenschäden.

#### H319

Verursacht schwere Augenreizung.

#### H320

Verursacht Augenreizungen.

#### H330

Lebensgefahr bei Einatmen.

#### H331

Giftig bei Einatmen.

#### H332

Gesundheitsschädlich bei Einatmen.

#### H333

Kann beim Einatmen gesundheitsschädlich sein.

#### H334

Kann bei Einatmen Allergie, asthmaartige Symptome oder Atembeschwerden verursachen.

#### H335

Kann die Atemwege reizen.

#### H336

Kann Schläfrigkeit und Benommenheit verursachen.

#### H340

Kann genetische Defekte verursachen Expositionsweg angeben, sofern schlüssig belegt ist, dass diese Gefahr bei keinem anderen Expositionsweg besteht.

#### H341

Kann vermutlich genetische Defekte verursachen.

#### H350

Kann Krebs erzeugen.

#### H350i

Kann bei Einatmen Krebs erzeugen.

#### H351

Kann vermutlich Krebs erzeugen.

#### H351i

Kann bei Einatmen Krebs erzeugen.

#### H360

Kann die Fruchtbarkeit beeinträchtigen oder das Kind im Mutterleib schädigen.

#### H360D

Kann das Kind im Mutterleib schädigen.

#### H360Df

Kann das Kind im Mutterleib schädigen. Kann vermutlich die Fruchtbarkeit beeinträchtigen.

#### H360F

Kann die Fruchtbarkeit beeinträchtigen.

#### H360FD

Kann die Fruchtbarkeit beeinträchtigen. Kann das Kind im Mutterleib schädigen.

## H360Fd

Kann die Fruchtbarkeit beeinträchtigen. Kann vermutlich das Kind im Mutterleib schädigen.

## H361

Kann vermutlich die Fruchtbarkeit beeinträchtigen oder das Kind im Mutterleib schädigen.

## H361d

Kann vermutlich das Kind im Mutterleib schädigen. **H361f**  
Kann vermutlich die Fruchtbarkeit beeinträchtigen.

## H361fd

Kann vermutlich die Fruchtbarkeit beeinträchtigen. Kann vermutlich das Kind im Mutterleib schädigen.

## H362

Kann Säuglinge über die Muttermilch schädigen.

## H370

Schädigt die Organe.

## H371

Kann die Organe schädigen.

## H372

Schädigt die Organe bei längerer oder wiederholter Exposition.

## H373

Kann die Organe schädigen bei längerer oder wiederholter Exposition.

## H300+H310

Lebensgefahr bei Verschlucken oder Hautkontakt.

## H300+H310+H330

Lebensgefahr bei Verschlucken, Hautkontakt oder Einatmen.

## H300+H330

Lebensgefahr bei Verschlucken oder Einatmen.

## H301+H311

Giftig bei Verschlucken oder Hautkontakt.

## H301+H311+H331

Giftig bei Verschlucken, Hautkontakt oder Einatmen.

## H301+H331

Giftig bei Verschlucken oder Einatmen.

## H302+H312

Gesundheitsschädlich bei Verschlucken oder Hautkontakt.

## H302+H312+H332

Gesundheitsschädlich bei Verschlucken, Hautkontakt oder Einatmen.

## H302+H332

Gesundheitsschädlich bei Verschlucken oder Einatmen.

## H303+H313

Kann beim Verschlucken oder bei Berührung mit der Haut gesundheitsschädlich sein.

## H303+H313+H333

Kann beim Verschlucken, bei Berührung mit der Haut oder beim Einatmen gesundheitsschädlich sein.

## H303+H333

Kann beim Verschlucken oder beim Einatmen gesundheitsschädlich sein.

## H310+H330

Lebensgefahr bei Hautkontakt oder Einatmen.

## H311+H331

Giftig bei Hautkontakt oder Einatmen.

## H312+H332

Gesundheitsschädlich bei Hautkontakt oder Einatmen.

## H313+H333

Kann bei Berührung mit der Haut oder beim Einatmen gesundheitsschädlich sein.

## H315+H320

Verursacht Haut- und Augenreizungen.

## Gefahrenhinweise für Umweltgefahren

### H400

Sehr giftig für Wasserorganismen.

### H401

Giftig für Wasserorganismen.

### H402

Schädlich für Wasserorganismen.

### H410

Sehr giftig für Wasserorganismen mit langfristiger Wirkung.

### H411

Giftig für Wasserorganismen, mit langfristiger Wirkung.

### H412

Schädlich für Wasserorganismen, mit langfristiger Wirkung.

### H413

Kann für Wasserorganismen schädlich sein, mit langfristiger Wirkung.

### H420

Schädigt die öffentliche Gesundheit und die Umwelt durch Ozonabbau in der äußeren Atmosphäre.

## EUH-Sätze

### Ergänzende Gefahrenmerkmale

#### EUH001

In trockenem Zustand explosionsgefährlich. **EUH006**  
Mit und ohne Luft explosionsfähig.

#### EUH014

Reagiert heftig mit Wasser.

#### EUH018

Kann bei Verwendung explosionsfähige/entzündbare Dampf/**Luft-Gemische bilden.**

#### EUH019

Kann explosionsfähige Peroxide bilden.

#### EUH029

Entwickelt bei Berührung mit Wasser giftige Gase.

#### EUH031

Entwickelt bei Berührung mit Säure giftige Gase.

#### EUH032

Entwickelt bei Berührung mit Säure sehr giftige Gase.

#### EUH044

Explosionsgefahr bei Erhitzen unter Einschluss.

#### EUH059

Die Ozonschicht schädigend.

#### EUH066

Wiederholter Kontakt kann zu spröder oder rissiger Haut führen.

#### EUH070

Giftig bei Berührung mit den Augen.

#### EUH071

Wirkt ätzend auf die Atemwege.

## P-Sätze

### Sicherheitshinweise

#### P101

Ist ärztlicher Rat erforderlich, Verpackung oder Etikett bereithalten.

#### P102

Darf nicht in die Hände von Kindern gelangen.

#### P103

Vor Gebrauch Kennzeichnungsetikett lesen.

#### P201

Vor Gebrauch besondere Anweisungen einholen.

#### P202

Vor Gebrauch alle Sicherheitsratschläge lesen und verstehen.

#### P210

Von Hitze/Funken/offener Flamme/heißen Oberflächen fernhalten. Nicht rauchen.

#### P210a

Von Hitze fernhalten. Nicht rauchen.

#### P210b

Von Funken fernhalten. Nicht rauchen.

#### P210c

Von offener Flamme fernhalten. Nicht rauchen.

#### P210d

Von heißen Oberflächen fernhalten. Nicht rauchen.

#### P211

Nicht gegen offene Flamme oder andere Zündquelle sprühen.

#### P220

Von Kleidung/brennbaren Materialien fernhalten/entfernt aufbewahren.

#### P220a

Von Kleidung fernhalten.

#### P220b

Von brennbaren Materialien fernhalten.

#### P220c

Von Reduktionsmitteln, Schwermetallverbindungen, Säuren und Alkalien fernhalten.

#### P220d

Von oxidierenden und sauren Stoffen, sowie Schwermetallverbindungen fernhalten.

#### P220e

Von Eisen fernhalten.

#### P220f

Von Wasser fernhalten.

#### P220g

Von Säuren fernhalten.

#### P220h

Von Laugen fernhalten

#### P220i

Von Metallen fernhalten.

#### P220j

Von oxidierenden und sauren Stoffen fernhalten.

#### P220k

Von brennbaren organischen Substanzen fernhalten.

#### P220l

Von Säuren, Reduktionsmitteln und brennbaren Materialien fernhalten.

#### P221

Mischen mit brennbaren Stoffen unbedingt verhindern.

#### P222

Kontakt mit Luft nicht zulassen.

#### P223

Kontakt mit Wasser wegen heftiger Reaktion und möglichem Aufflammen unbedingt verhindern.

#### P230

Feucht halten mit ...

#### P230a

Feucht halten.

#### P231

Unter inertem Gas handhaben.

#### P232

Vor Feuchtigkeit schützen.

#### P233

Behälter dicht verschlossen halten.

#### P234

Nur im Originalbehälter aufbewahren.

#### P235

Kühl halten.

#### P240

Behälter und zu befüllende Anlage erden.

#### P241

Explosionsgeschützte elektrische Betriebsmittel/Lüftungsanlagen/Beleuchtung/verwenden

#### P242

Nur funkenfreies Werkzeug verwenden.

#### P243

Maßnahmen gegen elektrostatische Aufladungen treffen.

#### P244

Druckminderer frei von Fett und Öl halten.

#### P250

Nicht schleifen/stoßen/reiben.

#### P251

Behälter steht unter Druck: Nicht durchstechen oder verbrennen, auch nicht nach der Verwendung.

#### P260

Staub/Rauch/Gas/Nebel/Dampf/Aerosol nicht einatmen.

#### P260a

Staub nicht einatmen.

#### P260b

Rauch nicht einatmen.

#### P260c

Gas nicht einatmen.

#### P260d

Nebel nicht einatmen.

#### P260e

Dampf nicht einatmen.

#### P260f

Aerosol nicht einatmen.

#### P260g

Nebel/Dampf/Aerosol nicht einatmen.

#### P261

Einatmen von Staub/Rauch/Gas/Nebel/Dampf/Aerosol vermeiden.

#### P261a

Einatmen von Staub vermeiden.

#### P261b

Einatmen von Rauch vermeiden.

#### P261c

Einatmen von Gas vermeiden.

#### P261d

Einatmen von Nebel vermeiden.

#### P261e

Einatmen von Dampf vermeiden.

#### P261f

Einatmen von Aerosol vermeiden.

#### P261g

Einatmen von Nebel/Dampf/Aerosol vermeiden.

#### P262

Nicht in die Augen, auf die Haut oder auf die Kleidung gelangen lassen.

#### P263

Kontakt während der Schwangerschaft/und der Stillzeit vermeiden.

#### P264

Nach Gebrauch gründlich waschen.

#### P270

Bei Gebrauch nicht essen, trinken oder rauchen.

#### P271

Nur im Freien oder in gut belüfteten Räumen verwenden.

#### P272

Kontaminierte Arbeitskleidung nicht außerhalb des Arbeitsplatzes tragen.

#### P273

Freisetzung in die Umwelt vermeiden.

#### P280

Schutzhandschuhe/Schutzkleidung/Augenschutz/Gesichtsschutz tragen.

#### P280a

Schutzhandschuhe und Augenschutz / Gesichtsschutz tragen.

#### P280b

Schutzhandschuhe und Augenschutz tragen.

**P280c**  
Schutzhandschuhe und Gesichtsschutz tragen.

**P280d**  
Schutzkleidung und Augenschutz tragen.

**P280e**  
Schutzkleidung und Gesichtsschutz tragen.

**P280f**  
Schutzkleidung tragen.

**P280g**  
Schutzhandschuhe tragen.

**P280h**  
Schutzhandschuhe / Schutzkleidung tragen.

**P280i**  
Augenschutz / Gesichtsschutz tragen.

**P280j**  
Gesichtsschutz tragen.

**P282**  
Schutzhandschuhe/Gesichtsschild/Augenschutz mit Kälteisolierung tragen.

**P283**  
Schwer entflammbare/flammhemmende Kleidung tragen.

**P284**  
Atemschutz tragen.

**P231**  
Unter inertem Gas handhaben. Vor Feuchtigkeit schützen.

**P232**  
Unter inertem Gas handhaben. Vor Feuchtigkeit schützen.

**P235**  
Kühl halten. Vor Sonnenbestrahlung schützen.

**P410**  
Kühl halten. Vor Sonnenbestrahlung schützen.

**P301**  
BEI VERSCHLUCKEN:

**P302**  
BEI BERÜHRUNG MIT DER HAUT:

**P303**  
BEI BERÜHRUNG MIT DER HAUT (oder dem Haar):

**P304**  
BEI EINATMEN:

**P305**  
BEI KONTAKT MIT DEN AUGEN:

**P306**  
BEI KONTAMINIRTER KLEIDUNG:

**P308**  
BEI Exposition oder falls betroffen

**P310**  
Sofort GIFTINFORMATIONSZENTRUM oder Arzt anrufen.

**P311**  
GIFTINFORMATIONSZENTRUM oder Arzt anrufen.

**P312**  
Bei Unwohlsein GIFTINFORMATIONSZENTRUM oder Arzt anrufen.

**P313**  
Ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.

**P314**  
Bei Unwohlsein ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.

**P315**  
Sofort ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.

**P320**  
Besondere Behandlung dringend erforderlich (siehe ... auf diesem Kennzeichnungsetikett).

**P321**  
Besondere Behandlung (siehe ... auf diesem Kennzeichnungsetikett).

**P330**  
Mund ausspülen.

**P331**  
KEIN Erbrechen herbeiführen.

**P332**  
Bei Hautreizung:

**P333**  
Bei Hautreizung oder -ausschlag:

**P334**  
In kaltes Wasser tauchen/nassen Verband anlegen.

**P335**  
Lose Partikel von der Haut abbürsten.

**P336**  
Vereiste Bereiche mit lauwarmem Wasser auftauen. Betroffenen Bereich nicht reiben.

**P337**  
Bei anhaltender Augenreizung:

**P338**  
Eventuell vorhandene Kontaktlinsen nach Möglichkeit entfernen. Weiter ausspülen.

**P340**  
Die betroffene Person an die frische Luft bringen und in einer Position ruhigstellen, die das Atmen erleichtert.

**P342**  
Bei Symptomen der Atemwege:

**P351**  
Einige Minuten lang behutsam mit Wasser ausspülen.

**P352**  
Mit viel Wasser und Seife waschen.

**P353**  
Haut mit Wasser abwaschen/duschen.

**P360**  
Kontaminierte Kleidung und Haut sofort mit viel Wasser abwaschen und danach Kleidung ausziehen.

**P361**  
Alle kontaminierten Kleidungsstücke sofort ausziehen.

**P362**  
Kontaminierte Kleidung ausziehen und vor erneutem Tragen waschen.

**P363**  
Kontaminierte Kleidung vor erneutem Tragen waschen.

**P364**  
Und vor erneutem Tragen waschen.

**P370**  
Bei Brand:

**P371**  
Bei Großbrand und großen Mengen:

**P372**  
Explosionsgefahr bei Brand.

**P373**  
KEINE Brandbekämpfung, wenn das Feuer explosive Stoffe/Gemische/Erzeugnisse erreicht.

**P374**  
Brandbekämpfung mit üblichen Vorsichtsmaßnahmen aus angemessener Entfernung.

**P375**  
Wegen Explosionsgefahr Brand aus der Entfernung bekämpfen.

**P376**  
Undichtigkeit beseitigen, wenn gefahrlos möglich.

**P377**  
Brand von ausströmendem Gas:  
Nicht löschen, bis Undichtigkeit gefahrlos beseitigt werden kann.

**P378**  
... zum Löschen verwenden.

**P378a**  
Zum Löschen verwenden: CO<sub>2</sub>, Löschpulver oder Wassersprühstrahl.

**P378b**  
Zum Löschen verwenden: Spezialpulver für Metallbrände.

**P378c**  
Zum Löschen verwenden: CO<sub>2</sub>, Sand, Löschpulver.

**P378d**  
Zum Löschen verwenden: Wasser.

**P378e**  
Zum Löschen verwenden: Wasserdampf.

**P378f**  
Zum Löschen verwenden: Wassersprühstrahl.

**P378g**  
Zum Löschen verwenden: Schaum.

**P378h**  
Zum Löschen verwenden: Alkoholbeständiger Schaum.

**P378i**  
Zum Löschen verwenden: Löschpulver.

**P378j**  
Zum Löschen verwenden: BC-Pulver.

**P378k**  
Zum Löschen verwenden: ABC-Pulver.

**P378l**  
Zum Löschen verwenden: Kohlendioxid.

**P378m**  
Zum Löschen verwenden: Kalksteinpulver.

**P378n**  
Zum Löschen verwenden: Zement.

**P378o**  
Zum Löschen verwenden: Sand.

**P378p**  
Zum Löschen verwenden: Trockener Sand.

**P380**  
Umgebung räumen.

**P381**  
Alle Zündquellen entfernen, wenn gefahrlos möglich.

**P390**  
Verschüttete Mengen aufnehmen, um Materialschäden zu vermeiden.

**P391**  
Verschüttete Mengen aufnehmen.

**P301 + P310**  
BEI VERSCHLUCKEN: Sofort GIFTINFORMATIONSZENTRUM oder Arzt anrufen.

**P301 + P312**  
BEI VERSCHLUCKEN: Bei Unwohlsein GIFTINFORMATIONSZENTRUM oder Arzt anrufen.

**P301 + P330 + P331**  
BEI VERSCHLUCKEN: Mund ausspülen. KEIN Erbrechen herbeiführen.

**P302 + P334**  
BEI KONTAKT MIT DER HAUT: In kaltes Wasser tauchen/nassen Verband anlegen.

**P302 + P352**  
BEI KONTAKT MIT DER HAUT: Mit viel Wasser und Seife waschen.

**P303 + P361 + P353**  
BEI KONTAKT MIT DER HAUT (oder dem Haar): Alle beschmutzten, getränkten Kleidungsstücke sofort ausziehen. Haut mit Wasser abwaschen/duschen.

**P304 + P312**  
BEI EINATMEN: Bei Unwohlsein GIFTINFORMATIONSZENTRUM oder Arzt anrufen.

**P304 + P340**  
BEI EINATMEN: An die frische Luft bringen und in einer Position ruhigstellen, die das Atmen erleichtert.

**P305 + P351 + P338**  
BEI KONTAKT MIT DEN AUGEN: Einige Minuten lang behutsam mit Wasser spülen. Vorhandene Kontaktlinsen nach Möglichkeit entfernen. Weiter spülen.

**P306 + P360**  
BEI KONTAKT MIT DER KLEIDUNG: Kontaminierte Kleidung und Haut sofort mit viel Wasser abwaschen und danach Kleidung ausziehen.

**P308 + P313**  
BEI Exposition oder falls betroffen: Ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.

**P231+P232**  
Unter inertem Gas handhaben. Vor Feuchtigkeit schützen.

**P332 + P313**  
Bei Hautreizung: Ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.

**P333 + P313**  
Bei Hautreizung oder -ausschlag: Ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.

**P335 + P334**  
Lose Partikel von der Haut abbürsten. In kaltes Wasser tauchen/nassen Verband anlegen.

**P235+P410**  
Kühl halten. Vor Sonnenbestrahlung schützen.

**P337 + P313**  
Bei anhaltender Augenreizung: Ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.

**P342 + P311**  
Bei Symptomen der Atemwege: GIFTINFORMATIONSZENTRUM oder Arzt anrufen.

**P361+P364**  
Alle kontaminierten Kleidungsstücke sofort ausziehen und vor erneutem Tragen waschen.

**P362+P364**  
Kontaminierte Kleidung ausziehen und vor erneutem Tragen waschen.

**P370 + P376**  
Bei Brand: Undichtigkeit beseitigen, wenn gefahrlos möglich.

**P370 + P378**  
Bei Brand: ... zum Löschen verwenden.

**P370+P378a**  
Bei Brand: Zum Löschen verwenden: CO<sub>2</sub>, Löschpulver oder Wassersprühstrahl.

**P370+P378b**  
Bei Brand: Zum Löschen verwenden: Spezialpulver für Metallbrände.

**P370+P378c**  
Bei Brand: Zum Löschen verwenden: CO<sub>2</sub>, Sand, Löschpulver.

**P370+P378d**  
Bei Brand: Zum Löschen verwenden: Wasser.

**P370+P378e**  
Bei Brand: Zum Löschen verwenden: Wasserdampf.

**P370+P378f**  
Bei Brand: Zum Löschen verwenden: Wassersprühstrahl.

**P370+P378g**  
Bei Brand: Zum Löschen verwenden: Schaum.

**P370+P378h**  
Bei Brand: Zum Löschen verwenden: Alkoholbeständiger Schaum.

**P370+P378i**  
Bei Brand: Zum Löschen verwenden: Löschpulver.

**P370+P378j**  
Bei Brand: Zum Löschen verwenden: BC-Pulver.

**P370+P378k**  
Bei Brand: Zum Löschen verwenden: ABC-Pulver.

**P370+P378l**  
Bei Brand: Zum Löschen verwenden: Kohlendioxid.

**P370+P378m**  
Bei Brand: Zum Löschen verwenden: Kalksteinpulver.

**P370+P378n**  
Bei Brand: Zum Löschen verwenden: Zement.

**P370+P378o**  
Bei Brand: Zum Löschen verwenden: Sand.

**P370+P378p**  
Bei Brand: Zum Löschen verwenden: Trockener Sand.

**P370 + P380**  
Bei Brand: Umgebung räumen.

**P370 + P380 + P375**  
Bei Brand: Umgebung räumen. Wegen Explosionsgefahr Brand aus der Entfernung bekämpfen.

**P371 + P380 + P375**

Bei Großbrand und großen Mengen: Umgebung räumen. Wegen Explosionsgefahr Brand aus der Entfernung bekämpfen.

**P401**

... aufbewahren.

**P401a**

Gemäß örtlicher/regionaler/nationaler/internationaler Vorschrift lagern.

**P402**

An einem trockenen Ort aufbewahren.

**P403**

An einem gut belüfteten Ort aufbewahren.

**P404**

In einem geschlossenen Behälter aufbewahren.

**P405**

Unter Verschluss aufbewahren.

**P406**

In korrosionsbeständigem Behälter mit korrosionsbeständiger Auskleidung aufbewahren.

**P407**

Luftspalt zwischen Stapeln/Paletten lassen.

**P410**

Vor Sonnenbestrahlung schützen.

**P411**

Bei Temperaturen von nicht mehr als ... °C/... °F aufbewahren.

**P411a**

Bei Temperaturen von nicht mehr als ... °C aufbewahren.

**P411b**

Bei Temperaturen von nicht mehr als... °F aufbewahren.

**P412**

Nicht Temperaturen von mehr als 50 °C aussetzen.

**P413**

Schüttgut in Mengen von mehr als ... kg/ ...lbs bei Temperaturen von nicht mehr als ... °C/ ...°F aufbewahren

**P413a**

Schüttgut in Mengen von mehr als ... kg bei Temperaturen von nicht mehr als ... °C aufbewahren.

**P413b**

Schüttgut in Mengen von mehr als ...lbs bei Temperaturen von nicht mehr als ...°F aufbewahren.

**P420**

Von anderen Materialien entfernt aufbewahren.

**P420a**

Von Lebensmitteln getrennt lagern.

**P420b**

Von brennbaren Stoffen getrennt lagern.

**P420c**

Von Oxidationsmitteln getrennt lagern.

**P420d**

Von Reduktionsmitteln getrennt lagern.

**P420e**

Von Wasser getrennt lagern.

**P420f**

Von Metallen getrennt lagern.

**P420g**

Von Säuren getrennt lagern.

**P420h**

Von Laugen getrennt lagern.

**P422**

Inhalt in/unter ... aufbewahren

**P422a**

Inhalte unter Inertgas aufbewahren.

**P422b**

Inhalte unter Schutzgas aufbewahren.

**P422c**

Inhalte unter Lösemittel aufbewahren.

**P422d**

Unter Wasser aufbewahren.

**P422e**

Unter Petroleum aufbewahren.

**P422f**

Unter Stickstoff aufbewahren.

**P402 + P404**

In einem geschlossenen Behälter an einem trockenen Ort aufbewahren.

**P403+P233**

Behälter dicht verschlossen an einem gut belüfteten Ort aufbewahren.

**P403+P235**

Kühl an einem gut belüfteten Ort aufbewahren.

**P410+P403**

Vor Sonnenbestrahlung geschützt an einem gut belüfteten Ort aufbewahren.

**P410+P412**

Vor Sonnenbestrahlung schützen und nicht Temperaturen von r als 50 °C aussetzen.

**P411+P235**

Kühl und bei Temperaturen von nicht mehr als ...°C/ ...°F aufbewahren.

**P411a+P235**

Kühl und bei Temperaturen von nicht mehr als ...°C aufbewahren.

**P411b+P235**

Kühl und bei Temperaturen von nicht mehr als ...°F aufbewahren.

The GHS regulation resp. CLP (regulation on Classification, Labeling and Packaging of Substances and Mixtures) regulation (EG) No 1272/2008 has become effective on 20th January 2009.

This regulation will amend and repeal Directives 67/548/EEC and 1999/45/EC over a period of a few years, and amend Regulation (EC) No 1907/2006. It's the aim of this regulation to ensure a high level of protection of human health and the environment. In addition it is essential to harmonize the provisions and criteria for the classification and labeling of substances and mixtures.

With this information we would like to give our customers an insight into the new systematic and simultaneously provide an opportunity to become acquainted with the new pictograms as well as with the H (hazard warnings)- and P (safety information) codes.

## H-Codes

### Hazard statements for physical hazards

**H200**  
Unstable explosives.

**H201**  
Explosive; mass explosion hazard.

**H202**  
Explosive, severe projection hazard.

**H203**  
Explosive; fire, blast or projection hazard.

**H204**  
Fire or projection hazard.

**H205**  
May mass explode in fire.

**H220**  
Extremely flammable gas.

**H221**  
Flammable gas.

**H222**  
Extremely flammable aerosol.

**H223**  
Flammable aerosol.

**H224**  
Extremely flammable liquid and vapour.

**H225**  
Highly flammable liquid and vapour.

**H226**  
Flammable liquid and vapour.

**H227**  
Combustible liquid.

**H228**  
Flammable solid.

**H229**  
Pressurised container: May burst if heated.

**H230**  
May react explosively even in the absence of air.

**H231**  
May react explosively even in the absence of air at elevated pressure and / or temperature.

**H240**  
Heating may cause an explosion.

**H241**  
Heating may cause a fire or explosion.

**H242**  
Heating may cause a fire.

**H250**  
Catches fire spontaneously if exposed to air.

**H251**  
Self-heating; may catch fire.

**H252**  
Self-heating in large quantities; may catch fire.

**H260**  
In contact with water releases flammable gases which may ignite spontaneously.

**H261**  
In contact with water releases flammable gases.

**H270**  
May cause or intensify fire; oxidiser.

**H271**  
May cause fire or explosion; strong oxidiser.

**H272**  
May intensify fire; oxidiser.

**H280**  
Contains gas under pressure; may explode if heated.

**H281**  
Contains refrigerated gas; may cause cryogenic burns or injury.

**H290**  
May be corrosive to metals.

### Hazard statements for health hazards

**H300**  
Fatal if swallowed.

**H301**  
Toxic if swallowed.

**H302**  
Harmful if swallowed.

**H303**  
May be harmful if swallowed.

**H304**  
May be fatal if swallowed and enters airways.

**H305**  
May be harmful if swallowed and enters airways.

**H310**  
Fatal in contact with skin.

**H311**  
Toxic in contact with skin.

**H312**  
Harmful in contact with skin.

**H313**  
May be harmful in contact with skin.

**H314**  
Causes severe skin burns and eye damage.

**H315**  
Causes skin irritation.

**H316**  
Causes mild skin irritation.

**H317**  
May cause an allergic skin reaction.

**H318**  
Causes serious eye damage.

**H319**  
Causes serious eye irritation.

**H320**  
Causes eye irritation.

**H330**  
Fatal if inhaled.

**H331**  
Toxic if inhaled.

**H332**  
Harmful if inhaled.

**H333**  
May be harmful if inhaled.

**H334**  
May cause allergy or asthma symptoms or breathing difficulties if inhaled.

**H335**  
May cause respiratory irritation.

**H336**  
May cause drowsiness or dizziness.

**H340**  
May cause genetic defects.

**H341**  
Suspected of causing genetic defects.

**H350**  
May cause cancer.

**H350i**  
May cause cancer by inhalation.

**H351**  
Suspected of causing cancer.

**H351i**  
Suspected of causing cancer by inhalation.

**H360**  
May damage fertility or the unborn child.

**H360D**  
May damage the unborn child.

**H360Df**  
May damage the unborn child. Suspected of damaging fertility.

**H360F**  
May damage fertility.

**H360FD**  
May damage fertility. May damage the unborn child.

**H360Fd**  
May damage fertility. Suspected of damaging the unborn child.

**H361**  
Suspected of damaging fertility or the unborn child.

**H361d**  
Suspected of damaging the unborn child.

**H361f**  
Suspected of damaging fertility.

**H361fd**  
Suspected of damaging fertility. Suspected of damaging the unborn child.

**H362**  
May cause harm to breast-fed children.

**H370**  
Causes damage to organs.

**H371**  
May cause damage to organs.

**H372**  
Causes damage to organs.

**H373**  
May cause damage to organs through prolonged or repeated exposure.

**P332**  
If skin irritation occurs:

**P333**  
If skin irritation or rash occurs:

**P334**  
Immerse in cool water/wrap in wet bandages.

**P335**  
Brush off loose particles from skin.

**P336**  
Thaw frosted parts with lukewarm water. Do not rub affected area.

**P337**  
If eye irritation persists:

**P338**  
Remove contact lenses, if present and easy to do. Continue rinsing.

**P340**  
Remove victim to fresh air and keep at rest in a position comfortable for breathing.

**P342**  
If experiencing respiratory symptoms:

**P351**  
Rinse cautiously with water for several minutes.

**P352**  
Wash with plenty of soap and water.

**P353**  
Rinse skin with water/shower.

**P360**  
Rinse immediately contaminated clothing and skin with plenty of water before removing clothes.

**P361**  
Remove/Take off immediately all contaminated clothing.

**P362**  
Take off contaminated clothing and wash before reuse.

**P363**  
Wash contaminated clothing before reuse.

**P364**  
And wash it before reuse.

**P370**  
In case of fire:

**P371**  
In case of major fire and large quantities:

**P372**  
Explosion risk in case of fire.

**P373**  
DO NOT fight fire when fire reaches explosives.

**P374**  
Fight fire with normal precautions from a reasonable distance

**P375**  
Fight fire remotely due to the risk of explosion.

**P376**  
Stop leak if safe to do so.

**P377**  
Leaking gas fire: Do not extinguish, unless leak can be stopped safely.

**P378**  
Use ... for extinction.

**P378a**  
Use for extinction: CO<sub>2</sub>, powder or water spray.

**P378b**  
Use for extinction: Special powder for metal fires.

**P378c**  
Use for extinction: CO<sub>2</sub>, sand, extinguishing powder.

**P378d**  
Use for extinction: Water.

**P378e**  
Use for extinction: Water haze.

**P378f**  
Use for extinction: Water spray.

**P378g**  
Use for extinction: Foam.

**P378h**  
Use for extinction: Alcohol resistant foam.

**P378i**  
Use for extinction: Fire-extinguishing powder.

**P378j**  
Use for extinction: BC powder.

**P378k**  
Use for extinction: ABC powder.

**P378l**  
Use for extinction: Carbon dioxide.

**P378m**  
Use for extinction: Limestone powder.

**P378n**  
Use for extinction: Cement.

**P378o**  
Use for extinction: Sand.

**P378p**  
Use for extinction: Dry sand.

**P380**  
Evacuate area.

**P381**  
Eliminate all ignition sources if safe to do so.

**P390**  
Absorb spillage to prevent material damage.

**P391**  
Collect spillage.

**P231+P232**  
Handle under inert gas. Protect from moisture.

**P235+P410**  
Keep cool. Protect from sunlight.

**P301 + P310**  
IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.

**P301 + P312**  
IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.

**P301 + P330 + P331**  
IF SWALLOWED: rinse mouth. Do NOT induce vomiting.

**P302 + P334**  
IF ON SKIN: Immerse in cool water/wrap in wet bandages.

**P302 + P352**  
IF ON SKIN: Wash with plenty of soap and water.

**P303 + P361 + P353**  
IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

**P304+P312**  
IF INHALED: Call a POISON CENTER or doctor/physician if you feel unwell.

**P304 + P340**  
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

**P305 + P351 + P338**  
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**P306 + P360**  
IF ON CLOTHING: rinse immediately contaminated clothing and skin with plenty of water before removing clothes.

**P307 + P311**  
IF exposed: Call a POISON CENTER or doctor/physician.

**P308 + P313**  
IF exposed or concerned: Get medical advice/attention.

**P332 + P313**  
If skin irritation occurs: Get medical advice/attention.

**P333 + P313**  
If skin irritation or rash occurs: Get medical advice/attention.

**P335 + P334**  
Brush off loose particles from skin. Immerse in cool water/ wrap in wet bandages.

**P337 + P313**  
If eye irritation persists: Get medical advice/attention.

**P342 + P311**  
If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.

**P361+P364**  
Take off immediately all contaminated clothing and wash it before reuse.

**P362+P364**  
Take off contaminated clothing and wash it before reuse.

**P370 + P376**  
In case of fire: Stop leak if safe to do so.

**P370 + P378**  
In case of fire: Use ... for extinction.

**P370+P378a**  
In case of fire: Use for extinction: CO<sub>2</sub>, powder or water spray.

**P370+P378b**  
In case of fire: Use for extinction: Special powder for metal fires.

**P370+P378c**  
In case of fire: Use for extinction: CO<sub>2</sub>, sand, extinguishing powder.

**P370+P378d**  
In case of fire: Use for extinction: Water.

**P370+P378e**  
In case of fire: Use for extinction: Water haze.

**P370+P378f**  
In case of fire: Use for extinction: Water spray.

**P370+P378g**  
In case of fire: Use for extinction: Foam.

**P370+P378h**  
In case of fire: Use for extinction: Alcohol resistant foam.

**P370+P378i**  
In case of fire: Use for extinction: Fire-extinguishing powder.

**P370+P378j**  
In case of fire: Use for extinction: BC powder.

**P370+P378k**  
In case of fire: Use for extinction: ABC powder.

**P370+P378l**  
In case of fire: Use for extinction: Carbon dioxide.

**P370+P378m**  
In case of fire: Use for extinction: Limestone powder.

**P370+P378n**  
In case of fire: Use for extinction: Cement.

**P370+P378o**  
In case of fire: Use for extinction: Sand.

**P370+P378p**  
In case of fire: Use for extinction: Dry sand.

**P370 + P380**  
In case of fire: Evacuate area.

**P370 + P380 + P375**  
In case of fire: Evacuate area. Fight fire remotely due to the risk of explosion.

**P371 + P380 + P375**  
In case of major fire and large quantities: Evacuate area. Fight fire remotely due to the risk of explosion.

**P401**  
Store ...

**P401a**  
Store in accordance with local/regional/national/international regulations.

**P402**  
Store in a dry place.

**P403**  
Store in a well-ventilated place.

**P404**  
Store in a closed container.

**P405**  
Store locked up.

**P406**  
Store in corrosive resistant/... container with a resistant inner liner.

**P407**  
Maintain air gap between stacks/pallets.

**P410**  
Protect from sunlight.

**P411**  
Store at temperatures not exceeding ... °C/...°F.

**P411a**  
Store at temperatures not exceeding... °C.

**P411b**  
Store at temperatures not exceeding...°F.

**P412**  
Do not expose to temperatures exceeding 50 °C/122 °F.

**P413**  
Store bulk masses greater than ... kg/... lbs at temperatures not exceeding ... °C/...°F.

**P413a**  
Store bulk masses greater than ...kg at temperatures not exceeding ...°C.

**P413b**  
Store bulk masses greater than ...lbs at temperatures not exceeding ...°F.

**P420**  
Store away from other materials.

**P420a**  
Store away from foodstuffs.

**P420b**  
Store away from flammable substances.

**P420c**  
Store away from oxidizing agents.

**P420d**  
Store away from reducing agents.

**P420e**  
**Store away from water.**

**P420f**  
Store away from metals.

**P420g**  
Store away from acids.

**P420h**  
Store away from caustic solutions.

**P422**  
Store contents under ...

**P422a**  
Store contents under inert gas.

**P422b**  
Store contents under protective gas.

**P422c**  
Store contents under solvent.

**P422d**  
Store under water.

**P422e**  
Store in petroleum.

**P422f**  
Store in nitrogen.

**P402 + P404**  
Store in a dry place. Store in a closed container.

**P403 + P233**  
Store in a well-ventilated place. Keep container tightly closed.

**P403 + P235**  
Store in a well-ventilated place. Keep cool.

**P410 + P403**  
Protect from sunlight. Store in a well-ventilated place.

**P410 + P412**  
Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

**P411 + P235**  
Store at temperatures not exceeding ... °C/... °F. Keep cool.

**P411a+P235**  
Store at temperatures not exceeding ...°C. Keep cool.

**P411b+P235**  
Store at temperatures not exceeding ...°F. Keep cool.

The GHS regulation resp. CLP (regulation on Classification, Labeling and Packaging of Substances and Mixtures) regulation (EG) No 1272/2008 has become effective on 20th January 2009.

This regulation will amend and repeal Directives 67/548/EEC and 1999/45/EC over a period of a few years, and amend Regulation (EC) No 1907/2006. It's the aim of this regulation to ensure a high level of protection of human health and the environment. In addition it is essential to harmonize the provisions and criteria for the classification and labeling of substances and mixtures.

With this information we would like to give our customers an insight into the new systematic and simultaneously provide an opportunity to become acquainted with the new pictograms as well as with the H (hazard warnings)- and P (safety information) codes.

## H - Codes

### Des Mentions de danger des dangers physiques

**H200**  
Explosif instable.

**H201**  
Explosif; danger d'explosion en masse.

**H202**  
Explosif; danger sérieux de projection.

**H203**  
Explosif; danger d'incendie, d'effet de souffle ou de projection.

**H204**  
Danger d'incendie ou de projection.

**H205**  
Danger d'explosion en masse en cas d'incendie.

**H220**  
Gaz extrêmement inflammable.

**H221**  
Gaz inflammable.

**H222**  
Aérosol extrêmement inflammable.

**H223**  
Aérosol inflammable.

**H224**  
Liquide et vapeurs extrêmement inflammables.

**H225**  
Liquide et vapeurs très inflammables.

**H226**  
Liquide et vapeurs inflammables.

**H227**  
Liquide combustible.

**H228**  
Matière solide inflammable.

**H229**  
Récipient sous pression: peut éclater sous l'effet de la chaleur.

**H230**  
Peut exploser même en l'absence d'air.

**H231**  
Peut exploser même en l'absence d'air à une pression et/ou température élevée(s).

**H240**  
Peut exploser sous l'effet de la chaleur.

**H241**  
Peut s'enflammer ou exploser sous l'effet de la chaleur.

**H242**  
Peut s'enflammer sous l'effet de la chaleur.

**H250**  
S'enflamme spontanément au contact de l'air.

**H251**  
Matière auto-échauffante; peut s'enflammer.

**H252**  
Matière auto-échauffante en grandes quantités; peut s'enflammer.

**H260**  
Dégage au contact de l'eau des gaz inflammables qui peuvent s'enflammer spontanément.

**H261**  
Dégage au contact de l'eau des gaz inflammables.

**H270**  
Peut provoquer ou aggraver un incendie; comburant.

**H271**  
Peut provoquer un incendie ou une explosion; comburant puissant.

**H272**  
Peut aggraver un incendie; comburant.

**H280**  
Contient un gaz sous pression; peut exploser sous l'effet de la chaleur.

## H281

Contient un gaz réfrigéré; peut causer des brûlures ou blessures cryogéniques.

## H290

Peut être corrosif pour les métaux.

### Des Mentions de danger des dangers pour la santé

## H300

Mortel en cas d'ingestion.

## H301

Toxique en cas d'ingestion.

## H302

Nocif en cas d'ingestion.

## H303

Peut être nocif en cas d'ingestion.

## H304

Peut être mortel en cas d'ingestion et de pénétration dans les voies respiratoires.

## H305

Peut être nocif en cas d'ingestion et de pénétration dans les voies respiratoires.

## H310

Mortel par contact cutané.

## H311

Toxique par contact cutané.

## H312

Nocif par contact cutané.

## H313

Peut être nocif par contact cutané.

## H314

Provoque des brûlures de la peau et des lésions oculaires graves.

## H315

Provoque une irritation cutanée.

## H300+H310

Mortel par ingestion ou par contact cutané.

## H300+H310+H330

Mortel par ingestion, par contact cutané ou par inhalation.

## H300+H330

Mortel par ingestion ou par inhalation.

## H301+H311

Toxique par ingestion ou par contact cutané.

## H301+H311+H331

Toxique par ingestion, par contact cutané ou par inhalation.

## H301+H331

Toxique par ingestion ou par inhalation.

## H302+H312

Nocif en cas d'ingestion ou de contact cutané.

## H302+H312+H332

Nocif en cas d'ingestion, de contact cutané ou d'inhalation.

## H302+H332

Nocif en cas d'ingestion ou d'inhalation.

## H303+H313

Peut être nocif en cas d'ingestion ou de contact cutané.

## H303+H313+H333

Peut être nocif en cas d'ingestion, de contact cutané ou d'inhalation.

## H303+H333

Peut être nocif en cas d'ingestion ou d'inhalation.

## H310+H330

Mortel par contact cutané ou par inhalation.

## H311+H331

Toxique par contact cutané ou par inhalation.

## H312+H332

Nocif en cas de contact cutané ou d'inhalation.

## H313+H333

Peut être nocif en cas de contact cutané ou d'inhalation.

## H315+H320

Cause une irritation cutanée et oculaire.

## H316

Provoque une légère irritation cutanée.

## H317

Peut provoquer une allergie cutanée.

## H318

Provoque des lésions oculaires graves.

## H319

Provoque une sévère irritation des yeux.

## H320

Provoque une irritation oculaire.

## H330

Mortel par inhalation.

## H331

Toxique par inhalation.

## H332

Nocif par inhalation.

## H333

Peut être nocif par inhalation.

## H334

Peut provoquer des symptômes allergiques ou d'asthme ou des difficultés respiratoires par inhalation.

## H335

Peut irriter les voies respiratoires.

## H336

Peut provoquer somnolence ou vertiges.

**H340**  
Peut induire des anomalies génétiques.

**H341**  
Susceptible d'induire des anomalies génétiques.

**H350**  
Peut provoquer le cancer.

**H350i**  
Peut provoquer le cancer par inhalation.

**H351**  
Susceptible de provoquer le cancer.

**H351i**  
Susceptible de provoquer le cancer par inhalation.

**H360**  
Peut nuire à la fertilité ou au fœtus.

**H360D**  
Peut nuire au fœtus.

**H360Df**  
Peut nuire au fœtus. Susceptible de nuire à la fertilité.

**H360F**  
Peut nuire à la fertilité.

**H360FD**  
Peut nuire à la fertilité. Peut nuire au fœtus.

**H360Fd**  
Peut nuire à la fertilité. Susceptible de nuire au fœtus.

**H361**  
Susceptible de nuire à la fertilité ou au fœtus.

**H361d**  
Susceptible de nuire au fœtus.

**H361f**  
Susceptible de nuire à la fertilité.

**H361fd**  
Susceptible de nuire à la fertilité. Susceptible de nuire au fœtus.

**H362**  
Peut être nocif pour les bébés nourris au lait maternel.

**H370**  
Risque avéré d'effets graves pour les organes.

**H371**  
Risque présumé d'effets graves pour les organes.

**H372**  
Risque avéré d'effets graves pour les organes à la suite d'expositions répétées ou d'une exposition prolongée.

**H373**  
Risque présumé d'effets graves pour les organes à la suite d'expositions répétées ou d'une exposition prolongée.

## Des Mentions de danger des dangers pour l'environnement

**H400**  
Très toxique pour les organismes aquatiques.

**H401**  
Toxique pour les organismes aquatiques.

**H402**  
Nocif pour les organismes aquatiques.

**H410**  
Très toxique pour les organismes aquatiques, entraîne des effets néfastes à long terme.

**H411**  
Toxique pour les organismes aquatiques, entraîne des effets néfastes à long terme.

**H412**  
Nocif pour les organismes aquatiques, entraîne des effets néfastes à long terme.

**H413**  
Peut être nocif à long terme pour les organismes aquatiques.

**H420**  
Nuit à la santé publique et à l'environnement en détruisant l'ozone dans la haute atmosphère

## EUH - Codes

### Des informations de dangers supplémentaires

**EUH001**  
Explosif à l'état sec.

**EUH006**  
Danger d'explosion en contact ou sans contact avec l'air.

**EUH014**  
Réagit violemment au contact de l'eau.

**EUH018**  
Lors de l'utilisation, formation possible de mélange vapeur-air inflammable/explosif.

**EUH019**  
Peut former des peroxydes explosifs.

**EUH029**  
Au contact de l'eau, dégage des gaz toxiques.

**EUH031**  
Au contact d'un acide, dégage un gaz toxique.

**EUH032**  
Au contact d'un acide, dégage un gaz très toxique.

**EUH044**  
Risque d'explosion si chauffé en ambiance confinée.

**EUH059**  
Dangereux pour la couche d'ozone.

**EUH066**  
L'exposition répétée peut provoquer dessèchement ou gerçures de la peau.

**EUH070**  
Toxique par contact oculaire.

**EUH071**  
Corrosif pour les voies respiratoires.

## P - Codes

**P101**  
En cas de consultation d'un médecin, garder à disposition le récipient ou l'étiquette.

**P102**  
Tenir hors de portée des enfants.

**P103**  
Lire l'étiquette avant utilisation.

**P201**  
Se procurer les instructions avant utilisation.

**P202**  
Ne pas manipuler avant d'avoir lu et compris toutes les précautions de sécurité.

**P210**  
Tenir à l'écart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer.

**P210a**  
Tenir à l'écart de la chaleur. - Ne pas fumer.

**P210b**  
Tenir à l'écart des étincelles. - Ne pas fumer.

**P210c**  
Tenir à l'écart des flammes nues. - Ne pas fumer.

**P210d**  
Tenir à l'écart des surfaces chaudes. - Ne pas fumer.

**P211**  
Ne pas vaporiser sur une flamme nue ou sur toute autre source d'ignition.

**P220**  
Tenir/stocker à l'écart des vêtements/matières combustibles.

**P220a**  
Tenir à l'écart des vêtements.

**P220b**  
Tenir à l'écart des matières combustibles.

**P220c**  
Tenir à l'écart des agents de réduction, des composés de métaux lourds, des acides et des alcalis.

**P220d**  
Tenir à l'écart des matières oxydantes et acides ainsi que des composés de métaux lourds.

**P220e**  
Tenir à l'écart du fer.

**P220f**  
Tenir à l'écart de l'eau.

**P220g**  
Tenir à l'écart des acides.

**P220h**  
Tenir à l'écart des lessives alcalines.

**P220i**  
Tenir à l'écart des métaux.

**P220j**  
Tenir à l'écart des matières oxydantes et acides.

**P220k**  
Tenir à l'écart des substances organiques inflammables.

**P220l**  
Tenir à l'écart des acides, agents de réduction et matières inflammables.

**P221**  
Prendre toutes précautions pour éviter de mélanger avec des matières combustibles.

**P222**  
Ne pas laisser au contact de l'air.

**P223**  
Éviter tout contact avec l'eau, à cause du risque de réaction violente et d'inflammation spontanée.

**P230**  
Maintenir humidifié avec...

**P230a**  
Maintenir humidifié.

**P231**  
Manipuler sous gaz inerte.

**P232**  
Protéger de l'humidité.

**P233**  
Maintenir le récipient fermé de manière étanche.

**P234**  
Conservé uniquement dans le récipient d'origine.

**P235**  
Tenir au frais.

**P240**  
Mise à la terre/liaison équipotentielle du récipient et du matériel de réception.

**P241**  
Utiliser du matériel électrique/de ventilation/d'éclairage/antidéflagrant.

**P242**  
Ne pas utiliser d'outils produisant des étincelles.

**P243**  
Prendre des mesures de précaution contre les décharges électrostatiques.

**P244**  
S'assurer de l'absence de graisse ou d'huile sur les soupapes de réduction.

**P250**  
Éviter les abrasions/les chocs/les frottements.

**P251**  
Récipient sous pression: ne pas perforer, ni brûler, même après usage.

**P260**  
Ne pas respirer les poussières/fumées/gaz/brouillards/vapeurs/aérosols.

**P260a**  
Ne pas respirer les poussières.

**P260b**  
Ne pas respirer les fumées.

**P260c**  
Ne pas respirer les gaz.

**P260d**  
Ne pas respirer les brouillards.

**P260e**  
Ne pas respirer les vapeurs.

**P260f**  
Ne pas respirer les aérosols.

**P260g**  
Ne pas respirer les brouillards/vapeurs/aérosols.

**P261**  
Éviter de respirer les poussières/fumées/gaz/brouillards/vapeurs/aérosols.

**P261a**  
Éviter de respirer les poussières.

**P261b**  
Éviter de respirer les fumées.

**P261c**  
Éviter de respirer les gaz.

**P261d**  
Éviter de respirer les brouillards.

**P261e**  
Éviter de respirer les vapeurs.

**P261f**  
Éviter de respirer les aérosols.

**P261g**  
Éviter de respirer les brouillards/vapeurs/aérosols.

**P262**  
Éviter tout contact avec les yeux, la peau ou les vêtements.

**P263**  
Éviter tout contact avec la substance au cours de la grossesse/pendant l'allaitement.

**P264**  
Se laver soigneusement après manipulation.

**P270**  
Ne pas manger, boire ou fumer en manipulant ce produit.

**P271**  
Utiliser seulement en plein air ou dans un endroit bien ventilé.

**P272**  
Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

**P273**  
Éviter le rejet dans l'environnement.

**P280**  
Porter des gants de protection/des vêtements de protection/ un équipement de protection des yeux/du visage.

**P280a**  
Porter des gants de protection / un équipement de protection des yeux / un équipement de protection du visage.

**P280b**  
Porter des gants de protection / un équipement de protection des yeux.

**P280c**  
Porter des gants de protection / un équipement de protection du visage.

**P280d**  
Porter des vêtements de protection / un équipement de protection des yeux.

**P280e**  
Porter des vêtements de protection / un équipement de protection du visage.

**P280f**  
Porter des vêtements de protection.

**P280g**  
Porter des gants de protection.

**P280h**  
Porter des gants de protection / des vêtements de protection.

**P280i**  
Porter un équipement de protection des yeux / un équipement de protection du visage.

**P280j**  
Porter un équipement de protection du visage.

**P282**  
Porter des gants isolants contre le froid/un équipement de protection du visage/des yeux.

**P283**  
Porter des vêtements résistants au feu/aux flammes/ignifuges.

**P284**  
Porter un équipement de protection respiratoire.

**P301**  
EN CAS D'INGESTION:

**P302**  
EN CAS DE CONTACT AVEC LA PEAU:

**P303**  
EN CAS DE CONTACT AVEC LA PEAU (ou les cheveux):

**P304**  
EN CAS D'INHALATION:

**P305**  
EN CAS DE CONTACT AVEC LES YEUX:

**P306**  
EN CAS DE CONTACT AVEC LES VÊTEMENTS:

**P308**  
EN CAS d'exposition prouvée ou suspectée:

**P310**  
Appeler immédiatement un CENTRE ANTIPOISON ou un médecin.

**P311**  
Appeler un CENTRE ANTIPOISON ou un médecin.

**P312**  
Appeler un CENTRE ANTIPOISON ou un médecin en cas de malaise.

**P313**  
Consulter un médecin.

**P314**  
Consulter un médecin en cas de malaise.

**P315**  
Consulter immédiatement un médecin.

**P320**  
Un traitement spécifique est urgent (voir sur cette étiquette).

**P321**  
Traitement spécifique (voir sur cette étiquette).

**P330**  
Rincer la bouche.

**P331**  
NE PAS faire vomir.

**P332**  
En cas d'irritation cutanée:

**P333**  
En cas d'irritation ou d'éruption cutanée:

**P334**  
Rincer à l'eau fraîche/poser une compresse humide.

**P335**  
Enlever avec précaution les particules déposées sur la peau.

**P336**  
Dégeler les parties gelées avec de l'eau tiède. Ne pas frotter les zones touchées.

**P337**  
Si l'irritation oculaire persiste:

**P338**  
Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer.

**P340**  
Transporter la victime à l'extérieur et la maintenir au repos dans une position où elle peut confortablement respirer.

**P342**  
En cas de symptômes respiratoires:

**P351**  
Rincer avec précaution à l'eau pendant plusieurs minutes.

**P352**  
Laver abondamment à l'eau et au savon.

**P353**  
Rincer la peau à l'eau/se doucher.

**P360**  
Rincer immédiatement et abondamment avec de l'eau les vêtements contaminés et la peau avant de les enlever.

**P361**  
Enlever immédiatement les vêtements contaminés.

**P362**  
Enlever les vêtements contaminés et les laver avant réutilisation.

**P363**  
Laver les vêtements contaminés avant réutilisation.

**P364**  
Et les laver avant réutilisation.

**P370**  
En cas d'incendie:

**P371**  
En cas d'incendie important et s'il s'agit de grandes quantités:

**P372**  
Risque d'explosion en cas d'incendie.

**P373**  
NE PAS combattre l'incendie lorsque le feu atteint les explosifs.

**P374**  
Combattre l'incendie à distance en prenant les précautions normales.

**P375**  
Combattre l'incendie à distance à cause du risque d'explosion.

**P376**  
Obturer la fuite si cela peut se faire sans danger.

**P377**  
Fuite de gaz enflammé: Ne pas éteindre si la fuite ne peut pas être arrêtée sans danger.

**P378**  
Utiliser ... pour l'extinction.

**P378a**  
Utiliser pour l'extinction: CO<sub>2</sub>, poudre d'extinction ou eau pulvérisée.

**P378b**  
Utiliser pour l'extinction: Poudre spéciale pour incendies de métaux.

**P378c**  
Utiliser pour l'extinction: CO<sub>2</sub>, sable, poudre d'extinction.

**P378d**  
Utiliser pour l'extinction: Eau.

**P378e**  
Utiliser pour l'extinction: Brouillard d'eau.

**P378f**  
Utiliser pour l'extinction: Eau pulvérisée.

**P378g**  
Utiliser pour l'extinction: Mousse.

**P378h**  
Utiliser pour l'extinction: Mousse résistant à l'alcool.

**P378i**  
Utiliser pour l'extinction: Poudre d'extinction.

**P378j**  
Utiliser pour l'extinction: Poudre BC.

**P378k**  
Utiliser pour l'extinction: Poudre ABC.

**P378l**  
Utiliser pour l'extinction: Dioxyde de carbone.

**P378m**  
Utiliser pour l'extinction: Poudre de roche calcaire.

**P378n**  
Utiliser pour l'extinction: Ciment.

**P378o**  
Utiliser pour l'extinction: Sable.

**P378p**  
Utiliser pour l'extinction: Sable sec.

**P380**  
Évacuer la zone.

**P381**  
Éliminer toutes les sources d'ignition si cela est faisable sans danger.

**P390**  
Absorber toute substance répandue pour éviter qu'elle attaque les matériaux environnants.

**P391**  
Recueillir le produit répandu.

**P301+P310**  
EN CAS D'INGESTION: appeler immédiatement un CENTRE ANTIPOISON ou un médecin.

**P301+P312**  
EN CAS D'INGESTION: appeler un CENTRE ANTIPOISON ou un médecin en cas de malaise.

**P301+P330+P331**  
EN CAS D'INGESTION: rincer la bouche. NE PAS faire vomir.

**P302+P334**  
EN CAS DE CONTACT AVEC LA PEAU: rincer à l'eau fraîche/poser une compresse humide.

**P302+P352**  
EN CAS DE CONTACT AVEC LA PEAU: laver abondamment à l'eau et au savon.

**P303+P361+P353**  
EN CAS DE CONTACT AVEC LA PEAU (ou les cheveux): enlever immédiatement les vêtements contaminés. Rincer la peau à l'eau/se doucher.

**P304+P312**  
EN CAS D'INHALATION: Appeler un CENTRE ANTIPOISON ou un médecin en cas de malaise.

**P304+P340**  
EN CAS D'INHALATION: transporter la victime à l'extérieur et la maintenir au repos dans une position où elle peut confortablement respirer.

**P305+P351+P338**  
EN CAS DE CONTACT AVEC LES YEUX: rincer avec précaution à l'eau pendant plusieurs minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer.

**P306+P360**  
EN CAS DE CONTACT AVEC LES VÊTEMENTS: rincer immédiatement et abondamment avec de l'eau les vêtements contaminés et la peau avant de les enlever.

**P308+P311**  
En cas d'exposition prouvée ou suspectée: Appeler un CENTRE ANTIPOISON/un médecin.

**P308+P313**  
EN CAS d'exposition prouvée ou suspectée: consulter un médecin.

**P231+P232**  
Manipuler sous gaz inerte. Protéger de l'humidité.

**P332+P313**  
En cas d'irritation cutanée: consulter un médecin.

**P333+P313**  
En cas d'irritation ou d'éruption cutanée: consulter un médecin.

**P335+P334**  
Enlever avec précaution les particules déposées sur la peau. Rincer à l'eau fraîche/poser une compresse humide.

**P235+P410**  
Tenir au frais. Protéger du rayonnement solaire.

**P337+P313**  
Si l'irritation oculaire persiste: consulter un médecin.

**P342+P311**  
En cas de symptômes respiratoires: appeler un CENTRE ANTIPOISON ou un médecin.

**P361+P364**  
Enlever immédiatement tous les vêtements contaminés et les laver avant réutilisation.

**P362+P364**  
Enlever les vêtements contaminés et les laver avant réutilisation.

**P370+P376**  
En cas d'incendie: obturer la fuite si cela peut se faire sans danger.

**P370+P378**  
En cas d'incendie: utiliser ... pour l'extinction.

**P370+P378a**  
En cas d'incendie: Utiliser pour l'extinction: CO<sub>2</sub>, poudre d'extinction ou eau pulvérisée.

**P370+P378b**  
En cas d'incendie: Utiliser pour l'extinction: Poudre spéciale pour incendies de métaux.

**P370+P378c**  
En cas d'incendie: Utiliser pour l'extinction: CO<sub>2</sub>, sable, poudre d'extinction.

**P370+P378d**  
En cas d'incendie: Utiliser pour l'extinction: Eau.

**P370+P378e**  
En cas d'incendie: Utiliser pour l'extinction: Brouillard d'eau.

**P370+P378f**  
En cas d'incendie: Utiliser pour l'extinction: Eau pulvérisée.

**P370+P378g**  
En cas d'incendie: Utiliser pour l'extinction: Mousse.

**P370+P378h**  
En cas d'incendie: Utiliser pour l'extinction: Mousse résistant à l'alcool.

**P370+P378i**  
En cas d'incendie: Utiliser pour l'extinction: Poudre d'extinction.

**P370+P378j**  
En cas d'incendie: Utiliser pour l'extinction: Poudre BC.

**P370+P378k**  
En cas d'incendie: Utiliser pour l'extinction: Poudre ABC.

**P370+P378l**  
En cas d'incendie: Utiliser pour l'extinction: Dioxyde de carbone.

**P370+P378m**  
En cas d'incendie: Utiliser pour l'extinction: Poudre de roche calcaire.

**P370+P378n**  
En cas d'incendie: Utiliser pour l'extinction: Ciment.

**P370+P378o**  
En cas d'incendie: Utiliser pour l'extinction: Sable.

**P370+P378p**  
En cas d'incendie: Utiliser pour l'extinction: Sable sec.

**P370+P380**  
En cas d'incendie: évacuer la zone.

**P370+P380+P375**  
En cas d'incendie: évacuer la zone. Combattre l'incendie à distance à cause du risque d'explosion.

**P371+P380+P375**  
En cas d'incendie important et s'il s'agit de grandes quantités: évacuer la zone. Combattre l'incendie à distance à cause du risque d'explosion.

**P401**  
Stocker ...

**P401a**  
Stocker conformément à la réglementation locale/régionale/nationale/internationale.

**P402**  
Stocker dans un endroit sec.

**P403**  
Stocker dans un endroit bien ventilé.

**P404**  
Stocker dans un récipient fermé.

**P405**  
Garder sous clef.

**P406**  
Stocker dans un récipient résistant à la corrosion/récipient en avec doublure intérieure résistant à la corrosion.

**P407**  
Maintenir un intervalle d'air entre les piles/palettes.

**P410**  
Protéger du rayonnement solaire.

## P411

Stocker à une température ne dépassant pas... °C/... °F.

### P411a

Stocker à une température ne dépassant pas... °C.

### P411b

Stocker à une température ne dépassant pas... °F.

## P412

Ne pas exposer à une température supérieure à 50 °C/122 °F.

### P413

Stocker les quantités en vrac de plus de ...kg/...lb à une température ne dépassant pas ...°C/... °F.

### P413a

Stocker les quantités en vrac de plus de ...kg à une température ne dépassant pas... °C.

### P413b

Stocker les quantités en vrac de plus de ...lb à une température ne dépassant pas ...°F.

## P420

Stocker à l'écart des autres matières.

### P420a

Stocker à l'écart des aliments.

### P420b

Stocker à l'écart des matières inflammables.

### P420c

Stocker à l'écart des agents d'oxydation.

### P420d

Stocker à l'écart des agents de réduction.

### P420e

Stocker à l'écart de l'eau.

### P420f

Stocker à l'écart des métaux.

The GHS regulation resp. CLP (regulation on Classification, Labeling and Packaging of Substances and Mixtures) regulation (EG) No 1272/2008 has become effective on 20th January 2009.

This regulation will amend and repeal Directives 67/548/EEC and 1999/45/EC over a period of a few years, and amend Regulation (EC) No 1907/2006. It's the aim of this regulation to ensure a high level of protection of human health and the environment. In addition it is essential to harmonize the provisions and criteria for the classification and labeling of substances and mixtures.

With this information we would like to give our customers an insight into the new systematic and simultaneously provide an opportunity to become acquainted with the new pictograms as well as with the H (hazard warnings)- and P (safety information) codes.

## H - Codici

### Indicazioni di pericolo pericolo fisico

#### H200

Esplosivo instabile.

#### H201

Esplosivo; pericolo di esplosione di massa.

#### H202

Esplosivo; grave pericolo di proiezione.

#### H203

Esplosivo; pericolo di incendio, di spostamento d'aria o di proiezione.

#### H204

Pericolo di incendio o di proiezione.

#### H205

Pericolo di esplosione di massa in caso d'incendio.

#### H220

Gas altamente infiammabile.

#### H221

Gas infiammabile.

#### H222

Aerosol altamente infiammabile.

#### H223

Aerosol infiammabile.

#### H224

Liquido e vapori altamente infiammabili.

#### H225

Liquido e vapori facilmente infiammabili.

#### H226

Liquido e vapori infiammabili.

#### H227

Liquido combustibile.

#### H228

Solido infiammabile.

#### H229

Recipiente sotto pressione: può esplodere se riscaldato.

#### H230

Può reagire in modo esplosivo anche in assenza di aria.

#### H231

Può reagire in modo esplosivo anche in assenza di aria a pressione e/o temperatura elevata.

#### H240

Rischio di esplosione per riscaldamento.

#### H241

Rischio d'incendio o di esplosione per riscaldamento.

#### H242

Rischio d'incendio per riscaldamento.

#### H250

Spontaneamente infiammabile all'aria.

#### H251

Autoriscaldante; può infiammarsi.

#### H252

Autoriscaldante in grandi quantità; può infiammarsi.

#### H260

A contatto con l'acqua libera gas infiammabili che possono infiammarsi spontaneamente.

#### H261

A contatto con l'acqua libera gas infiammabili.

#### H270

Può provocare o aggravare un incendio; comburente.

#### H271

Può provocare un incendio o un'esplosione; molto comburente.

#### H272

Può aggravare un incendio; comburente.

#### H280

Contiene gas sotto pressione; può esplodere se riscaldato.

**H281**

Contiene gas refrigerato; può provocare ustioni o lesioni criogeniche.

**H290**

Può essere corrosivo per i metalli.

**Indicaciones di pericolo per la salute****H300**

Letale se ingerito.

**H301**

Tossico se ingerito.

**H302**

Nocivo se ingerito.

**H303**

Può essere nocivo per ingestione.

**H304**

Può essere letale in caso di ingestione e di penetrazione nelle vie respiratorie.

**H305**

Può essere nocivo per ingestione e se raggiunge le vie respiratorie.

**H310**

Letale per contatto con la pelle.

**H311**

Tossico per contatto con la pelle.

**H312**

Nocivo per contatto con la pelle.

**H313**

Può essere nocivo a contatto con la pelle.

**H314**

Provoca gravi ustioni cutanee e gravi lesioni oculari.

**H315**

Provoca irritazione cutanea.

**H316**

Causa leggera irritazione cutanea.

**H317**

Può provocare una reazione allergica cutanea.

**H318**

Provoca gravi lesioni oculari.

**H319**

Provoca grave irritazione oculare.

**H320**

Causa irritazione agli occhi.

**H330**

Letale se inalato.

**H331**

Tossico se inalato.

**H332**

Nocivo se inalato.

**H333**

Può essere nocivo per inalazione.

**H334**

Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato.

**H335**

Può irritare le vie respiratorie.

**H336**

Può provocare sonnolenza o vertigini.

**H340**

Può provocare alterazioni genetiche.

**H341**

Sospettato di provocare alterazioni genetiche.

**H350**

Può provocare il cancro.

**H350i**

Può provocare il cancro se inalato.

**H351**

Sospettato di provocare il cancro.

**H351i**

Sospettato di provocare il cancro per inalazione.

**H360**

Può nuocere alla fertilità o al feto.

**H360D**

Può nuocere al feto.

**H360Df**

Può nuocere al feto. Sospettato di nuocere alla fertilità.

**H360F**

Può nuocere alla fertilità.

**H360FD**

Può nuocere alla fertilità. Può nuocere al feto.

**H360Fd**

Può nuocere alla fertilità. Sospettato di nuocere al feto.

**H361**

Sospettato di nuocere alla fertilità o al feto.

**H361d**

Sospettato di nuocere al feto.

**H361f**

Sospettato di nuocere alla fertilità

**H361fd**

Sospettato di nuocere alla fertilità Sospettato di nuocere al feto.

**H362**

Può essere nocivo per i lattanti allattati al seno.

**H370**

Provoca danni agli organi.

**H371**

Può provocare danni agli organi.

**H372**

Provoca danni agli organi in caso di esposizione prolungata o ripetuta.

**H373**

Può provocare danni agli organi in caso di esposizione prolungata o ripetuta.

**H300+H310**

Mortale in caso di ingestione o a contatto con la pelle.

**H300+H310+H330**

Mortale se ingerito, a contatto con la pelle o se inalato.

**H300+H330**

Mortale se ingerito o inalato.

**H301+H311**

Tossico se ingerito o a contatto con la pelle.

**H301+H311+H331**

Tossico se ingerito, a contatto con la pelle o se inalato.

**H301+H331**

Tossico se ingerito o inalato.

**H302+H312**

Nocivo se ingerito o a contatto con la pelle.

**H302+H312+H332**

Nocivo se ingerito, a contatto con la pelle o se inalato.

**H302+H332**

Nocivo se ingerito o inalato.

**H303+H313**

Può essere nocivo per ingestione o a contatto con la pelle.

**H303+H313+H333**

Può essere nocivo per ingestione, a contatto con la pelle o per inalazione.

**H303+H333**

Può essere nocivo per ingestione o per inalazione.

**H310+H330**

Mortale a contatto con la pelle o in caso di inalazione.

**H311+H331**

Tossico a contatto con la pelle o se inalato.

**H312+H332**

Nocivo a contatto con la pelle o se inalato.

**H313+H333**

Può essere nocivo a contatto con la pelle o per inalazione.

**H315+H320**

Provoca irritazione cutanea e agli occhi.

**Indicaciones di pericolo per l'ambiente****H400**

Molto tossico per gli organismi acquatici.

**H401**

Tossico per gli organismi acquatici.

**H402**

Nocivo per gli organismi acquatici.

**H410**

Molto tossico per gli organismi acquatici con effetti di lunga durata.

**H411**

Tossico per gli organismi acquatici con effetti di lunga durata.

**H412**

Nocivo per gli organismi acquatici con effetti di lunga durata.

**H413**

Può essere nocivo per gli organismi acquatici con effetti di lunga durata.

**H420**

Nuoce alla salute pubblica e all'ambiente distruggendo l'ozono dello strato superiore dell'atmosfera

**EUH - Codici****informazioni supplementari sui pericoli****EUH001**

Esplosivo allo stato secco.

**EUH006**

Esplosivo a contatto o senza contatto con l'aria.

**EUH014**

Reagisce violentemente con l'acqua.

**EUH018**

Durante l'uso può formarsi una miscela vapore-aria esplosiva/inflammabile.

**EUH019**

Può formare perossidi esplosivi.

**EUH029**

A contatto con l'acqua libera un gas tossico.

**EUH031**

A contatto con acidi libera gas tossici.

**EUH032**

A contatto con acidi libera gas molto tossici.

**EUH044**

Rischio di esplosione per riscaldamento in ambiente confinato.

**EUH059**

Pericoloso per lo strato di ozono.

**EUH066**

L'esposizione ripetuta può provocare secchezza o screpolature della pelle.

**EUH070**

Tossico per contatto oculare.

**EUH071**

Corrosivo per le vie respiratorie.

**P - Codices****P101**

In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.

**P102**

Tenere fuori dalla portata dei bambini.

**P103**

Leggere l'etichetta prima dell'uso.

**P201**

Procurarsi istruzioni specifiche prima dell'uso.

**P202**

Non manipolare prima di avere letto e compreso tutte le avvertenze.

**P210**

Tenere lontano da fonti di calore/scintille/fiamme libere/superfici riscaldate. - Non fumare.

**P210a**

Tenere lontano da fonti di calore - Non fumare.

**P210b**

Tenere lontano da scintille - Non fumare. **P210c**

Tenere lontano da fiamme libere. - Non fumare.

**P210d**

Tenere lontano da superfici riscaldate - Non fumare.

**P211**

Non vaporizzare su una fiamma libera o altra fonte di accensione.

**P220**

Tenere/conservare lontano da indumenti/materiali combustibili.

**P220a**

Tenere lontano da indumenti.

**P220b**

Tenere lontano da materiali combustibili.

**P220c**

Tenere lontano da riducenti, da composti di metalli pesanti, acidi e alcali.

**P220d**

Tenere lontano da sostanze ossidanti e acide e da composti di metalli pesanti.

**P220e**

Tenere lontano da ferro.

**P220f**

Tenere lontano da acqua.

**P220g**

Tenere lontano da acidi.

**P220h**

Tenere lontano da soluzioni alcaline.

**P220i**

Tenere lontano da metalli.

**P220j**

Tenere lontano da sostanze ossidanti e acide.

**P220k**

Tenere lontano da sostanze organiche infiammabili.

**P220l**

Tenere lontano da acidi, riducenti e materiali infiammabili.

**P221**

Prendere ogni precauzione per evitare di miscelare con sostanze combustibili.

**P222**

Evitare il contatto con l'aria.

**P223**

Evitare qualsiasi contatto con l'acqua: pericolo di reazione violenta e di infiammazione spontanea.

**P230**

Mantenere umido con....

**P230a**

Mantenere umido.

**P231**

Manipolare in atmosfera di gas inerte.

**P232**

Proteggere dall'umidità.

**P233**

Tenere il recipiente ben chiuso.

**P234**

Conservare soltanto nel contenitore originale.

**P235**

Conservare in luogo fresco.

**P240**

Mettere a terra/massa il contenitore e il dispositivo ricevente.

**P241**

Utilizzare impianti elettrici/di ventilazione/d'illuminazione/a prova di esplosione.

**P242**

Utilizzare solo utensili antiscintillamento.

**P243**

Prendere precauzioni contro le scariche elettrostatiche.

**P244**

Mantenere le valvole di riduzione libere da grasso e olio.

**P250**  
Evitare le abrasioni/gli urti/gli attriti.

**P251**  
Recipiente sotto pressione: non perforare né bruciare, neppure dopo l'uso.

**P260**  
Non respirare la polvere/i fumi/i gas/la nebbia/i vapori/gli aerosol.

**P260a**  
Non respirare la polvere.

**P260b**  
Non respirare i fumi.

**P260c**  
Non respirare i gas.

**P260d**  
Non respirare la nebbia.

**P260e**  
Non respirare i vapori.

**P260f**  
Non respirare gli aerosol.

**P260g**  
Non respirare la nebbia/i vapori/gli aerosol.

**P261**  
Evitare di respirare la polvere/i fumi/i gas/la nebbia/i vapori/gli aerosol.

**P261a**  
Evitare di respirare la polvere.

**P261b**  
Evitare di respirare i fumi.

**P261c**  
Evitare di respirare i gas.

**P261d**  
Evitare di respirare la nebbia.

**P261e**  
Evitare di respirare i vapori.

**P261f**  
Evitare di respirare gli aerosol.

**P261g**  
Evitare di respirare la nebbia/i vapori/gli aerosol.

**P262**  
Evitare il contatto con gli occhi, la pelle o gli indumenti.

**P263**  
Evitare il contatto durante la gravidanza/l'allattamento.

**P264**  
Lavare accuratamente dopo l'uso.

**P270**  
Non mangiare, né bere, né fumare durante l'uso.

**P271**  
Utilizzare soltanto all'aperto o in luogo ben ventilato.

**P272**  
Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.

**P273**  
Non disperdere nell'ambiente.

**P280**  
Indossare guanti/indumenti protettivi/Proteggere gli occhi/il viso.

**P280a**  
Indossare guanti / occhiali di protezione / protezione per il viso.

**P280b**  
Indossare guanti di protezione / occhiali di protezione.

**P280c**  
Indossare guanti di protezione / protezione per il viso.

**P280d**  
Indossare indumenti protettivi / occhiali di protezione.

**P280e**  
Indossare indumenti protettivi / protezione per il viso.

**P280f**  
Indossare indumenti protettivi.

**P280g**  
Indossare guanti di protezione.

**P280h**  
Indossare guanti di protezione / indumenti protettivi.

**P280i**  
Indossare protezione per occhi / protezione per il viso.

**P280j**  
Indossare protezione per il viso.

**P281**  
Utilizzare il dispositivo di protezione individuale richiesto.

**P282**  
Utilizzare guanti termici/schermo facciale/Proteggere gli occhi.

**P283**  
Indossare indumenti completamente ignifughi o in tessuti ritardanti di fiamma.

**P284**  
Utilizzare un apparecchio respiratorio.

**P285**  
In caso di ventilazione insufficiente utilizzare un apparecchio respiratorio.

**P301**  
IN CASO DI INGESTIONE:

**P302**  
IN CASO DI CONTATTO CON LA PELLE:

**P303**  
IN CASO DI CONTATTO CON LA PELLE (o con i capelli):

**P304**  
IN CASO DI INALAZIONE:

**P305**  
IN CASO DI CONTATTO CON GLI OCCHI:

**P306**  
IN CASO DI CONTATTO CON GLI INDUMENTI:

**P307**  
IN CASO di esposizione:**P308**  
IN CASO di esposizione o di possibile esposizione:

**P309**  
IN CASO di esposizione o di malessere:

**P310**  
Contattare immediatamente un CENTRO ANTIVELENI o un medico.

**P311**  
Contattare un CENTRO ANTIVELENI o un medico.

**P312**  
In caso di malessere, contattare un CENTRO ANTIVELENI o un medico.

**P313**  
Consultare un medico.

**P314**  
In caso di malessere, consultare un medico.

**P315**  
Consultare immediatamente un medico.

**P320**  
Trattamento specifico urgente (vedere su questa etichetta).

**P321**  
Trattamento specifico (vedere su questa etichetta).

**P322**  
Misure specifiche (vedere su questa etichetta).

**P330**  
Sciacquare la bocca.

**P331**  
NON provocare il vomito.

**P332**  
In caso di irritazione della pelle:

**P333**  
In caso di irritazione o eruzione della pelle:

**P334**  
Immergere in acqua fredda/avvolgere con un bendaggio umido.

**P335**  
Rimuovere le particelle depositate sulla pelle.

**P336**  
Sgelare le parti congelate usando acqua tiepida. Non sfregare la parte interessata.

**P337**  
Se l'irritazione degli occhi persiste:

**P338**  
Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.

**P340**  
Trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione.

**P341**  
Se la respirazione è difficile, trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione.

**P342**  
In caso di sintomi respiratori:

**P350**  
Lavare delicatamente e abbondantemente con acqua e sapone.

**P351**  
Sciacquare accuratamente per parecchi minuti.

**P352**  
Lavare abbondantemente con acqua e sapone.

**P353**  
Sciacquare la pelle/fare una doccia.

**P360**  
Sciacquare immediatamente e abbondantemente gli indumenti contaminati e la pelle prima di togliersi gli indumenti.

**P361**  
Togliersi di dosso immediatamente tutti gli indumenti contaminati.

**P362**  
Togliersi di dosso gli indumenti contaminati e lavarli prima di indossarli nuovamente.

**P363**  
Lavare gli indumenti contaminati prima di indossarli nuovamente.

**P364**  
E lavarli prima di indossarli nuovamente.

**P370**  
In caso di incendio:

**P371**  
In caso di incendio grave e di quantità rilevanti:

**P372**  
Rischio di esplosione in caso di incendio.

**P373**  
NON utilizzare mezzi estinguenti se l'incendio raggiunge materiali esplosivi.

**P374**  
Utilizzare i mezzi estinguenti con le precauzioni abituali a distanza ragionevole.

**P375**  
Rischio di esplosione. Utilizzare i mezzi estinguenti a grande distanza.

**P376**  
Bloccare la perdita se non c'è pericolo.

**P377**  
In caso d'incendio dovuto a perdita di gas, non estinguere a meno che non sia possibile bloccare la perdita senza pericolo.

**P378**  
Estinguere con...

**P378a**  
Estinguere con: CO<sub>2</sub>, polvere per estintore o acqua nebulizzata.

**P378b**  
Estinguere con: Polvere speciale per incendi di metalli.

**P378c**  
Estinguere con: CO<sub>2</sub>, sabbia, polvere per estintore.

**P378d**  
Estinguere con: Acqua.

**P378e**  
Estinguere con: Acqua nebulizzata.

**P378f**  
Estinguere con: Getto d'acqua.

**P378g**  
Estinguere con: Schiuma.

**P378h**  
Estinguere con: Schiuma resistente all'alcool.

**P378i**  
Estinguere con: Polvere per estintore.

**P378j**  
Estinguere con: Polvere BC.

**P378k**  
Estinguere con: Polvere ABC.

**P378l**  
Estinguere con: Anidride carbonica.

**P378m**  
Estinguere con: Polvere calcarea.

**P378n**  
Estinguere con: Cemento.

**P378o**  
Estinguere con: Sabbia.

**P378p**  
Estinguere con: Sabbia asciutta.

**P380**  
Evacuare la zona.

**P381**  
Eliminare ogni fonte di accensione se non c'è pericolo.

**P390**  
Assorbire la fuoriuscita per evitare danni materiali.

**P391**  
Raccogliere il materiale fuoriuscito.

**P301+P310**  
IN CASO DI INGESTIONE: contattare immediatamente un CENTRO ANTIVELENI o un medico.

**P301+P312**  
IN CASO DI INGESTIONE accompagnata da malessere: contattare un CENTRO ANTIVELENI o un medico.

**P301+P330+P331**  
IN CASO DI INGESTIONE: sciacquare la bocca. NON provocare il vomito.

**P302+P334**  
IN CASO DI CONTATTO CON LA PELLE: immergere in acqua fredda/avvolgere con un bendaggio umido.

**P302+P350**  
IN CASO DI CONTATTO CON LA PELLE: lavare delicatamente e abbondantemente con acqua e sapone.

**P302+P352**  
IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua e sapone.

**P303+P361+P353**  
IN CASO DI CONTATTO CON LA PELLE (o con i capelli): togliersi di dosso immediatamente tutti gli indumenti contaminati. Sciacquare la pelle/fare una doccia.

**P304+P312**  
IN CASO DI INALAZIONE accompagnata da malessere: Contattare un CENTRO ANTIVELENI o un medico.

**P304+P340**  
IN CASO DI INALAZIONE: trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione.

**P304+P341**  
IN CASO DI INALAZIONE: se la respirazione è difficile, trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione.

**P305+P351+P338**  
IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.

**P306+P360**  
IN CASO DI CONTATTO CON GLI INDUMENTI: sciacquare immediatamente e abbondantemente gli indumenti contaminati e la pelle prima di togliersi gli indumenti.

**P307+P311**  
IN CASO di esposizione, contattare un CENTRO ANTIVELENI o un medico.

**P308+P311**

In caso di esposizione o di possibile esposizione: contattare un CENTRO ANTIVELENI/un medico.

**P308+P313**

IN CASO di esposizione o di possibile esposizione, consultare un medico.

**P309+P311**

IN CASO di esposizione o di malessere, contattare un CENTRO ANTIVELENI o un medico.

**P231+P232**

Manipolare in atmosfera di gas inerte. Tenere al riparo dall'umidità.

**P332+P313**

In caso di irritazione della pelle: consultare un medico.

**P333+P313**

In caso di irritazione o eruzione della pelle: consultare un medico.

**P335+P334**

Rimuovere le particelle depositate sulla pelle. Immergere in acqua fredda/avvolgere con un bendaggio umido.

**P235+P410**

Tenere in luogo fresco. Proteggere dai raggi solari.

**P337+P313**

Se l'irritazione degli occhi persiste, consultare un medico.

**P342+P311**

In caso di sintomi respiratori: contattare un CENTRO ANTIVELENI o un medico.

**P361+P364**

Togliersi di dosso immediatamente gli indumenti contaminati e lavarli prima di indossarli nuovamente.

**P362+P364**

Togliersi di dosso gli indumenti contaminati e lavarli prima di indossarli nuovamente.

**P370+P376**

In caso di incendio: bloccare la perdita se non c'è pericolo.

**P370+P378**

In caso di incendio: estinguere con....

**P370+P378a**

In caso di incendio: Estinguere con: CO<sub>2</sub>, polvere per estintore o acqua nebulizzata.

**P370+P378b**

In caso di incendio: Estinguere con: Polvere speciale per incendi di metalli.

**P370+P378c**

In caso di incendio: Estinguere con: CO<sub>2</sub>, sabbia, polvere per estintore.

**P370+P378d**

In caso di incendio: Estinguere con: Acqua.

**P370+P378e**

In caso di incendio: Estinguere con: Acqua nebulizzata.

**P370+P378f**

In caso di incendio: Estinguere con: Getto d'acqua.

**P370+P378g**

In caso di incendio: Estinguere con: Schiuma.

**P370+P378h**

In caso di incendio: Estinguere con: Schiuma resistente all'alcool.

**P370+P378i**

In caso di incendio: Estinguere con: Polvere per estintore.

**P370+P378j**

In caso di incendio: Estinguere con: Polvere BC.

**P370+P378k**

In caso di incendio: Estinguere con: Polvere ABC.

**P370+P378l**

In caso di incendio: Estinguere con: Anidride carbonica.

**P370+P378m**

In caso di incendio: Estinguere con: Polvere calcarea.

**P370+P378n**

In caso di incendio: Estinguere con: Cemento.

**P370+P378o**

In caso di incendio: Estinguere con: Sabbia.

**P370+P378p**

In caso di incendio: Estinguere con: Sabbia asciutta.

**P370+P380**

Evacuare la zona in caso di incendio.

**P370+P380+P375**

In caso di incendio: evacuare la zona. Rischio di esplosione. Utilizzare i mezzi estinguenti a grande distanza.

**P371+P380+P375**

In caso di incendio grave e di grandi quantità: evacuare la zona. Rischio di esplosione. Utilizzare i mezzi estinguenti a grande distanza.

**P401**

Conservare...

**P401a**

Conservare secondo i regolamenti locali/regionali/nazionali/internazionali.

**P402**

Conservare in luogo asciutto.

**P403**

Conservare in luogo ben ventilato.

**P404**

Conservare in un recipiente chiuso.

**P405**

Conservare sotto chiave. **P406**

Conservare in recipiente resistente alla corrosione provvisto di rivestimento interno resistente.

**P407**

Mantenere uno spazio libero tra gli scaffali/i pallet.

**P410**

Proteggere dai raggi solari.

**P411**

Conservare a temperature non superiori a ... °C/ ...°F.

**P411a**

Conservare a temperature non superiori a... °C.

**P411b**

Conservare a temperature non superiori a... °F.

**P412**

Non esporre a temperature superiori a 50 °C/122 °F.

**P413**

Conservare le rinfuse di peso superiore a ...kg/ ...lb a temperature non superiori a ... °C/ ...°F.

**P413a**

Conservare le rinfuse di peso superiore a ...kg a temperature non superiori a... °C.

**P413b**

Conservare le rinfuse di peso superiore a ...lb a temperature non superiori a ...°F.

**P420**

Conservare lontano da altri materiali.

**P420a**

Conservare lontano da alimenti.

**P420b**

Conservare lontano da sostanze infiammabili.

**P420c**

Conservare lontano dal ossidanti.

**P420d**

Conservare lontano da riducenti.

**P420e**

Conservare lontano dal acqua.

**P420f**

Conservare lontano da metalli.

**P420g**

Conservare lontano da acidi.

**P420h**

Conservare lontano da sostanze alcaline.

**P422**

Conservare sotto...

**P422a**

Conservare sotto gas inerte.

**P422b**

Conservare sotto gas protettivo.

**P422c**

Conservare sotto solvente.

**P422d**

Conservare in acqua.

**P422e**

Conservare sotto petrolio.

**P422f**

Conservare sotto azoto.

**P402+P404**

Conservare in luogo asciutto e in recipiente chiuso.

**P403+P233**

Tenere il recipiente ben chiuso e in luogo ben ventilato.

**P403+P235**

Conservare in luogo fresco e ben ventilato.

**P410+P403**

Proteggere dai raggi solari. Conservare in luogo ben ventilato.

**P410+P412**

Proteggere dai raggi solari. Non esporre a temperature superiori a 50 °C/122 °F.

**P411+P235**

Conservare in luogo fresco a temperature non superiori a ...°C/ ...°F.

**P411a+P235**

Conservare in luogo fresco a temperature non superiori a ...°C.

The GHS regulation resp. CLP (regulation on Classification, Labeling and Packaging of Substances and Mixtures) regulation (EG) No 1272/2008 has become effective on 20th January 2009.

This regulation will amend and repeal Directives 67/548/EEC and 1999/45/EC over a period of a few years, and amend Regulation (EC) No 1907/2006. It's the aim of this regulation to ensure a high level of protection of human health and the environment. In addition it is essential to harmonize the provisions and criteria for the classification and labeling of substances and mixtures.

With this information we would like to give our customers an insight into the new systematic and simultaneously provide an opportunity to become acquainted with the new pictograms as well as with the H (hazard warnings)- and P (safety information) codes.

## H - Códigos

### Indicaciones de peligro asignada a peligro físico

#### H200

Explosivo inestable.

#### H201

Explosivo; peligro de explosión en masa.

#### H202

Explosivo; grave peligro de proyección.

#### H203

Explosivo; peligro de incendio, de onda expansiva o de proyección.

#### H204

Peligro de incendio o de proyección.

#### H205

Peligro de explosión en masa en caso de incendio.

#### H220

Gas extremadamente inflamable.

#### H221

Gas inflamable.

#### H222

Aerosol extremadamente inflamable.

#### H223

Aerosol inflamable.

#### H224

Líquido y vapores extremadamente inflamables.

#### H225

Líquido y vapores muy inflamables.

#### H226

Líquidos y vapores inflamables.

#### H227

Líquido combustible.

#### H228

Sólido inflamable.

#### H229

Envase a presión. Puede reventar si se calienta.

#### H230

Puede explotar incluso en ausencia de aire.

#### H231

Puede explotar incluso en ausencia de aire, a presión y/o temperatura elevadas.

#### H240

Peligro de explosión en caso de calentamiento.

#### H241

Peligro de incendio o explosión en caso de calentamiento.

#### H242

Peligro de incendio en caso de calentamiento.

#### H250

Se inflama espontáneamente en contacto con el aire.

#### H251

Se calienta espontáneamente; puede inflamarse.

#### H252

Se calienta espontáneamente en grandes cantidades; puede inflamarse.

#### H260

En contacto con el agua desprende gases inflamables que pueden inflamarse espontáneamente.

#### H261

En contacto con el agua desprende gases inflamables.

#### H270

Puede provocar o agravar un incendio; comburente.

#### H271

Puede provocar un incendio o una explosión; muy comburente.

#### H272

Puede agravar un incendio; comburente.

#### H280

Contiene gas a presión; peligro de explosión en caso de calentamiento.

#### H281

Contiene un gas refrigerado; puede provocar quemaduras o lesiones criogénicas.

#### H290

Puede ser corrosivo para los metales.

### Indicaciones de peligro para la salud humana

#### H300

Mortal en caso de ingestión.

#### H301

Tóxico en caso de ingestión.

#### H302

Nocivo en caso de ingestión.

#### H303

Puede ser nocivo en caso de ingestión.

#### H304

Puede ser mortal en caso de ingestión y penetración en las vías respiratorias.

#### H305

Puede ser nocivo en caso de ingestión y de penetración en las vías respiratorias.

#### H310

Mortal en contacto con la piel.

#### H311

Tóxico en contacto con la piel.

#### H312

Nocivo en contacto con la piel.

#### H313

Puede ser nocivo en contacto con la piel.

#### H314

Provoca quemaduras graves en la piel y lesiones oculares graves.

#### H315

Provoca irritación cutánea.

#### H316

Provoca una leve irritación cutánea.

#### H317

Puede provocar una reacción alérgica en la piel.

#### H318

Provoca lesiones oculares graves.

#### H319

Provoca irritación ocular grave.

#### H320

Provoca irritación ocular.

#### H330

Mortal en caso de inhalación.

#### H331

Tóxico en caso de inhalación.

#### H332

Nocivo en caso de inhalación.

#### H333

Puede ser nocivo si se inhala.

#### H334

Puede provocar síntomas de alergia o asma o dificultades respiratorias en caso de inhalación.

#### H335

Puede irritar las vías respiratorias.

#### H336

Puede provocar somnolencia o vértigo.

#### H340

Puede provocar defectos genéticos.

#### H341

Se sospecha que provoca defectos genéticos.

#### H350

Puede provocar cáncer.

#### H350i

Puede provocar cáncer por inhalación.

#### H351

Se sospecha que provoca cáncer.

#### H351i

Podría provocar cáncer probablemente a causa de la inhalación.

## I. Geltungsbereich und Einbeziehung

1. Es gelten ausschließlich unsere AGB. Hiervon abweichende AGB des Kunden werden nur durch ausdrückliche Vereinbarung in Schriftform oder durch Erklärungen mit qualifizierter elektronischer Unterschrift wirksam einbezogen. Nach Vertragsabschluss ist die Einbeziehung abweichender AGB formfrei möglich.
2. Unsere AGB gelten nur gegenüber Unternehmen und juristischen Personen des öffentlichen Rechts (einschließlich den nicht rechtsfähigen Anstalten d.ö.R.); sie gelten auch für zukünftige Verträge mit diesen, ohne dass es erneuter Vereinbarung ihrer Einbeziehung bedarf.

## II. Bindung an Angebote, Angaben bei Vertragsabschluss, Abweichungen von Angaben bei Vertragsabschluss

1. Wir sind berechtigt, unsere Angebote bis zur Annahme zu widerrufen, es sei denn wir bezeichnen unser Angebot als bindend.
2. Auf unserer Webseite, in Katalogen oder ähnlichen Unterlagen enthaltene die Leistung oder das Produkt beschreibende Angaben sowie öffentliche Äußerungen von uns oder von Herstellern sind nicht verbindlich, es sei denn die dort genannte Eigenschaft wurde als Beschaffenheit der Ware mit dem Kunden vereinbart oder der Kunde kann sie aufgrund dieser oder anderer öffentlicher Äußerungen erwarten.
3. Abweichungen von vereinbarten Produkt- oder Leistungseigenschaften berühren nicht die Erfüllung von Verträgen, sofern sie dem Kunden zumutbar sind, den vertragsmäßigen Gebrauch nicht oder nur unwesentlich einschränken und das Vorhandensein der Eigenschaft nicht von uns garantiert oder zugesichert wurde oder für uns erkennbar war, dass die vereinbarte Eigenschaft für den Kunden von besonderer Bedeutung ist, insbesondere wenn durch die Abweichung von ihr der Vertragszweck gefährdet würde.

## III. Preisangaben, Preise, Zuschläge, Zahlungsbedingungen, Verzug

1. Mit uns vereinbarte Preise sowie unsere Katalogpreise verstehen sich bei Inlandslieferungen netto frei Haus, d.h. einschließlich Anlieferung und Verpackung und sind zahlbar ohne Abzug. Bei Mindermengen, Gefahrgut und Kühlsendungen erheben wir grundsätzlich zum vereinbarten Preis einen Zuschlag.
2. Unsere Preisangaben sind nur verbindlich nach Maßgabe der nachstehenden Ziff. 3.
3. Bei einer vereinbarten Liefer- oder Leistungszeit von mehr als drei Monaten sind wir berechtigt, die Preise entsprechend in der Zeit zwischen Vertragsschluss und Lieferung eingetretener Preissteigerungen auf unseren Beschaffungsmärkten zu erhöhen und verpflichtet, entsprechend in dieser Zeit dort eingetretener Preiser-niedrigungen zu senken. Wir sind – unabhängig von der vereinbarten Lieferzeit – berechtigt und verpflichtet, den Preis unserer Leistungen dem Marktpreis entsprechend anzupassen, sofern dieser sich zwischen Vertragsschluss und Leistung bzw. Lieferung um mehr als 4,5% geändert hat.
4. Dauert der Verzug des Kunden länger als 30 Kalendertage oder wird Antrag auf Eröffnung des Insolvenzverfahrens über sein Vermögen gestellt, sind wir berechtigt, sämtliche Forderungen gegen den Kunden sofort fällig zu stellen, sämtliche Lieferungen und Leistungen zurückzuhalten und sämtliche Rechte aus Eigentums- vorbehalten geltend zu machen.
5. Der Kunde kann nur mit unbestrittenen oder rechtskräftig festgestellten Forderungen aufrechnen oder ein Zurückbehaltungsrecht geltend machen.

## IV. Lieferung, Liefertermin, Lieferverzug

1. Vereinbarte Liefertermine gelten als eingehalten, wenn die Ware zum vereinbarten Liefertermin dem Transportunternehmen übergeben wurde. Wir melden dem Kunden auf Wunsch die Versandbereitschaft der Ware.
2. Der Liefertermin wird nach unserem voraussichtlichen Leistungsvermögen vereinbart und versteht sich vorbehaltlich von uns nicht zu vertretender Umstände und Ereignisse, die bei Vertragsschluss nicht gegeben waren oder uns weder bekannt waren noch bekannt sein mussten, unabhängig davon, ob diese Umstände oder Ereignisse bei uns oder beim Hersteller eintreten. Derartige Ereignisse verlängern den Liefertermin entsprechend, und zwar auch dann, wenn sie während eines bereits eingetretenen Verzuges auftreten. Verlängert wird auch eine in diesem Falle evtl. vom Kunden gesetzte Frist um die Dauer des unvorhergesehenen Ereignisses.
3. Sollten wir mit einer Lieferung mehr als 8 Wochen in Verzug geraten, kann der Kunde nach einer schriftlich gesetzten, angemessenen Frist zur Leistung vom Vertrag zurücktreten. In die Berechnung der Verzugsdauer sind die von uns nicht zu vertretenden Lieferverzögerungen i.S.d. Ziff. IV. 2 nicht mit einzuberechnen.
4. Wir behalten uns das Recht vor, vom Vertrag zurückzutreten, wenn eine von uns nicht zu vertretende Lieferverzögerung i.S.d. Ziff. IV. 2 länger als 8 Wochen andauert.
5. Wir sind zu Teillieferungen in zumutbarem Umfang berechtigt, sollte auf unseren Beschaffungsmärkten ein Beschaffungsspass bestehen.

## V. Eigentumsvorbehalt

1. Die Ware bleibt unser Eigentum bis zur Bezahlung sämtlicher, auch künftig entstehender Forderungen gegen den Kunden, gleich aus welchem Rechtsgrund. Hierzu gehören auch bedingte Forderungen.
2. Der Kunde darf Vorbehaltsware im ordnungsgemäßen Geschäftsbetrieb, und zwar gegen Barzahlung oder unter Eigentumsvorbehalt, veräußern; zu anderen Verfügungen, insbesondere zur Sicherheitsübereignung und zur Verpfändung, ist er nicht berechtigt.
3. Der Kunde tritt zur Sicherung unserer Ansprüche – gleich aus welchem Rechtsgrund (vergl. Ziff. V.1.) – schon jetzt von seinen Forderungen aus Lieferungen, in denen unsere Vorbehaltsware enthalten ist, jeweils den Betrag mit allen Nebenrechten an uns ab, der unserem Rechnungspreis einschließlich Umsatzsteuer für die enthaltene Vorbehaltsware entspricht.
4. Der Kunde bleibt auch nach der Abtretung zur Einziehung der Forderungen berechtigt, vorausgesetzt er ist zur Zeit der Forderungseinziehung nicht verpflichtet, Insolvenzantrag zu stellen und willens und in der Lage, seinen Zahlungsverpflichtungen uns gegenüber nachzukommen.
5. Übersteigt der Wert der Gesamtheit der uns zustehenden Sicherheiten die Höhe der Gesamtheit unserer Forderungen um mehr als 30% werden wir Sicherheiten nach unserer Wahl auf Verlangen des Kunden freigeben. Fällt die Umsatzsteuer gemäß §§ 170 Abs. 2, 171 Abs. 2, 3 InsO bei uns an, erhöht sich diese Grenze auf 40%.
6. Der Kunde hat uns den Zugriff Dritter auf die Vorbehaltsware oder die uns abgetretenen Forderungen sofort schriftlich mitzuteilen und uns in jeder Weise bei der Intervention zu unterstützen. Die Kosten hierzu trägt der Kunde, wenn die Intervention erfolgreich war, jedoch beim Beklagten als Kostenschuldner die Zwangsvollstreckung vergeblich versucht wurde.
7. Erkennt das Sitzland des Kunden den Eigentumsvorbehalt nicht an, so sind wir berechtigt, gestattet es aber dem Verkäufer, sich andere ähnliche Rechte an dem Liefergegenstand vorzubehalten, so ist der Kunde verpflichtet, uns diese Rechte einzuräumen.

## VI. Gefahrübergang, Versicherung

1. Die Gefahr geht mit Übergabe an die Transportperson, deren Beauftragten oder andere Personen, die von uns benannt sind, auf den Kunden über, es sei denn die Ware wird mit eigenen Leuten oder eigenen Fahrzeugen zum Kunden gebracht. Soweit sich der Versand ohne unser Verschulden verzögert oder unmöglich wird, geht die Gefahr mit Meldung der Versandbereitschaft auf den Kunden über. Diese Gefahrübergangsbestimmungen gelten auch bei Rücksendungen nach Mängelbe-seitigung, entgeltlicher Serviceleistung oder Ersatzlieferung an den Kunden.
2. Auf Verlangen des Kunden wird die Sendung auf seine Kosten gegen die von ihm bezeichneten Risiken – soweit mit für uns mit zumutbarem Aufwand möglich – versichert.

## VII. Wichtige Hinweise zu unseren Produkten

1. Lagerung: Bei sämtlichen Substanzen geben wir Lagertemperaturen an, die wir für mehrmonatige Lagerung vorschlagen. Da auch solche Substanzen nach unserer Erfahrung einen mehrtägigen Transport in der Regel ohne Qualitätsverlust überstehen, liefern wir sie nur auf besonderen Wunsch und gegen Aufpreis als Kühlsendung aus.
2. Kühlsendung: Besonders empfindliche Präparate werden als Kühlsendung gegen Zuschlag verschickt.
3. Beschränkte Produktverwendung: Von SERVA gelieferte Produkte sind ausschließlich für Forschungs- und sonstige Laboratoriumszwecke bestimmt. Sie dürfen nur in Laboratorien unter Aufsicht hierfür fachlich qualifizierter Personen verwendet werden. Die Weiterveräußerung oder sonstige Weitergabe unserer Produkte an Privatpersonen ist unzulässig. SERVA ist berechtigt, vom Kunden eine schriftliche Bestätigung zu verlangen, dass das betreffende Produkt für nicht erlaubte Anwendungen weder bezogen noch weiterveräußert wird.
4. Gifte: Giftige Stoffe werden nur aufgrund schriftlicher Bestellung an technische Gewerbebetriebe, Wiederverkäufer, öffentliche Forschungs-, Untersuchungs- oder Lehranstalten geliefert. Die Bestellung muss von einer zur Vertretung berechtigten Person handschriftlich unterzeichnet sein und den vollen Namen dieser Person ersichtlich machen. Giftige Stoffe dürfen nur von geschultem Personal unter Beachtung entsprechender Sicherheitsvorkehrungen gehandhabt werden.
5. Sicherheitsdatenblatt: Auf Anforderung übersendet SERVA kostenlos zu jedem Produkt ein Sicherheitsdatenblatt.

## VIII. Mängel, Verjährung

1. Der Kunde hat die Lieferung/Leistung unverzüglich – soweit zumutbar – zu untersuchen und erkennbare Mängel unverzüglich schriftlich und – soweit zumutbar – substantiiert geltend zu machen.
2. Bei Mängeln sind wir entgegen § 439 Abs. 1 BGB nach unserer Wahl zur Mängelbeseitigung oder Ersatzlieferung berechtigt. Das Recht des Kunden, bei Fehlschlagen der Nacherfüllung nach seiner Wahl zu mindern oder zurückzutreten, bleibt unberührt.
3. An Stelle der gemäß § 438 Abs. 1 Nr. 3 BGB geltenden Verjährungsfrist, gilt eine solche von nur einem Jahr. Für Ansprüche nach IX.1 und für solche wegen grober Fahrlässigkeit und Vorsatz gilt diese Verkürzung der Verjährungsfrist nicht.
4. Weitergehende Ansprüche des Kunden wegen Mängeln der Ware sind nach Maßgabe von Ziffer IX ausgeschlossen.

## IX. Haftungsbeschränkung

1. Wir haften dem Kunden aus gesetzlichen oder vertraglichen Haftungstatbeständen unbeschränkt (i) im Falle des Vorsatzes oder der groben Fahrlässigkeit, (ii) bei Verletzung von Leben und Körper, (iii) im Umfang einer von uns übernommenen Garantie, (iv) nach den Vorschriften des Produkthaftungsgesetzes, (v) nach den gesetzlichen Vorschriften über die Zufalls- und Gefährdungshaftung sowie (vi) wenn wir Mängel arglistig verschweigen.
2. Ist kein Fall von Ziff. IX gegeben, gilt folgendes:
  - a. Im Falle der groben Fahrlässigkeit von Erfüllungsgehilfen, die nicht Organe oder leitende Angestellte sind und keine Pflicht verletzen, die für die Erreichung des Vertragszwecks wesentlich ist („Kardinalspflicht“) haften wir bei Eintritt eines vorhersehbaren typischen Schadens nur bis zu einem Betrag von EUR 100.000,-. Sollte in einem solchen Fall unsere Haftpflichtversicherung eintreten, so haften wir darüber hinaus bis zur Höhe von deren Eintritt, sofern dieser Betrag höher ist.
  - b. Im Falle der leichten Fahrlässigkeit haften wir nur für die Verletzung von Vertragspflichten, die für die Erreichung des Vertragszwecks wesentlich sind („Kardinalpflichten“). In diesen Fällen ist unsere Haftung jedoch auf vorhersehbare typische Schäden und einen Betrag von EUR 50.000,- begrenzt.
  - c. Sollte in einem solchen Fall unsere Haftpflichtversicherung eintreten, so haften wir darüber hinaus bis zur Höhe von deren Eintritt, sofern dieser Betrag höher ist.
3. Die vorstehenden Bestimmungen gelten auch für die persönliche Haftung unserer Mitarbeiter, Vertreter und Organe.

## X. Gültigkeitsbestimmung

Wenn einzelne Bestimmungen dieser AGB unwirksam sind oder werden, bleibt die Gültigkeit der übrigen davon unberührt.

## XI. Erfüllungsort, Gerichtsstand

Erfüllungsort für unsere vertraglichen Pflichten und Gerichtsstand für sämtliche Streitigkeiten aus dem Vertrag ist Heidelberg. Wir dürfen den Kunden auch an seinem Sitz oder gewöhnlichen Aufenthalt verklagen.

## XII. Anwendbares Recht

Es gilt das Recht Deutschlands.

Stand: 21.07.2018

## I. Scope and Incorporation

1. Our Terms and Conditions of Sale and Supply (TCS&S) apply exclusively. Deviating Conditions of Purchase of the customer shall not be effective unless we expressly accept them in writing or by Email with qualified electronic signature. After formation of contract, deviating Conditions of Purchase may be integrated formlessly.
2. Our TCS&S shall only apply towards customers that are businesses in the sense of section 14 of the German Civil Code, or public law entities (comprising such not having the status of a legal person).
3. Our TCS&S apply on all future relations between the parties, even if not agreed upon expressly.

## II. Commitment of Offers, Specifications, Deviations from Specifications

1. We reserve the right to revoke our offers until their acceptance unless we designate them as binding.
2. Product characteristics mentioned on our website, applicable catalogues or similar materials are not binding, unless such characteristics were agreed upon with the customer or the customer relies on them legitimately due to our public utterance.
3. Deviations from product characteristics agreed upon shall be deemed according to the contract if the deviation reasonably has to be accepted by the customer, or does not or not substantially reduce the suitability of the product for the contractually presupposed use, unless we represented the missing characteristic or could realize that it was of major importance for the customer, or its absence endangers the sense of the contract.

## III. Prices, Payment

1. All prices are net prices, computed in EURO, exclusive value-added tax (VAT). For domestic deliveries we do not charge packaging, transportation, or other incidental costs.
2. Our prices are binding according to below standing para. III. 3.
3. If lead times agreed upon are more than 3 months, we may increase or have to reduce the prices agreed upon in the scope of market prices, if, after formation of the contract our costs increase or decrease, especially due to changes of cost of materials. Irrespective of the lead time agreed upon, we may have to adapt our price to the market price, if such has changed more than 4.5% between the date of contract formation and the delivery date agreed upon.
4. If customer's default with a payment lasts longer than 30 calendar days, or a insolvency petition is filed against customer, we shall be entitled to set due and payable the whole of the price of all goods bought or agreed to be bought by the customer, to retain all deliveries and services, and to demand return of the reserved goods or to collect them from third party areas and take possession of them.
5. The customer shall not be entitled to any right of retention or refusal or offset of his counterclaims against our claims unless the counterclaims the customer exercises retention or refusal for or sets off against our claims are uncontested or res judicata.

## IV. Delivery, Delivery Date, Default of Delivery

1. Deadlines for deliveries are deemed to have been met when the goods are handed over to the forwarding agent. We shall notify the customer on its request of the readiness for shipment.
2. Deadlines for deliveries are agreed upon on the basis of our expected ability to perform and are subject to all facts, events and circumstances not attributable to us and not given at the time of the formation of contract. Such circumstances are especially force majeure, and other unforeseeable events. Such circumstances lead to an extension of the delivery date, even if occurring during our default with delivery. In such case, also an additional period fixed by the customer, is extended by the duration of such circumstances.
3. If we are in default of delivery for more than eight weeks, customer may rescind the contract after fruitless expiration of a reasonable additional period fixed by customer. We compute periods of default regardless of circumstances not attributable to us, such as mentioned in para. IV. 2.
4. We reserve the right to rescind the contract in cases of a delay in the delivery not attributable to us, such as mentioned in para. IV. 2., lasting more than eight weeks.
5. Partial deliveries and services shall be acceptable if we have a (i) justified interest in these, including but not limited to cases of bottlenecks in our supply markets and (ii) these are acceptable to the customer.

## V. Retention of Title

1. We retain the title in any items delivered by us prior to the receipt of all payments due from customer's business transactions with us, irrespective of their legal grounds. Claims subject to a condition precedent are included.
2. Until payment in full of the purchase price, customer shall not pledge the goods, assign or transfer them as security, or otherwise charge them with the rights of any third party, but may sell them in the ordinary course of business. The customer shall make the passing of title of the resold goods subject to their full payment.
3. The customer assigns already now any of its claims resulting from the resales, containing any items subject to retention of title, including any associated rights. However, the assignment shall cover only the amount of the price we quoted, including VAT.
4. The customer is entitled to collect the purchase prices from resold goods until further notice. If we set due and payable the whole of the price of all goods bought or agreed to be bought by the customer pursuant to para. III. 4., customer is obliged to inform its buyers from the assignment pursuant to para V. 3, to provide us all necessary information, present all relevant documents, resp. make available to us its bookkeeping for information purposes.
5. If the value of the security provided to us exceeds the value of the claims to be safeguarded by more than 30 per cent, we shall, at the customer's request, bring the excess coverage down to 30 per cent by releasing security of our own choice.
6. We shall be notified without undue delay of any third-party seizure or other event affecting our property and customer has to give us reasonable support with our intervention. Customer has to bear the cost of such intervention having been successful but the costs not being recoverable from the defendant and compulsory execution against the defendant being fruitless.
7. If the law in customer's country does not recognize retention of title, but allows us to retain other rights in the delivery, the customer shall assign such rights to us.

## VI. Passing of Risk, Insurance

1. The risk of loss and/or damage to goods supplied by us shall pass to the Customer when they are handed over to the transport person, the transport person's mandatory or other person we authorized, unless we deliver the goods with our own employees or vehicles to the customer. Should shipment be delayed due to circumstances beyond our control, the

risk shall pass to the customer upon notification of readiness for shipment. These provisions about passing of risk also apply on returns after correction of faults, repair works at customer's cost, and replacement delivery.

2. On request of the customer and at its cost, we will insure the goods delivered against the risks notified to us by the customer.

## VII. Important Information on our Products

1. Storage: We recommend temperatures that enable the goods to be stored for several months. As experience has shown, such goods can be transported over several days without loss of quality. Thus, we will only ship such goods as refrigerated shipments on special request of purchaser and at an additional charge.
2. Refrigerated Shipments: Particularly unstable items will be shipped in insulated packaging as refrigerated cargo at an additional charge.
3. Limited Usage: Products supplied by us are for in vitro, laboratory, and research use only. All our products may only be used within the confines of a laboratory and under the supervision of a qualified technical person. The further sale or passing on of our products to private persons is forbidden. At our own discretion, we may request the purchaser to provide us with written confirmation that the goods purchased are not used for applications other than laboratory or research use or are resold only for such purposes.
4. Poisons: Toxic substances are only shipped to industrial users, agents, qualified research-, hygiene- and teaching institutions on the basis of written purchase orders. The full name of the individual responsible for purchasing must be clearly visible on the order. Toxic substances may not be passed on to private individuals; toxic substances may only be used by qualified personnel in accordance with all necessary safety regulations.
5. Safety Data Sheet: On customer's request, we will send customer a safety data sheet about each product.

## VIII. Warranty

1. Customer has, without undue delay, to examine the goods and notify us in writing of any recognizable defects and shall, as far as possible with reasonable efforts, specify the defects found.
2. In case of warranty, we may, by way of derogation from Sec. 439 of the German Civil Code, at our discretion, repair or replace the delivered goods.
3. The limitation period in cases of deliveries where Section 438 para 2 No. 3 of the German Civil Code (about limitation period) is applicable, is limited to only one year. This time-barring reduction does not apply for claims based on an intentional or grossly negligent breach of duty on our part and for claims, where our liability is not limited pursuant to para IX.1.
4. Any further claims because of defects of the delivered goods shall be excluded unless otherwise provided for under the following section IX.

## IX. Limited Liability

We shall be liable for customer's damage, irrespective of the legal grounds therefore, only insofar as the following terms provide our liability:

1. Irrespective of the legal grounds thereof, our liability is unlimited in case of (i) any form of intent; (ii) personal injuries, including such followed by death; (iii) breach of a guarantee, as far as our guarantee goes; (iv) liability pursuant to the German Product Liability Act or any other mandatory statutory liability regulations; and (v) misrepresentation.
2. In all other cases of our liability, the following provisions apply:
  - a. In case of gross negligence of persons, we use to perform our obligation, our liability is - irrespective of the legal grounds thereof - limited to 100,000 EUR and we are liable only for the foreseeable damage typical to such contracts, provided that such persons are no organ or member of the executive staff and do not breach material contractual obligations whose fulfillment is necessary to attain the purpose of the contract („cardinal obligations“). In all other cases of gross negligence, our liability is unlimited.
  - b. In case of slight or normal negligence we are liable only if we breach material contractual obligations whose fulfillment is necessary to attain the purpose of the contract („cardinal obligations“) and our liability is limited to 50,000 EURO - irrespective of the legal grounds for our liability.
  - c. Should, in a case our liability is limited to a certain amount, the amount (principally) covered by our insurance exceed such limitation, we are liable to the amount of such insurance sum.
3. The above provisions apply accordingly for the personal liability of our employees, representatives and organs.

## X. Severability

The invalidity or non-enforceability of any term of the present General Conditions of Sale and Supply shall not affect the validity of the remaining terms and conditions thereof.

## XI. Place of Performance, Jurisdiction, Applicable Law, Interpretation of Terms of Trade

1. Place of performance for all our contractual obligations is D-69115 Heidelberg. Place of jurisdiction for all disputes arising out of the contractual relationship is Heidelberg. We have the option to sue the customer at its general place of jurisdiction.
2. German law shall apply.
3. Customary terms of trade shall be interpreted in accordance with the INCOTERMS current at the time.

## XII. About SERVA

1. SERVA is a limited liability company registered in the commercial register of the Local Court of Heidelberg und HRB No. 336136, duly incorporated for an unlimited duration, and validly existing under the laws of Germany.
2. Our registered offices are at Carl-Benz-Strasse 7, D-69115 Heidelberg, Germany. This address shall be used for all notices.
3. Our taxpayer's identification number for value-added tax (Umsatzsteueridentnummer) is DE 812517285.
